

SEPTEMBER 2024

CORPORATE PRESENTATION

aumegametals.com

ASX: AAM | TSXV: AUM | OTCQB: AUMMF

Disclaimer and Forward-Looking Statements

This presentation is not a prospectus nor an offer of securities for subscription or sale in any jurisdiction nor a securities recommendation. The information in this presentation is an overview and does not contain all information necessary for investment decisions. In making investment decisions, investors should rely on their own examination of AuMEGA Metals Limited (AuMEGA or the Company) and consult with their own legal, tax, business and/or financial advisers in connection with any acquisition of securities or interest in the Company. The information contained in this presentation has been prepared in good faith by the Company. However, no representation or warranty, express or implied, is made as to the completeness or adequacy of any statements, estimates, opinions or other information contained in this presentation. To the maximum extent permitted by law, the Company, its directors, officers, employees and agents disclaim liability for any loss or damage which may be suffered by any person through the use of, or reliance on, anything contained in or omitted from this presentation. Certain information in this presentation refers to the intentions of the Company, but these are not intended to be forecasts, forward looking statements, or statements about future matters for the purposes of the Corporations Act 2001 (Cth) or any other applicable law. The occurrence of events in the future are subject to risks, uncertainties and other factors that may alter the Company's actual results, performance or achievements to differ from those referred to in this presentation to occur as contemplated. The presentation contains only a synopsis of more detailed information available in relation to the matters described in this document and accordingly no reliance may be placed for any purpose whatsoever on the sufficiency or completeness of such information and to do so could potentially expose you to a significant risk of losing any of the property invested by you or incurring by you of additional liability. Recipients of this presentation should conduct their own investigation, evaluation and analysis of the business, data and property described in this presentation. In particular, any estimates or projections or opinions contained herein necessarily involve significant elements of subjective judgment, analysis and assumptions and you should satisfy yourself in relation to such matters.

Mineral Resources

The information in this Presentation that relates to the Mineral Resource estimate for the Cape Ray Gold Project was announced on 30 May 2023. AuMEGA confirms that it is not aware of any new information or data that materially affects the information included in the announcement of 30 May 2023 and that all material assumptions and technical parameters underpinning the Mineral Resource estimate in that announcement continue to apply and have not materially changed.

Mineral Resources are reported using a cut-off grade of 0.30 g/t gold for open pit and 2.00 g/t gold for underground. Assumptions for the open pit and underground grade cut-offs consider the following: a gold price of USD 1750 per troy ounce gold, selling costs of USD 5 per troy ounce gold, exchange rate of 1.3 USD:CAD, open pit mining costs of CAD 3 per tonne, underground mining costs of CAD 92.47 per tonne, processing costs of CAD 20 per tonne, G&A costs of CAD 5 per tonne processed, gold recovery of 96%, and royalty of 3% for Zone 4, 41 and Isle aux Morts and royalty of 1% for Window Glass Hill, Angus, PW Zone and Zone 51. The open pit Mineral Resources are constrained using optimized pit shells that have been generated using Lerchs Grossman algorithm with parameters outlined above, using a maximum of 50 degree pit slopes. The underground Mineral Resources are constrained using a 2.00 g/t gold grade shell below the optimized pit based on the assumptions summarised above.

The Mineral Resource Estimate for the Cape Ray Gold Project has been prepared by Trevor Rabb, P.Geo. (EGBC #39599 and PEGNL #11155) who is a Competent Person as defined by JORC 2012. EGBC (formerly APEGBC) and PEGNL (APEGNL) are Recognised Professional Organisations accepted for the purpose of reporting in accordance with appendix 5A of the Australian Securities Exchange Listing Rules. Mineral Resources for the Cape Ray Gold Project have an effective date of 22 February 2023.

Exploration Results

The information in this Presentation that relates to exploration results reported through Company ASX announcements that can be found on the Company's website: www.aumegametals.com.

Data in this presentation have been previously disclosed by the Company and referenced in previous JORC Table 1 releases. Please see announcements dated: Mineral Resource estimate announced on 30 May 2023, Company 2024 exploration announcements on 28 August 2019, 31 October 2019, 29 October 2020, 16 January 2024, 23 May 2024 and 31 July 2024, Malachite announcements dated 20 August 2024, 20 April 2022, 8 June 2022, 12 September 2022, 14 September 2022, 6 October 2022, 12 December 2022, 25 January 2023 and 11 October 2023, Long Range announcements on 14 April 2021, 31 October 2019, 23 February 2023 and 24 August 2023, Bunker Hill announcements on 14 April 2021, 22 March 2023 and 6 April 2023, Hermitage prospecting results announced on 18 May 2023 and 13 November 2023, Grandy's announcements on 29 October 2020, 17 February 2021, 18 November 2021, 11 October 2023, Intersection related announcements 16 January 2024 and 29 October 2020, Hermitage announcement on 5 September 2024, 18 March 2024, Winter RC drill results reported on 23 April 2024 and 28 May 2024 and the Resource Corridor announcement on 5 June 2024. Targeting workshop news release dated 4 July 2024.

AuMEGA confirms that it is not aware of any new information or data that materially affects the information included in those announcements.

AuMEGA Value Proposition

Fully funded and strategically placed for major discoveries in one of the remaining top-tier jurisdictions

DISTRICT SCALE LAND PACKAGE

On a proven multi-million-ounce gold structure

“BLUE-CHIP” SHAREHOLDER REGISTER

Led by B2Gold as a strategic investor

WORLD-CLASS EXPLORATION

To maximise return on investment, create long-term value

TOP-NOTCH BOARD & MANAGEMENT

With a proven track record of making major discoveries, creating value

HIGH-GRADE, SHALLOW MINERAL RESOURCE

One of only a few explorers in Newfoundland with a defined mineral resource

Current Priority Projects

1

Malachite

- Vast, underexplored and geologically complex
- Winter RC program delineated three large, mineralized zones
- Currently diamond drilling several key areas
- Planning for larger, drill program for 2025

2

Cape Ray

- Site of the Company's defined mineral resources
- Completed approx. 2000 m of diamond drilling in 2024
- 2024 drilling extended gold mineralisation
- Planning for diamond drill program in 2025

3

Hermitage Gold-Antimony

- Largest antimony anomaly in Newfoundland
- Vast, underexplored with several key geological features that are akin to massive global deposits
- Evaluating Antimony and Uranium potential
- Planning to drill in 2025

Systematic Exploration that Respects Shareholder Capital

EARLY STAGE

- Prospecting, sampling and mapping
- Geophysics (e.g. gravity) and geochemistry

INTERMEDIATE STAGE

- Bottom of hole / basal till sampling
- Advanced geophysics (e.g. IP and EM)

ADVANCED STAGE

- Diamond drilling for new resource discovery

Balanced Exploration Program

Mix of exploration within the resource corridor & Greenfields

Building a Pipeline of Opportunities

Effective approach to test the extensive land package

Return on Investment

Ensure capital is allocated to generate the highest risk-adjusted returns

Comprehensive 2024 Exploration Program

Underway with significant results reported from winter RC drill program, diamond drilling in progress

COMPLETED INAUGURAL BOH RC DRILL PROGRAM

Three large mineralised zones identified

Malachite

DIAMOND DRILLING IN SPRING/SUMMER

3,000 to 5,000 metres of drilling now planned

Malachite Cape Ray

GEOPHYSICS & GEOCHEMISTRY

High-resolution airborne magnetics, Electro-magnetics
Till/soil sampling

Hermitage Intersection Bunker Hill

GEOLOGICAL MAPPING, MODELLING & PROSPECTING

Low-cost, high value target/project generation

Hermitage Cape Ray Blue Cove

2024 Progress and News Flow

Q1 2024

Winter Exploration Program

Inaugural RC drill program

**Hermitage Gold-Antimony
Structure Identified**

Q2 2024

Spring & Summer Exploration Program

Phase One Diamond Drilling

Geochemical Surveys

**Winter RC Results: Three large,
mineralised zones identified**

**Acquired option to Acquire High-
Grade Copper Project in NL**

**Rebranded as AuMEGA Metals
TSXV Listing: AUM**

**Completed comprehensive
technical workshop**

Q3 2024

Phase Two Diamond Drilling

Geophysical and Geochemical surveys

**Several new exploration targets
identified; 37 targets now in total**

**Phase one drilling extends
mineralisation at Central Zone**

**Intersection & Bunker Hill Phase One till
survey results
TBD**

Q4 2024

Results, analysis & planning

Planning for 2025

Geophysical and Geochemical surveys

**Phase two diamond drilling results
TBD**

**Geophysics results
TBD**

**Bunker Hill Phase Two till survey results
TBD**

**2025 drill program announced
TBD**

Malachite

Malachite Progression

Malachite 2024 Winter RC Drill Program

Multiple anomalous trends identified using gold and pathfinder results

First-ever RC BOH/BOT Sampling Program

- Tested highly prospective geological feature identified through early-stage works
- Tested major breakout structure off significant bend in Cape Ray Shear Zone

Three Large Mineralised Zones Identified

- BOH gold values well above benchmark
- Quartz-veining with sulphides

Diamond Drilling in Progress

- Several targets identified through results of the RC program

Malachite Diamond Drilling in Progress

Completed highly successful winter RC drill program that identified several diamond drill targets⁽¹⁾

Reconnaissance diamond drill program

- Approximately 1,000 to 1,500 metres planned
- Initial program ahead of larger program

O-2 East Target

- CRC0037 delivered 627 ppb Au and 1.99% Cu only 6m down
- BOH was into structure splaying off O-2 target

O-2 West Target

- CRC37: Significant gold (127 ppb) and pathfinder (3734ppm As) up further along the O-2 target
- Mineralised zone spanning 1.2 kilometres

1. See ASX announcements dated 23 April 2024 & 28 May 2024

stretch**

Resource Corridor

Phase One Diamond Drilling Yielded Positive Results

INDICATED MINERAL RESOURCES⁽¹⁾
6.2 Mt @ 2.25 g/t for 450 koz Au

INFERRED MINERAL RESOURCES⁽¹⁾
3.5 Mt @ 1.4 g/t for 160 koz Au

2024 Diamond Drilling Completed

- Approximately 1,900 metres drilling
- Deepest ever hole drilled at Central Zone (614m)

Mineralisation Extended at Central Zone

- Drilling intersected gold mineralisation down plunge of the 04 and 41 zones

Significant Intersections⁽²⁾

- Zone 04: 3.62 g/t Au over 7 metres including 19.7 g/t over one metre
- Zone 41: 1.94 g/t Au over 7.5 metres and 5.74 g/t over one metre

1. ASX announcement dated 30 May 2023
2. ASX announcement dated 11 September 2024

Additional Targets Identified in Resource Corridor

Intriguing results from the diamond drill program identifies additional future targets

Mineralisation Extended at Central Zone⁽¹⁾

- Both Zones 04 and 41 open down plunge and at depth

Intersected Intriguing Geological Units

- Drilling intersected the Window Glass Hill Granite and similar felsic unit at Central Zone
- Strawberry Hill Granite appears intrusive related

Mineralised Geotechnical Holes⁽²⁾

- Intersected 2.39 g/t over 11 metres (apparent thickness)
- Intersected 8.24 g/t over three metres including 13.9 g/t over one metre

1. ASX announcement dated 11 September 2024

2. ASX announcement dated 5 June 2024

New regional kinematic framework presents significant change to previous theories

Comprehensive Structural Review

- Review of drill core, geochemistry and geophysics

Variable Contributions to Gold Fluid Transport

- Metal inventory hypothesized as sourced from intrusion-related fluids

Major Change to Kinetic Framework

- Age of mineralisation later than previous believed or tested

Hermitage

Largest arsenic & antimony anomaly in Newfoundland – with confirmed association with gold

Significant Gold Belt

- Structural hosts other major gold discoveries including NewFound Gold's Queensway Project

Geologically Akin to Major Global Gold Deposits

- Similar age of mineralisation, geology and pathfinder elements to Bendigo, Fosterville

Large Land Position

- Over 270 square kilometres on vastly underexplored, remote area

Unique Geologic Setting

- Orientation completely different to all other major geological structures in Newfoundland

Limited exploration to-date has yielded significant results that support Hermitage's big potential

Multi-gram Gold Discovered Through Prospecting

- 7.31 g/t, 2.15 g/t, 2.10 g/t (all outcrops) with significant pathfinders⁽¹⁾

Scale of Opportunity is Considerable

- Over 17 samples > 100 ppb Au over seven kilometres from 2022 discoveries⁽¹⁾

Pathfinders Akin to Bendigo/Fosterville

- Results indicate arsenic-gold and antimony-gold associations

Significant Hydrothermal Activity

- Discovered series of large outcropping quartz veins and vein arrays in multiple locations⁽¹⁾

1. See ASX announcements dated 5 September 2024, 12 November 2023, 13 September 2023, 17 May 2023

Hermitage 2024 Exploration Program

Advancing high-priority, highly prospective targets for future drilling

High-Value Geophysics

- Higher resolution airborne magnetics planned to better define geological structures and features

Comprehensive Geological Mapping & Prospecting

- To better understand the geology for more effective targeting

Identify Specific RC Drill Targets

- Planning for a winter RC drill program

1. See ASX announcements dated 5 September 2024, 4 July 2024, 2 November 2023, 13 September 2023, 17 May 2023

Other Projects

Bunker Hill And Intersection

Early-stage, high-value exploration planned on vastly underexplored yet highly prospective projects

Significant Historical Samples at Bunker Hill⁽¹⁾

- Gold: 18.7 g/t, 17.1 g/t
- Silver: 407.5 g/t, 35.3 g/t
- Copper: up to 57%

High-Resolution Airborne Magnetic Survey

- Covering Bunker Hill Project, which currently has no magnetics

Intersection is Site of Two Major Structures

- Convergence of Cape Ray Shear and Hermitage Flexure

Prospecting and Geochemical Works Planned

- At both Intersection and Bunker Hill to support historic anomalous results

1. Bunker Hill: See ASX announcements dated 6 April 2023, 22 March 2023 and 14 April 2021
2. Intersection: See ASX announcements 16 January 2024 and 29 October 2020

Blue Cove Copper Project

Low-cost exposure to early-stage copper ± lead, zinc and silver exploration project

Significant Strike Length

- Approximately 48 km² of claims covering 25 km of continuous strike

Five Primary Target Areas Identified

- Each with several high-grade copper samples and multi-element soil geochemical anomalies

High-Grade Copper and Silver

- Dozens of high-grade samples grading up to 10.6% copper and 91.6 g/t silver

Future 2024 Program Planned

- Low-cost, early-stage exploration activities planned for later in the year

1. See ASX announcement dated 1 May 2024

Best-in-class Exploration

Prospecting, Mapping & Sampling

First pass exploration work to identified key areas of interest

Geophysics And Geochemistry

Understanding geological structures and discovery of anomalous gold

Bottom-of-Hole / Basal Till Sampling

Lower cost RC drilling to source gold in basement, vector in on diamond drilling

Diamond Drilling And Geological Modelling

Drilling advanced targets with aim of major discovery

Resource Building And Definition

Extensional and infill drilling to advance to design and permitting

Highly Experienced Board & Management

Seasoned Mining & Exploration Experience With Proven Track Record Of Success

A Portfolio of Potential

Cape Ray

Large geochemical and geophysical targets remain untested by drilling in the direct Brownfields environment

Down-plunge, along strike and footwall resource extension opportunities

Untested Windsor Point Group

Untested indications of subsurface plutons/intrusions

Increased understanding of the kinematics and timing of gold mineralisation – advantage previous explorers haven't had

Large structures in footwall (Cape Ray Igneous Complex) and Hanging wall untested

Intersection

Intersection of two major structural features

Major bend in the CRSZ back to the NE-SW orientation

Underexplored

Complex geology and structural history requiring more pragmatic modern day exploration work

Untested WPG

Underexplored

Long Range

Untested Windsor Point Group throughout strike

Complex structural geometries

Historic and AuMega anomalous geochemistry / prospecting results

Bedrock gold mineralisation confirmed: prospecting and drilling (pending)

Lack of systematic modern exploration conducted for large portion of target

Malachite

Complex structural geometries: situated on first major bend in the CRSZ

Large brittle structures splaying off the CRSZ

World-class analogies to this Malachite's structural geometries such as Salobo and Obuasi

Variable host lithologies

Increased understanding of the kinematics and timing of gold mineralisation – advantage previous explorers haven't had

Various large untested geochemical and geophysical anomalies

Drilling has identified anomalous bedrock gold and large zones of hydrothermal fluid flow/alteration

Isle Aux Morts

Untested IAM deposit analogies

Untested Windsor Point Group

Open mineralisation from previous drill campaigns (Stag Hill)

Anomalous geochemistry in key structural positions

Increased understanding of the kinematics and timing of gold mineralisation – advantage previous explorers haven't had

Bunker Hill

Structural anomaly to the NE-SW trending CRSZ: target is in the east-west portion

Variable lithologies: Untested intra-shear granites same age as WGH. Evidence of episodic bimodal igneous activity.

Sedimentary package: potential late basin extensional structural regime

Favourable marker horizons and exploration targets in global goldfields (Yilgarn terrain) – theoretical attribute

Large geochemical anomalies rich in base and precious metals

Analogous age and structural setting to Lachlan Fold Belt (NSW, Aus) which hosts large gold-copper deposits (theoretical attribute)

Grandy's

Complex structural geometries: commencement of the first major bend in the CRSZ

World-class analogies to Grandy's structural geometries such as Salobo and Obuasi – large CRSZ parallel footwall brittle structures and splays

Variable host lithologies

Increased understanding of the kinematics and timing of gold mineralisation – advantage previous explorers haven't had

Various large untested geochemical and geophysical anomalies

Drilling (assays pending) visually show large zones of hydrothermal fluid flow/alteration

Hermitage

Confirmed bedrock mineralisation over large areas

Great host lithologies. Analogous to global world-class deposits such as Fosterville, Bendigo

Structural anomaly: NWN-ESE orientated Hermitage Flexure / Bay d'Espoir Shear Zone – anomalous to the islands general NE-SW trend: potential dilatant anomaly

Hydrothermal systems identified. Vast swarms of veining and alteration

True Greenfields potential
