Building parts bigger, faster, stronger, and greener

AML3D Limited (ASX:AL3)
Investor Presentation
November 2024

Legal Disclaimer

This document (“Presentation”) has been prepared by AML3D Limited (“AML3D” or “the Company”). You should read this disclaimer carefully before reading or making any other use of this Presentation or any information contained in this Presentation. This Presentation is intended solely for use by the party to whom AML3D provides the Presentation. By accepting this Presentation, you represent and warrant that you are a sophisticated or professional investor pursuant to section 708 of the Corporations Act (Cth) (“Corporations Act”) and are entitled to receive this Presentation in accordance with the restrictions, and agree to be bound by the limitations, contained within it.

This Presentation does not constitute an offer, invitation, solicitation or recommendation with respect to the subscription, purchase or sale of any security in the Company, nor does it constitute financial product advice. The information contained in this Presentation is of a general nature for information purposes only and does not purport to be complete or comprise all of the information which a prospective investor may require in evaluating a possible investment in the Company. Before making an investment decision, you should make your own enquiries and investigations, and consider whether it is a suitable investment for you in light of your own investment objectives, financial situation and particular needs, having regard to the merits or risks involved. This Presentation does not constitute a prospectus, product disclosure statement or other disclosure document under Australian law (including for the purpose of the Corporations Act) or under any other law.

This Presentation has not been filed, registered or approved by regulatory authorities, including the Australian Securities and Investment Commission, in any jurisdiction. The distribution of this Presentation (including an electronic copy) outside Australia may be restricted by law. If you come into possession of this Presentation, you should observe such restrictions and seek your own advice on such restrictions. Any non-compliance with these restrictions may contravene applicable securities laws. This Presentation and the information contained within it is strictly confidential and is intended for the exclusive use and benefit of the recipient. Distribution of the Presentation to any person other than the recipient and those persons retained to advise the recipient, who agree to maintain the confidentiality of this material and be bound by the limitations outlined herein, is unauthorised. The Presentation may not be copied, reproduced, disseminated, quoted or referred to, in whole or in part, for any purpose, without the express written consent of the Company. By receiving this Presentation, you agree to keep the information confidential, not to disclose any of the information contained in this Presentation to any other person and not to copy, use, publish, record or reproduce the information in this Presentation without the prior written consent of the Company, which may be withheld in its absolute discretion.

While reasonable care has been taken in relation to the preparation of this Presentation, none of the Company and its related entities, its advisors or their respective members, directors, officers, employees, contractors, agents, advisers or representatives nor any other person (“Limited Party”) guarantees or makes any representations or warranties, express or implied, as to or takes responsibility for, the accuracy, reliability, completeness or fairness of the information, opinions, forecasts, reports, estimates and conclusions contained in this Presentation. No Limited Party represents or warrants that this Presentation is complete or that it contains all information about the Company that a prospective investor may require in evaluating a possible investment in the Company. To the maximum extent permitted by law, each Limited Party expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence or otherwise, for any loss howsoever arising from the use of or reliance on information contained in this Presentation including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions, forecasts, reports or other matters, express or implied, contained in, arising out of or derived from, or for omissions from or errors in, this Presentation including, without limitation, any financial information, any estimates or projections and any other financial information derived therefrom.

Certain statements in this Presentation constitute forward looking statements and comments about future events. The Company has not carried out an audit or verified any of the information contained herein. Any projections and forecasts contained in this Presentation, including the Company's expectations about the performance of its businesses, involve significant elements of subjective judgement and analysis which may or may not be accurate. Such forward looking statements involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company and which may cause actual results, performance or achievements to differ materially from those expressed or implied by such statements. Actual future events may vary materially from the forward looking information on which those statements are based, and although the Company has attempted to take into account important factors that could cause actual costs, performance or results to differ materially, there may be other factors that cause costs or performance of the Company’s activities or results not to be as anticipated, estimated or intended. Forward looking statements are provided as a general guide only, and should not be relied on as an indication or guarantee of future performance. Given these uncertainties, you are cautioned to not place undue reliance on any forward looking statement. Subject to any continuing obligations under applicable law, the Company disclaims any obligation or undertaking to disseminate any updates or revisions to any forward looking statements in this Presentation to reflect any change in expectations in relation to any forward looking statements or any change in events, conditions or circumstances on which any such statement is based whether as a result of new information, future events or otherwise. Past performance is not indicative of future performance and no guarantee of future returns is implied or given. Nothing contained in this Presentation nor any information made available to you is, or shall be relied upon as, a promise, representation, warranty or guarantee as to the past, present or the future performance of the Company. No Limited Party or any other person makes any representation, or gives any assurance or guarantee that the events expressed or implied in any forward looking statements in this Presentation will occur.

All dollar values are in Australian dollars, unless otherwise stated.

This Presentation does not constitute an offer to sell, or the solicitation of an offer to buy, any securities in the United States. This Presentation may not be distributed or released in the United States. Securities in the Company have not been, nor will be, registered under the U.S. Securities Act of 1933, as amended ("U.S. Securities Act") or the securities laws of any state or other jurisdiction of the United States. Accordingly, the securities in the Company may not be offered or sold, directly or indirectly to, persons in the United States or persons who are acting for the account or benefit of a person in the United States unless they have been registered under the U.S. Securities Act (which the Company has no obligation to do so or procure) or in a transaction exempt from, or not subject to, the registration requirements of the U.S. Securities Act and any other applicable U.S. state securities laws.

Our Team

Noel Cornish AM
Chairman, Non-Executive Director
B.Sc, M.Eng.Sc., FAICD FUOW

AML3D as a Non-executive Director and Chairman in October 2022. His former roles include Chief Executive of BlueScope Limited's Australian and New Zealand steel manufacturing businesses, Deputy Chancellor University of Wollongong, President Northstar BHP LLC in Ohio USA, Chairman of Snowy Hydro Limited and IMB Bank, as well as past National President Ai Group. Noel is currently Chairman of the Hunter Valley Coal Chain and a member of the University of Newcastle Council. Noel was appointed a Member of the Order of Australia in 2017 for his business leadership and community service. The Board considers that Mr Cornish is an independent director.

Sean Ebert
Managing Director
BEng Hons(Electrical), GAICD, MBA

Sean has 25 years of executive and board-level experience across public and commercial sectors, with particular expertise within the engineering sectors of oil and gas, mining and resources and emerging technologies in Australia, the Middle East, South America, the US and Europe.

Non-executive director of MLEI Consulting Engineers Pty Ltd and Apxium Technologies Pty Ltd, Deputy Chairman of FCT International Pty Ltd and Chairman of Tony's Wholesale Flowers Pty Ltd.

Previously the CEO of Beston Pacific Asset Management, Global Director of M&A of WorleyParsons, CEO of Camms Pty Ltd and CEO of Camms Profit Impact Pty Ltd.

Andy Sales
Executive Director, CTO
MEng, MSc, CEng, CMatP

Founding director of AML3D in 2014. Has been an Executive Director since 2019 and held the CEO position between 2019 to late 2022.

Renowned welding technology expert with over 30 years of global experience (Australia, Europe, South America, Africa and Asia).

Held a variety of roles across upper management and senior leadership within the oil and gas, resources, and mining sectors including advanced manufacturing, heavy engineering and fabrication sectors.

Chartered Engineer with a Master of Engineering and Master of Science, as well as Diploma in Quality Management and Auditing. Sits on two Standards Australia committees, including the position of co-Chairperson on the committee for Additive Manufacturing.

Peter Siebels
Non-Executive Director

Following a thirty-year career with KPMG including roles on the Australian National Board and National Executive Committee, Peter has pursued a career in Governance and Advisory, since 2015.

Governance positions include Chair roles with the RAA, RAA Insurance, Electricity Industry Superannuation Scheme, Hood Sweeney, Robern Menz and also a non-executive director role with ECH, GCF Investments Pty Ltd.

Peter has Chaired many Board Committees, including Investment, Finance and Audit, Governance and Nominations and Risk.

Kaitlin Smith
Company Secretary
B.Com (Acc), CA, FGIA

Kaitlin has more than 15 years of professional experience as Company Secretary of several ASX listed companies in a variety of industries.

Appointed to the position of Company Secretary at AML3D on 30 November 2022.

Chartered Accountant, a fellow member of the Governance Institute of Australia.

AML3D Snapshot

AML3D is a **welding, metallurgical science, robotics, and software business** which uses automated wire fed 3D printing in a large free-form environment to produce metal components and structures for commercial use.

Its ARCEMY® systems are the **largest free-form, turn-key, metal 3D printer** packaged to provide an all-in-one digital advanced manufacturing solution.

Using **patented Wire Additive Manufacturing technology (WAM®),** ARCEMY® builds certifiable parts harder, better, faster and stronger than traditional casting or forging with a lower carbon footprint.

AML3D's technology allows 3D printing of **complex industrial parts for the defence, oil & gas and aerospace industries** where highly specific machine parts are often urgently needed, but not readily available.

The AML3D ARCEMY® systems can be **installed and used onsite** to 3D print required parts near where they are needed based on a 3D computer model using various metals, steel or alloys.

What is WAM®?

WAM® uses an electric arc to deposit layers of wire feedstock to produce high performing, industrial scale, metal components.

- Combines sophisticated robotics technology and cutting-edge arc welding science and metallurgy.
- WAM printed industrial scale metal components are created to near net shape which is then machine finished.
- Uses AML3D's proprietary software and materials database to manage the layer-by-layer deposition process.

AML3D Business Model

Sale of systems

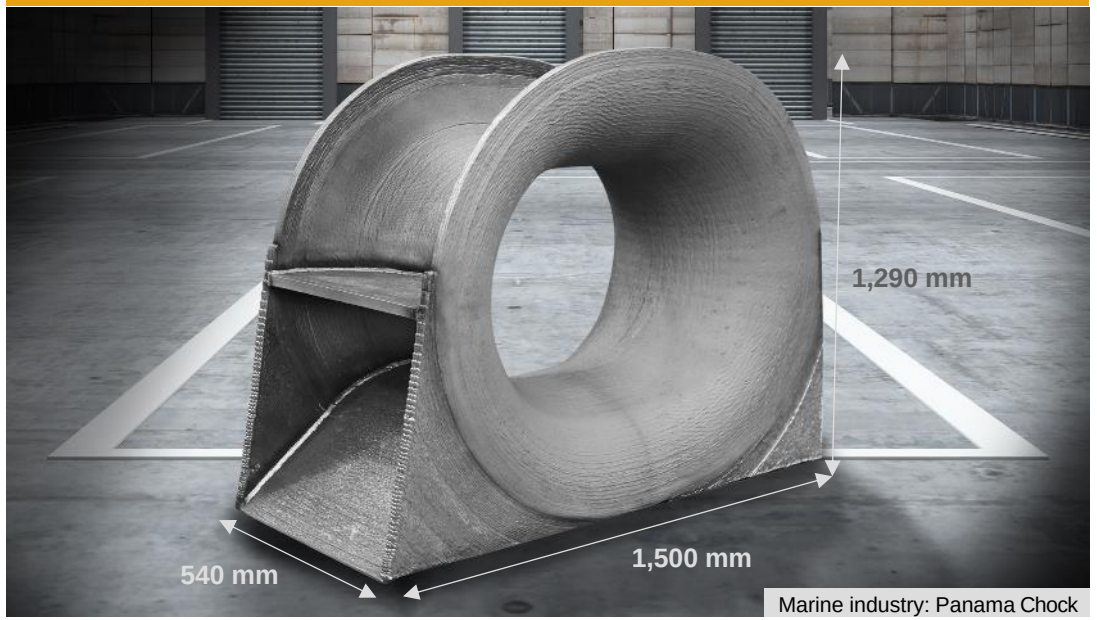
ARCEMY® WAM® System

On-demand 3D Metal Printing ARCEMY® Systems

Using patented WAM® technology, ARCEMY® enables AML3D's customers to metal 3D print parts on demand and close to point of need.

Customers: Manufacturers e.g. Austal, US Department of Defense, Cogitic Corporation, Century Engineering, Blue Forge Alliance and Laser Welding Solutions.

Sale of parts



Marine industry: Panama Chock

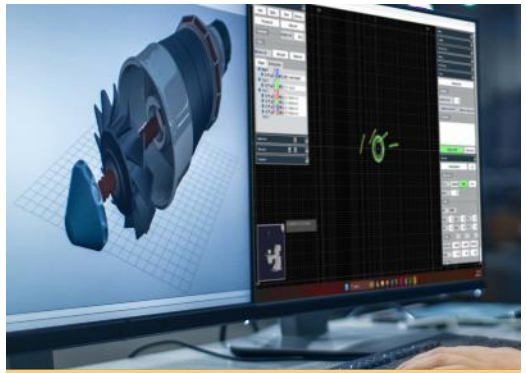
Industrial Scale 3D Metal Printing

The path to sale of an ARCEMY® involves manufacture of 'Proof of Concept Parts', prototype parts or short manufacturing runs, focusing on placing AML3D's technology into key industry supply chains.

Customers: End users e.g. US Department of Defense (Navy), Australian Government (Aerospace and Navy), Boeing, BAE Systems and Chevron.

AML3D Technology Stack

Software



WAMSoft®

WAMsoft® is the AML3D slicer and path planning tool, turning a CAD model into a printable file, WAMSoft® is the first software package used in AML3D's WAM® workflow.

Users load the CAD model and use WAMSoft® to generate a layer-by-layer path plan that the ARCEMY® welding torch will follow.

AMLSoft™

AMLSoft™ is the operating system of an ARCEMY cell. AMLSoft™ contains all functionality that allows ARCEMY operators to load a WAMSoft® generated path plan and manufacture metal parts successfully.

AMLSoft™ provides real-time feedback and displays all measurable parameters during print process.

AMLRapid™

AMLRapid™ is the connector between AMLSoft™ and the ARCEMY® Wire Additive Manufacturing system, responding to specific AMLSoft™ commands to run the robot, welder, lights, and all other peripherals.

Hardware

ARCEMY®

AML3D's ARCEMY® systems are the largest open-air, turn-key, metal 3D printer packaged to provide an all-in-one digital advanced manufacturing solution. Using Wire Additive Manufacturing technology (WAM®), ARCEMY® builds larger, stronger parts with shorter lead times that can be certified and manufactured with a lower carbon footprint compared to traditional off-the-shelf methods.

AML3D System Sale Revenue Model

Capital Sale

- Sale of complete turnkey ARCEMY® Wire Additive Manufacturing System.
- Includes system installation on site, commissioning and training of production and operations staff.

Licensing Fees

- Complete set of qualified welding parameters.
- Major software release upgrades for improved deposition rates, print quality and print envelope.
- Minor Software release updates for user interface and security upgrades.

Maintenance

- Full inspection of Robotic Hardware and changeover of oil and consumables.
- Full inspection of welding system hardware including warranty extension.
- Control System and peripheral hardware maintenance.

Production Support

- Parts production consulting to convert traditional to additive parts.
- Operator Support to plant operators for the efficient production of parts in field.
- Software technical support for bug fixes, general system queries.

Capital sale | **Recurring sales**

ARCEMY® Range

ARCEMY® Education

An entry-level Wire-arc Additive Manufacturing system typically used for R&D and university student curriculum purposes. Featuring the smallest footprint of the ARCEMY® series.

System Footprint
4.8 m w x 4.8 m l x 2.0 m h

Reach
1.5 m

Max. Build Envelope
0.9 m x 0.9 m

Weight Capacity
≤ 500 kg

Axis
8 (with positioner)

ARCEMY® Small

ARCEMY® Small Edition features the smallest footprint of the commercial ARCEMY®'s. This entry-level WAM® solution is perfect for parts up to 750 kg in weight.

System Footprint
4.8 m w x 4.8 m l x 2.0 m h

Reach
2.0 m

Max. Build Envelope
1.2 m x 1.2 m

Weight Capacity
≤ 750 kg

Axis
8 (with positioner)

ARCEMY® Enterprise

For the creation of larger parts, ARCEMY® Enterprise Edition introduces an ABB 4600 robot featuring an increased reach of 2.5 m that is combined with a 750 kg positioner.

System Footprint
6.0 m w x 7.2 m l x 2.0 m h

Reach
2.5 m

Max. Build Envelope
1.5 m x 1.5 m

Weight Capacity
≤ 750 kg

Axis
8 (with positioner)

ARCEMY® X

For manufacturing industrial parts that are extra in size and extra in nature, few can pass the ARCEMY® X. The most significant footprint of the fleet with an impressive 3.2 m reach.

System Footprint
6.9 m w x 6.9 m l x 3.0 m h

Reach
3.2 m

Max. Build Envelope
1.8 m x 1.8 m

Weight Capacity
≤ 750 kg

Axis
8 (with positioner)

ARCEMY® Wire Additive Manufacturing systems are customised to customer requirements

ARCEMY® Benefits vs Traditional Methods

Better Loading

Can test up to **2 times higher**[2] than designed working load compared to traditional methods.

More Resistant

Up to **50% more resistant**[4] to metal fatigue for Nickel Aluminium Bronze WAM® products.

Less Waste

Has the potential to produce up to **95% in material waste savings**[6] compared to billet machining.

Stronger

Produces material properties up to **30% stronger**[3] than seen in traditionally cast or forged parts.

Faster

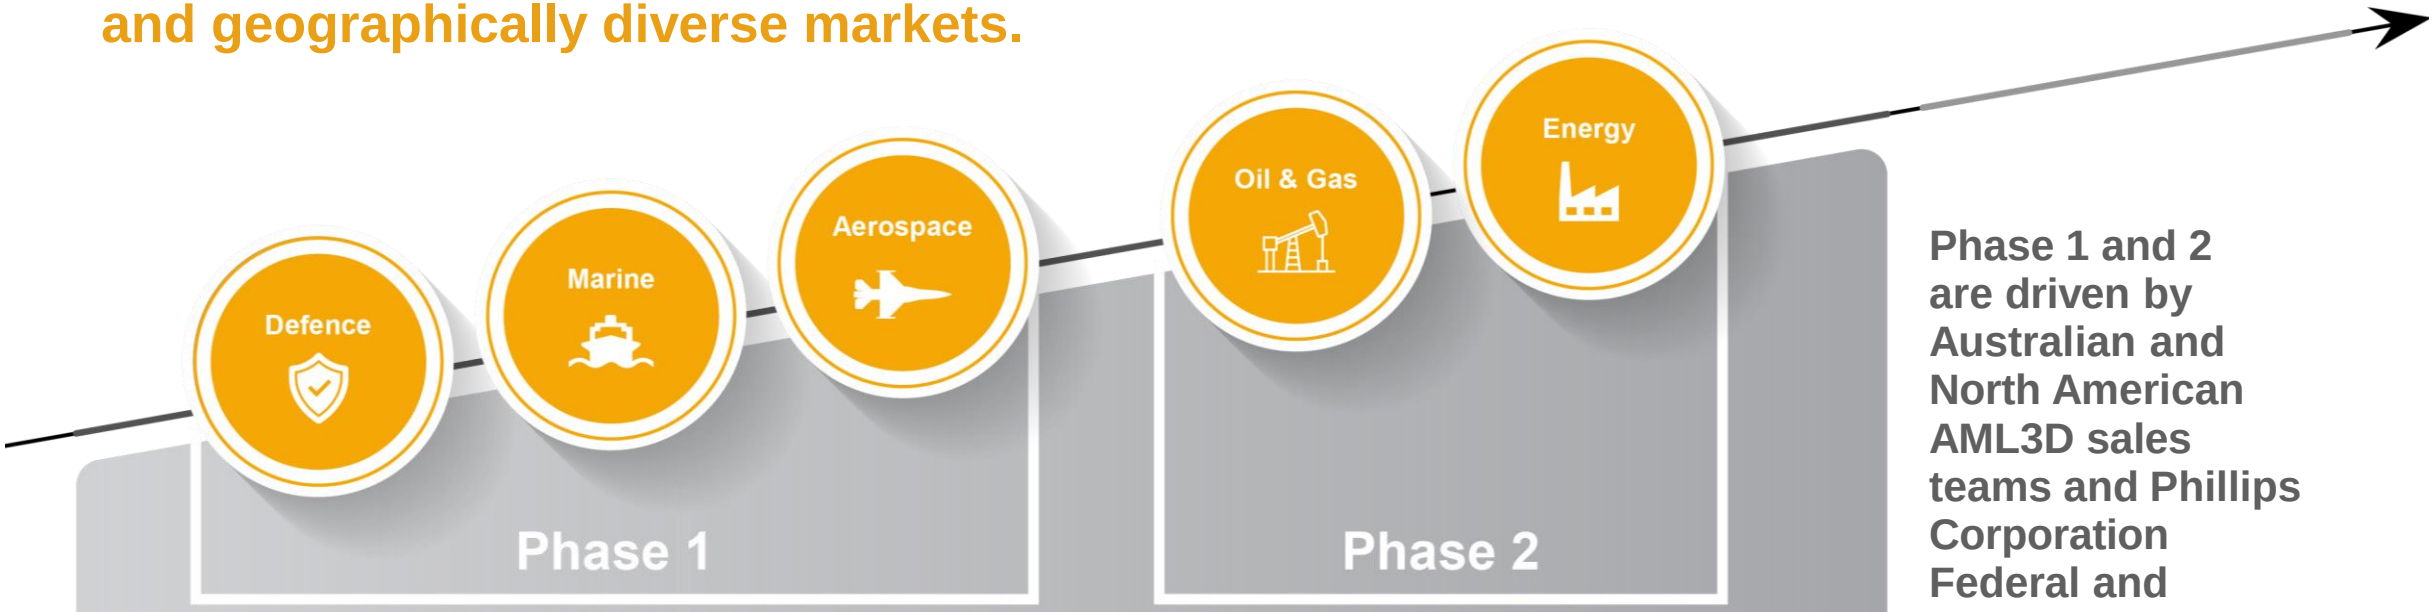
Can be manufactured up to **75% faster**[5] than forging or casting without tooling investments.

Near to source, on-demand production of parts that can be certified[1] reduces the need for maintaining large inventories and reduces Scope 3 Emissions for Aerospace, Defence, Energy, Maritime, and Oil & Gas industries.

1 Certified through Lloyd's Register, DNV, with ISO9001:2015 QMS, AWS D.20.1 2 Learn more: https://bit.ly/3ElEaiK 3 Learn more: https://bit.ly/3jiOAVn 4 AML3D internal study. 5 Learn more: https://bit.ly/3Gyhqw0 6 Learn more: https://bit.ly/3YOPCgZ

Broad Addressable Markets with Strong Demand

AML3D address multiple sophisticated and geographically diverse markets.



- Build new, progress and continue to develop existing relationships across Asia Pacific and North American regions.
- Progress negotiations and proof of concept prototypes to evolve ARCEMY® sales.

- Deliver ARCEMY® metal 3D printing systems globally, including software licensing, support and training.

Phase 1 and 2 are driven by Australian and North American AML3D sales teams and Phillips Corporation Federal and Commercial Sales divisions.

Parts Manufacture

Wire Feedstock Assessment

Print Proof of Concept Part

ARCEMY® System Sale

Demonstrates performance of WAM® technology and assists in facilitating small production runs.

- Proof of Concept part manufacture is critical to demonstrating WAM® and ARCEMY® fit-for-purpose.
- Presence of AML3D-owned ARCEMY® units in Australia and USA are a critical element in demonstrating ability to produce products to customer specifications.

Image: Proof of Concept part for ToolCraft and DSTG.

Investment Proposition

New sales strategy

- Moved from being a “seller of 3D printed parts” to a “seller of 3D printing system and parts” strategy. This new strategy means bigger contracts for AL3 and gives customers what they want because the parts are made closer to where they are needed.
- For new orders of the ARCEMY® system, AL3 will now build in ARCEMY® services to include software and services fees on a recurring revenue basis. This includes software licensing fees, hardware maintenance, and tech support. This is an untapped stream of revenue for AL3 and a potential source of upside for the company as it grows.

Blue Chip Clients

AML3D Performance Aspirations

Success in delivery will strengthen partnerships and improve software development cycles

- Successful installation of US Department of Defense ARCEMY® systems into Oakridge National Laboratory (ORNL) and Danville Centre of Excellence (CoE) facilities.
- Continue to expand into US Defense, Aerospace and Oil & Gas via existing US based customers.
- Leverage sales and distribution relationship with Phillips Corp across the US region:
  - Increase ARCEMY® sales into US Defense manufacturing supply chain.
  - Supply into Phase 2 market sectors of Energy, and Oil and Gas.
- Establish US operating base with local leadership, business development, system construction and Proof of Concept production.
- Advance next release of WAMSoft® and AMLSoft™ platforms to include increased deposition rate and dual robot printing.

AML3D Certifications

AL3 is “one of only two wire-arc additive manufacturing companies that can globally, manufacture certified flight and non-flight components for the aviation, space and defence industries.”

In 2022, AML3D was the first Wire Additive Manufacturer to receive Approval of Manufacturer for shipbuilding.

AML3D became the world’s first Lloyd’s Register certified Wire Additive Manufacturing facility in 2018.

Achieved ISO AS 9100D design and manufacture standard aerospace certification in 2024.

Achieved ISO 9001:2015 Quality Management System certification in 2018.

Compliant with AWS specification for fabrication of metal components using additive manufacturing.

AML3D is an ABB Robotics Value Provider

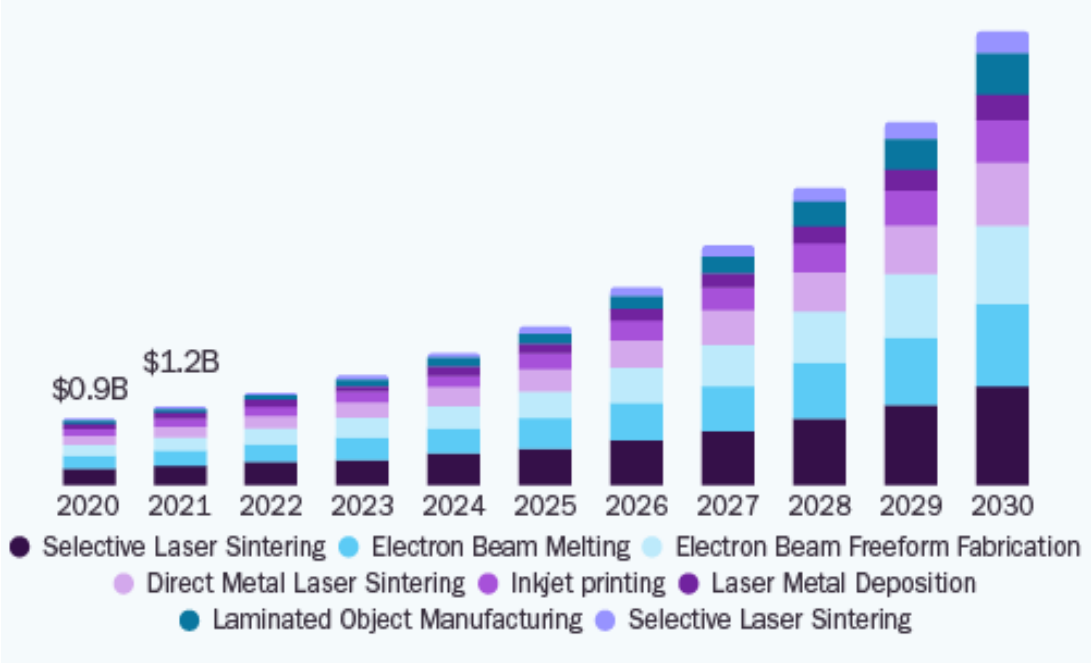
ARCEMY® printers commissioned on customer sites can be Lloyd’s Register certified, ensuring products manufactured meet global standards.

Unlock US Market – US Sales Team

Direct Sales-Led Entry

- Establish a US sales team comprised of a US sales manager, a technical sales consultant and technical support position.
- Identify distributors and value-added resellers and establish a channel sales model for the ARCEMY® product line.
- Market valued at US$2.6B in 2023 and projected to expand at a Compound Annual Growth Rate (CAGR) of 20.4% to 2030[1].

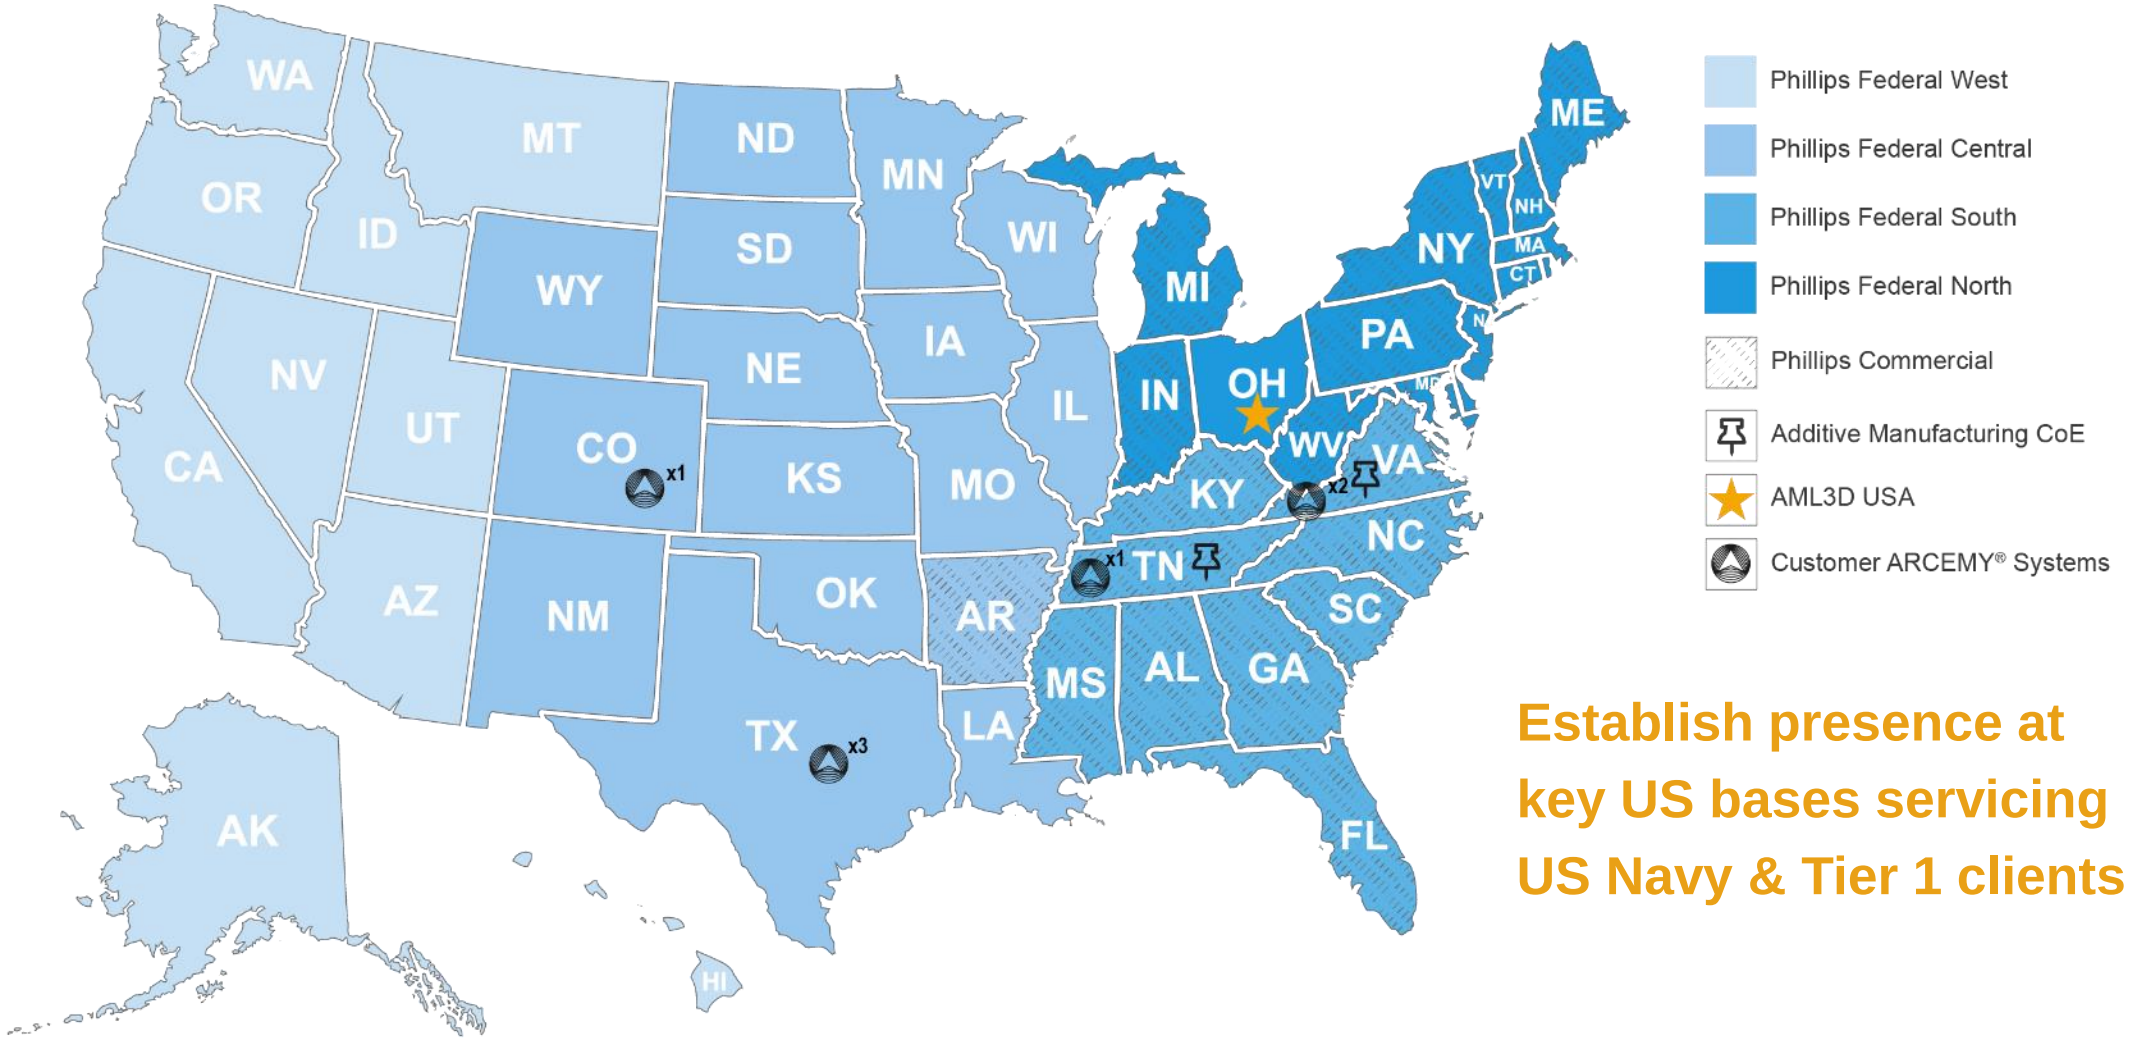
North American Metal 3D Printing Market[1]



AML3D's WAM® technology positioned to access the massive & high growth US market

1) Source: Grandview Research, Metal 3D Printing Market Size, Share & Trends Analysis Report By Component (Hardware, Software, Services), By Technology, By Software, By Application, By Vertical, By Region, And Segment Forecasts, 2022 – 2030 (https://www.grandviewresearch.com/industry-analysis/metal-3d-printing-market)

Unlock US Market – Strategic US Deployments

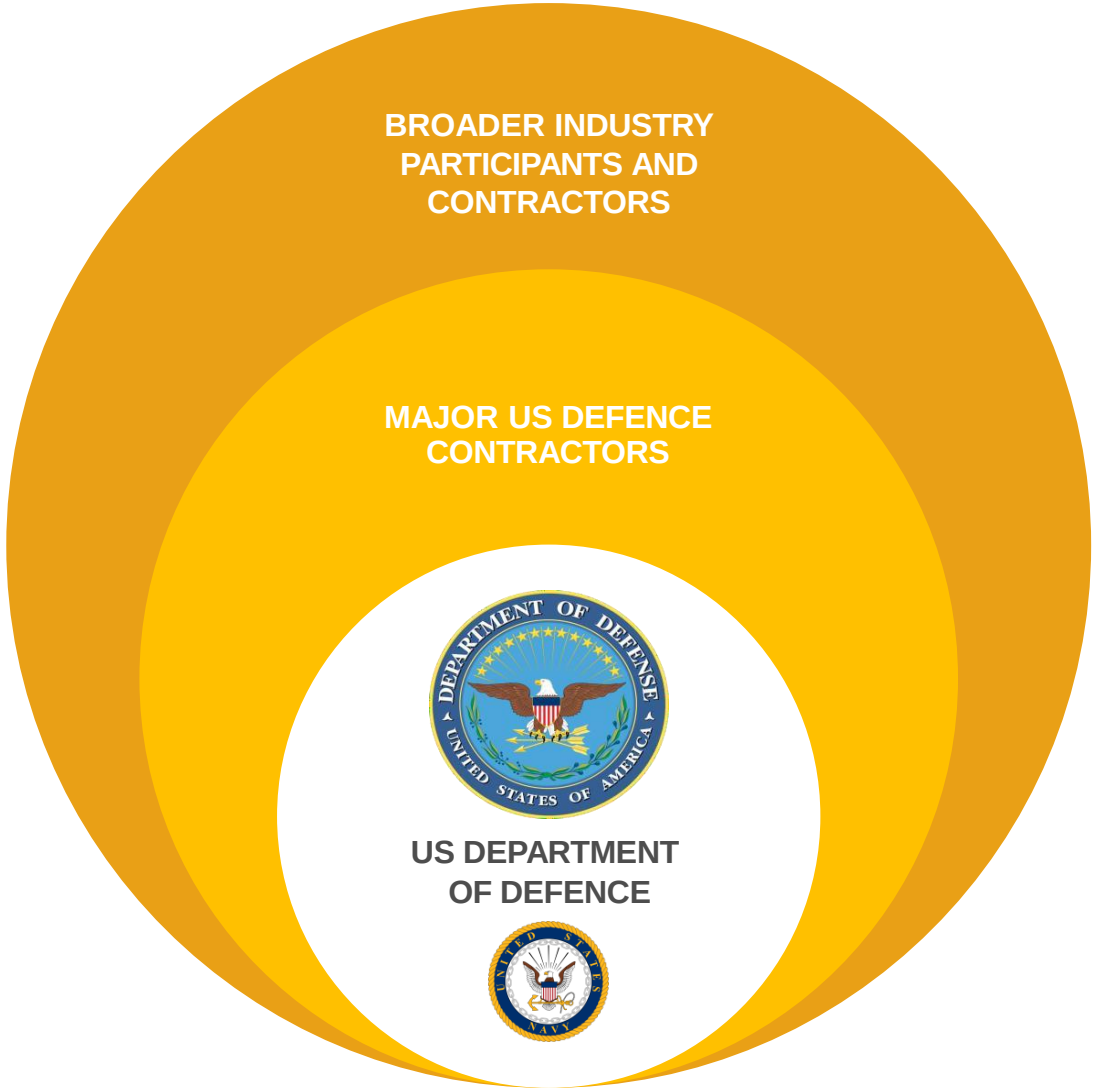


Establish presence at key US bases servicing US Navy & Tier 1 clients

Focus on Expanding Customer Network in 2025

US Department of Defense (US Navy) orders brought a spotlight to our technology.

- Immediate focus on converting this opportunity into further commercial orders in defence supply chain.
- Department of Defence sits at the middle of the US military-industrial complex with Tier 1 credibility boost presenting many options for AML3D.
- USA-based Defence Contractors are a priority target with an expectation that AML3D can break into this market with ARCEMY® machine sales.
- New alliances in USA with Tier-1 groups set to drive far improved distribution and sales networks.



CY23 and CY24 YTD contract wins

Customer	Date	Product	Value ($Am)
ARCEMY® sales			
Century Engineering	Jul-24	Upgrading to an ARCEMY® printing system	~$0.3

Net assets	**10.0**	**6.9**	**44%**

Commentary

- Revenue for the FY24 year was A$7.32m (+1,055% YoY) and comprised of:
  - A$4.4m (61%) from ARCEMY system sales in the US
  - A$2.7m (36%) from component manufacturing, alloy characterization and testing contracts; and
  - ~A$0.2m (3%) from recurring license and lease fees
- Rollover of $7.4m into FY25 year
- The higher overhead expenses in FY24 compared to FY23 are largely attributable to the investment in the US scale-up strategy and software development
- Increased cash from A$4.5m in FY23 to A$7.8m in FY24 (+72% YoY)
- Net cash position of A$7.6m as at 30 June 2024
- Borrowings relate to insurance premium funding

Customer Testimonials

Toolcraft looks to partner with AML3D whenever there is scope for their process – when manufacturing parts larger than commonly available materials or when sourcing exotic metals is cost prohibitive.

Greg Stevens
Toolcraft, General Manager Business

Wire Arc Additive Manufacturing, or WAAM, has the potential to enable a productivity step change in shipbuilding, able to 3D print marine grade metal structures at a scale well beyond other commercially available metal 3D printing technologies.

Andrew Malcolm
Austal, Chief Digital Officer

Customer Testimonials

Our experience with ARCEMY has been overwhelmingly positive. We have been able to print a part in a 10th of the time that it took to print it on another system we have. The system's ease of use and clever handling of the limitations inherent to the DED process has greatly enhanced our operations.

Daniel Pulscher
Phillips Federal, Senior DED Engineer

The ARCEMY system offers a comprehensive range of capabilities including automated part levelling and various torch weave patterns. Its integration with WAMSoft has streamlined the process, representing a significant advancement in Additive Manufacturing technology.

Matt Eckhart
Laser Welding Solutions, AM Engineer
