ALVO MINERALS

Active Brazilian
Critical Minerals Explorer

October 2024

Disclaimer

This presentation: This presentation has been prepared to provide general information and does not contain all information about Alvo Minerals Limited (ACN 637 802 496) (Alvo or the Company), its assets and liabilities, financial position and performance, profits and losses or prospects. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation.

Not an offer: Nothing in this presentation should be construed as either an invitation, offer to sell or a solicitation of an offer to buy or sell Alvo securities in any jurisdiction or be treated or relied upon as a recommendation or advice by Alvo.

No liability: To the maximum extent permitted by law, neither Alvo, its related bodies corporate or any of their respective officers, directors, employees, agents and advisers (Related Parties), nor any other persons, accepts any responsibility or liability for, and makes no recommendation, representation or warranty concerning, the content of this presentation. The Company and Related Parties shall not be liable whatsoever (including in respect to negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any omission. Any opinions or views expressed in this presentation are subject to change without notice.

International offer restrictions: This presentation is not, and does not constitute, or form any part of, an offer to sell or the solicitation, invitation or recommendation to purchase any securities in the United States and neither this presentation nor anything contained herein shall form the basis of any contract or commitment. This presentation may not be distributed or released in the United States. Securities may not be offered or sold in the United States unless such securities are registered under the U.S. Securities Act of 1933, as amended (U.S. Securities Act) or in a transaction exempt from, or not subject to, the registration requirements of the U.S. Securities Act and any other applicable securities laws.

Not financial product advice: Reliance should not be placed on the information or opinions contained in this presentation. This presentation is for information purposes only and is not a financial product or investment advice or a recommendation to acquire Alvo securities and does not take into consideration the investment objectives, financial situation or particular needs of any particular investor. You should make your own assessment of an investment in Alvo and should not rely on this presentation. In all cases, you should conduct your own research of the Company and analysis of the financial condition, assets and liabilities, financial position and performance, profits and losses, prospects and business affairs of Alvo and its business, and the contents of this presentation. You should seek legal, financial, tax and other advice appropriate to your jurisdiction.

Forward Looking Statements: Various statements in this presentation constitute statements relating to intentions, future acts and events which are generally classified as “forward looking statements”. These forward looking statements are not guarantees or predictions of future performance and involve known and unknown risks, uncertainties and other important factors (many of which are beyond the Company’s control) that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed in this presentation. These risks, uncertainties and assumptions include commodity prices, currency fluctuations, economic and financial market conditions in various countries and regions, environmental risks and legislative, fiscal or regulatory developments, political risks, project delay or advancement, approvals and cost estimates. Words such as “anticipates”, “expects”, “intends”, “plans”, “believes”, “seeks”, “estimates”, “potential” and similar expressions are intended to identify forward-looking statements. Any forward-looking statements made in this presentation relate only to events as of the date on which the statements are made. Alvo does not undertake any obligation to publicly update or review any forward-looking statements, whether as a result of new information or future events. Past performance information given in this presentation is given for illustrative purposes only and should not be relied upon as an indication of (and gives no guidance as to) future performance.

Reliance on third party information: The views expressed in this presentation contain information that has been derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. This presentation should not be relied upon as a recommendation or forecast by Alvo.

**The NSR (Net Smelter Return) and Cu/ZnEq values are reported based on copper, zinc, silver, lead and gold prices of US$8,914/t Copper, US$3,017/t Zinc, US$2,173/t Lead, US$23.3/oz Silver, and US$1,891/oz gold (price deck based 3-year average Metals Prices). Recovery factor for C3: Cu; 95%, Zn; 86%, Pb; 77%, Ag 74% & Au 70%. Recovery for C1 and C4: Cu; 93%, Zn; 90%, Pb; 86%, Ag 96% & Au 85%. The NSR calculation is as follows: NSR (US$/t) = [Cu %] * {Price Cu] * [RecCu %] +[Zn %] * {Price Zn] * [RecZn] + [Pb %] * {Price Pb] * [RecPb] + [Ag ppm] * {Price Ag] * [RecAg]/31.1035+ [Au ppm] * {Price Au] * [RecAu]]/31.1035 (Adjustments are necessary to normalized to US$/t basis).

***The CuEq calculation is as follow: Cu+(Cu*((Zn % * RecZn*Price Zn) + (Pb % * Price Pb * RecPb) + (Ag ppm * Price Ag * RecAg) + (Au ppm * Price Au * RecAu)) / (Cu % * Price Cu * RecCu). ZnEq is calculated with the same formula as CuEq, swapping Cu and Zn.

Competent Person's Statement

Palma Cu-Zn Project Mineral Resource Estimate: The information contained in this announcement that relates to information attributed to or compiled from the 'Mineral Resource Estimate' is based upon information compiled by Mr Marcelo Batelochi, a Competent Person and Member of the Australasian Institute of Mining and Metallurgy. Mr Batelochi is a full-time employee of MB Consultaria and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the "Australasian Code for Reporting of Mineral Resources and Ore Reserves" (or JORC 2012). Mr Batelochi consents to the inclusion in this announcement of the matters based upon the information in the form and context in which it appears.

The information contained in this announcement that relates to recent exploration results is based upon information compiled by Mr Rob Smakman of Alvo Minerals Limited, a Competent Person and Fellow of the Australasian Institute of Mining and Metallurgy. Mr Smakman is a full-time employee of Alvo and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the "Australasian Code for Reporting of Mineral Resources and Ore Reserves" (or JORC 2012). Mr Smakman consents to the inclusion in this announcement of the matters based upon the information in the form and context in which it appears.

Alvo confirms that it is not aware of any new information or data that materially affects the information included in the Mineral Resource Estiamte. Alvo confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original MRE. All material assumptions and technical parameters underpinning the estimates in the report continue to apply and have not materially changed. The MRE announcement referred to above may be viewed and downloaded from the Company's website www.alvo.com.au.

The information in this announcement that relates to exploration results is extracted from ASX Announcements titled:
Ipora Drill and Met Results, lodged on 29 October 2024
Palma Mineral Resource Estimate, lodged on 19 July 2024
Diamond Drilling to Commence at Palma, lodged on 01 May 2024
High-Grade Copper-Zinc Intersected at C4 Prospect, lodged on 24 April 2024
Alvo acquires REE Project in New High Grade Province, lodged on 30 January 2024
Bluebush Option Signed, Diamond Hole Results Thick High Grade, lodged 6 December 2024
Thick Saprolite Clays Intercepted at Bluebush Project, lodged 8 November 2023
Metallurgical Tests Confirm Bluebush as Ionic Clay, lodged 2 November 2023
Exceptional High Grade Magnet REE Zone Identified at Bluebush, lodged 28 September 2023
Bluebush Maiden Drilling Delivers Magnet & Heavy REE Assays, lodged 21 August 2023
New VMS Discovery at Palma, lodged 1 August 2023
Tier 1 Ionic Clay Bluebush Acquisition, lodged 7 June 2023
Multiple High-Priority Regional VMS Targets Identified, lodged 9 May 2023
Major Step Out Extends VMS Mineralisation, lodged 1 May 2023
Regional Targeting Program Underway at Palma Project, lodged 10 February 2023
Large High Grade Copper Extensions, lodged 19 January 2023
Prelim Metallurgical Testwork Indicated Excellent Recoveries, lodged 9 November 2022

"These announcements may be viewed at www.alvo.com.au and www.asx.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Highly Prospective Critical Minerals Projects in Brazil

Strong community and political support

Access to multiple hydroelectricity options

Proximal to all infrastructure including rail and ports

Located in Central Brazil, an emerging critical minerals hub

ASX:ALV

Corporate Overview- Framework for Discovery

117.0 million[1]

Low Shares On Issue

Exploration success can materially impact share price

$3.6 million[1]

Funded for Exploration

Addition of prospective ionic clay REE expanding the Project footprint

70% Top 20

Quality Share Register

Held by Board (14%), Ore Investments (19.9%), RCF (7%), Strata (5%) Paragon (5%), & Lowell (4%)

$7.4 million[2]

Attractive Enterprise Value

For quality of the mineral resource base and exploration upside potential

Board and Management

Alvo's board has significant minerals exploration and mining experience in Brazil and around the world.

Graeme Slattery
Non-Exec Chairman
Lawyer

Rob Smakman
Managing Director
Geologist

Beau Nicholls
Non-Exec Director
Geologist

Mauro Barros
Non-Exec Director
(Nominee Director)

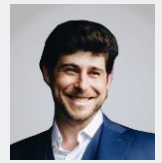

Experienced team in Brazil to manage exploration activities.

Julio Liz
Exploration Manager

Mauricio Prado
Senior Geologist

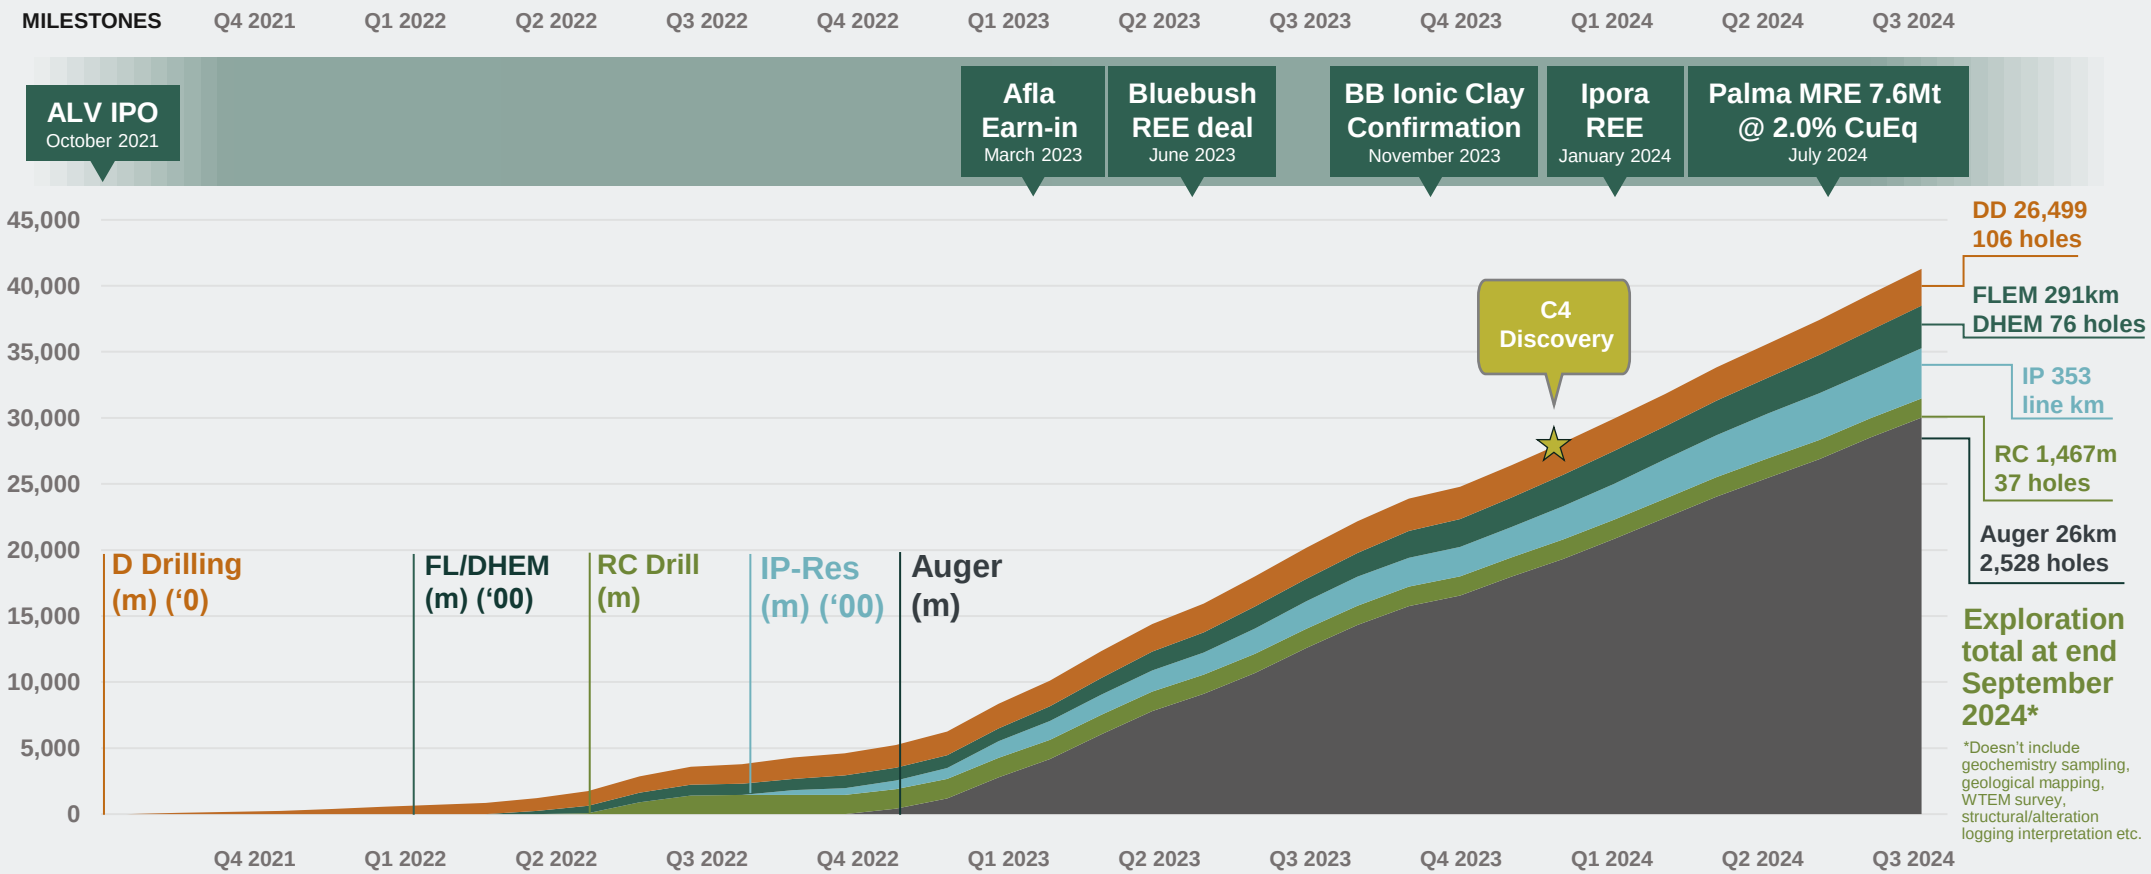

Paulo Lima
Legal & Commercial

ASX:ALV

1 Shares on issue and cash balance includes Jun-30 Qtr end.
2 EV based on Mkt cap $11M (Share Price $0.094 on 28 October 2024)

Alvo: The Active Brazilian Explorer

- Over 26km of Diamond Drilling conducted since Oct 2021
- Over 10,000 core samples assayed
- Extensive geological logging, geophysical surveys & studies of physical properties

Critical Minerals Focus

Palma Copper-Zinc VMS Project

High grade **district scale** Cu-Zn rich VMS project

JORC 2012 MRE* of 7.6Mt @ 2% CuEq (0.7% Cu**, 4.0% Zn, 0.4% Pb & 14g/t Ag. **MRE to be updated in '24**.

Recent discovery at C4 - best result 37m @ 1.9% CuEq or 4.6% ZnEq from 127m.

Drilling for New Discovery Underway at Palma

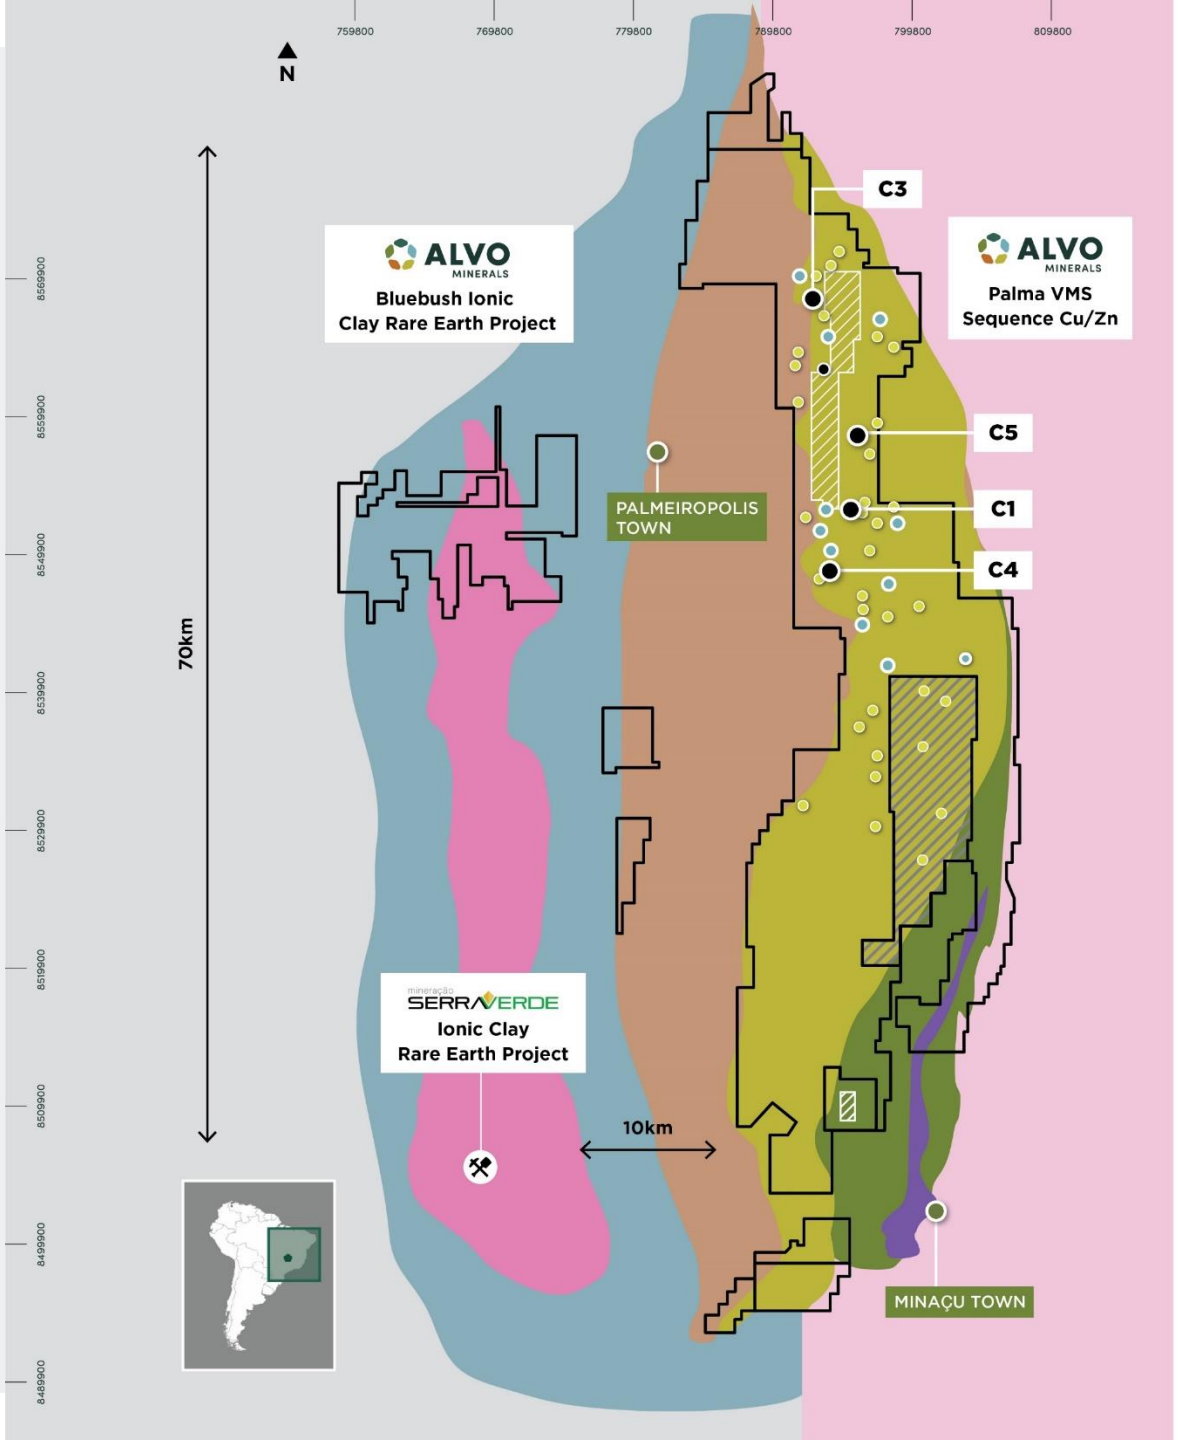

Bluebush IAC REE Project

Large footprint of prospective ground **(>120km^2)**

18.5m @ 1,396ppm (EOH) with **+25% MREOs** in auger and diamond drilling

Confirmed ionic adsorption clay with extractions up to 83% MREO

Can earn-in to up to 100% of project with no royalty

The Palma VMS Project

Palma Project is a high-grade, Cu-Zn rich VMS ***district scale*** opportunity in Brazil - largely idle for over 30 years (1970s)

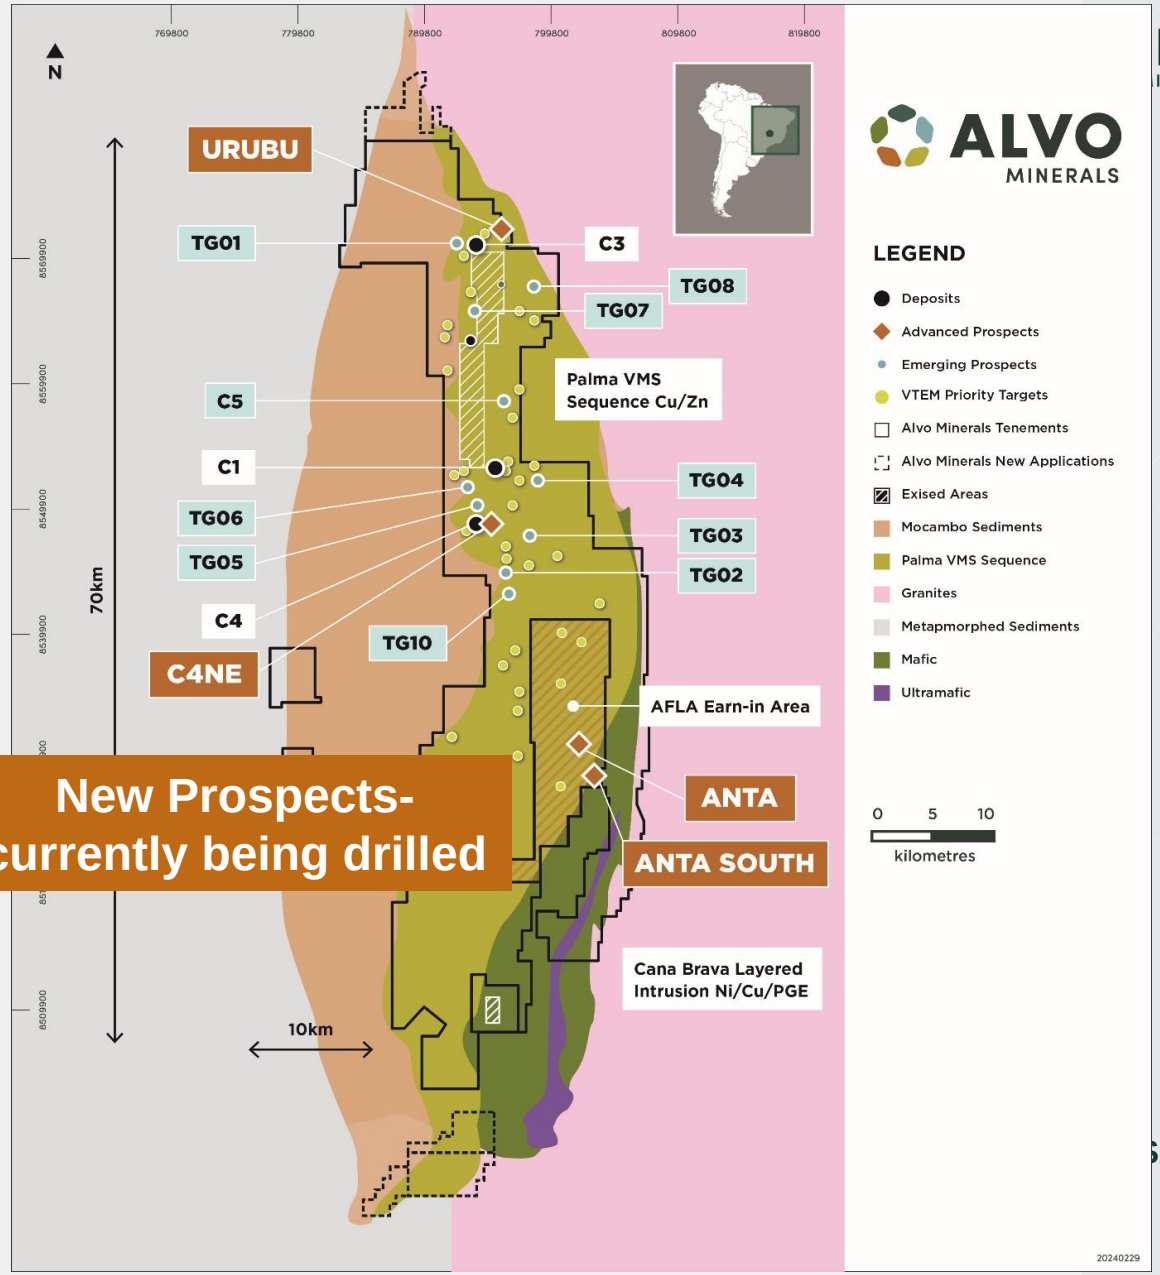

VMS targets occur in clusters - ***Dominant land position*** (>850km^2) with >70km of prospective strike – **new C4 VMS discovery**

JORC MRE of 7.6Mt @ 2.0% CuEq, (0.7% Cu, 4.0% Zn, 0.4% Pb & 14g/t Ag)

Zn Pb Ag Cu Au

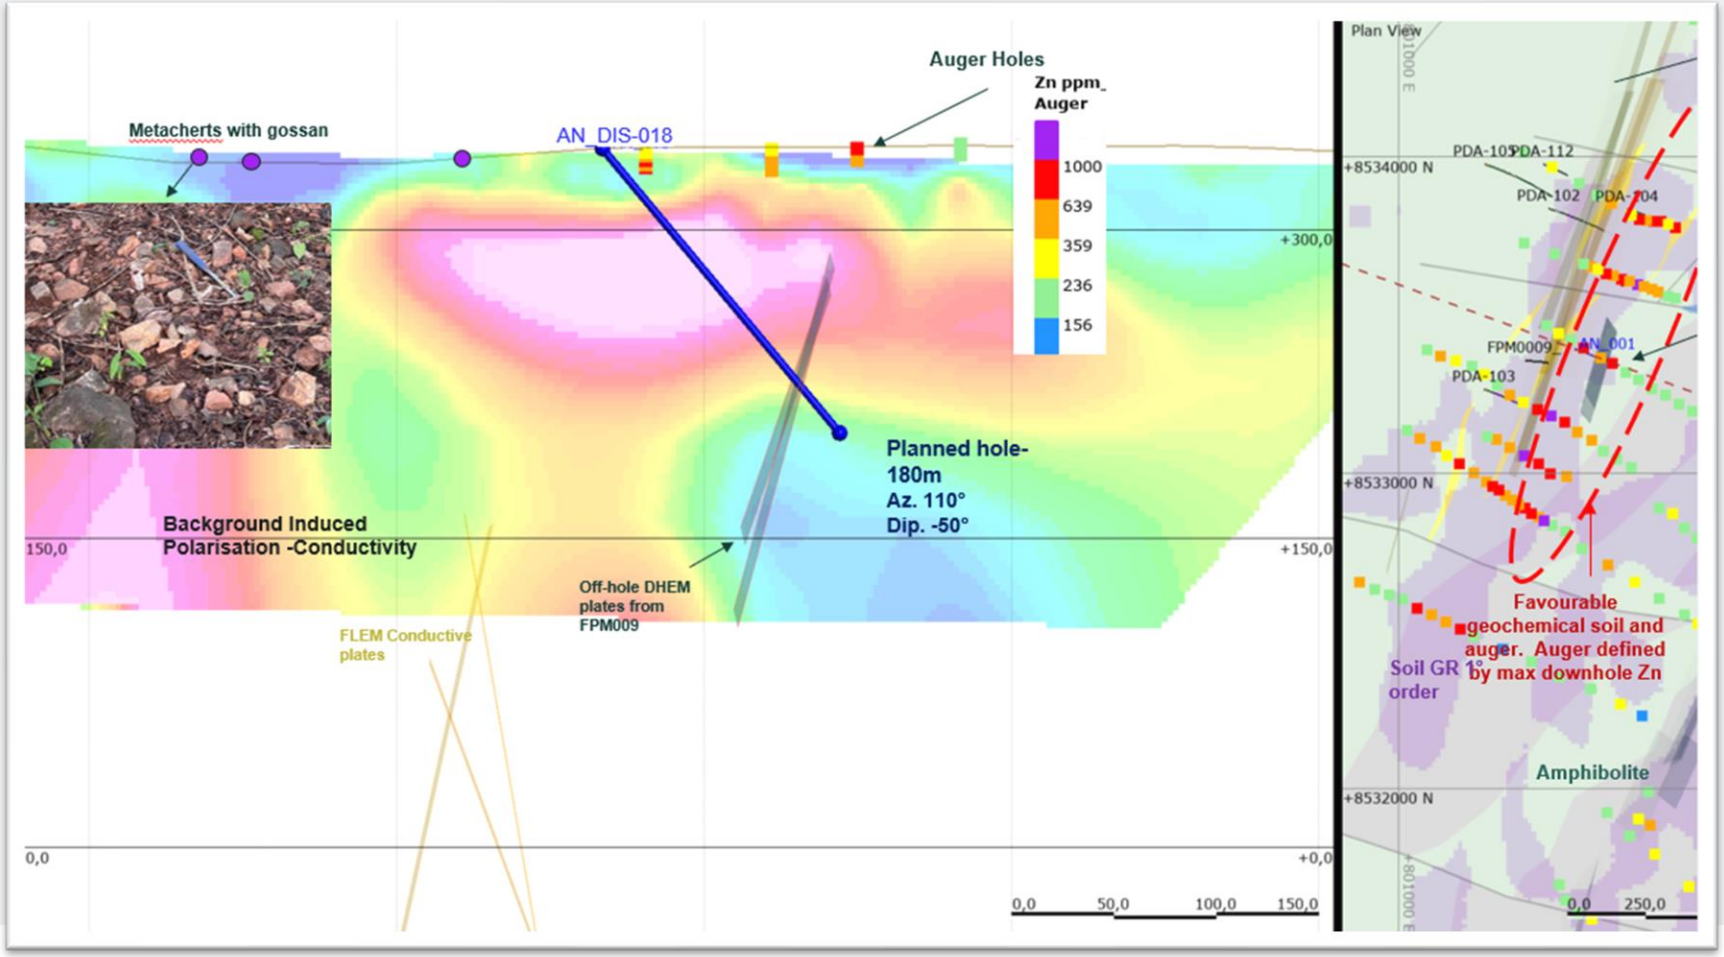

Alvo's drill results have exceeded expectations on grade and thickness:

- **36.0m @ 4.2% CuEq^** or **10.2% ZnEq^ - C3**
- **23.2m @ 5.5% CuEq** or **13.4% ZnEq - C3**
- **19.7m @ 4.7% CuEq** or **11.41% ZnEq - C3**
- **16.0m @ 6.4% CuEq** or **15.57% ZnEq - C3**
- **21.8m @ 4.8% CuEq** or **11.72% ZnEq - C1**

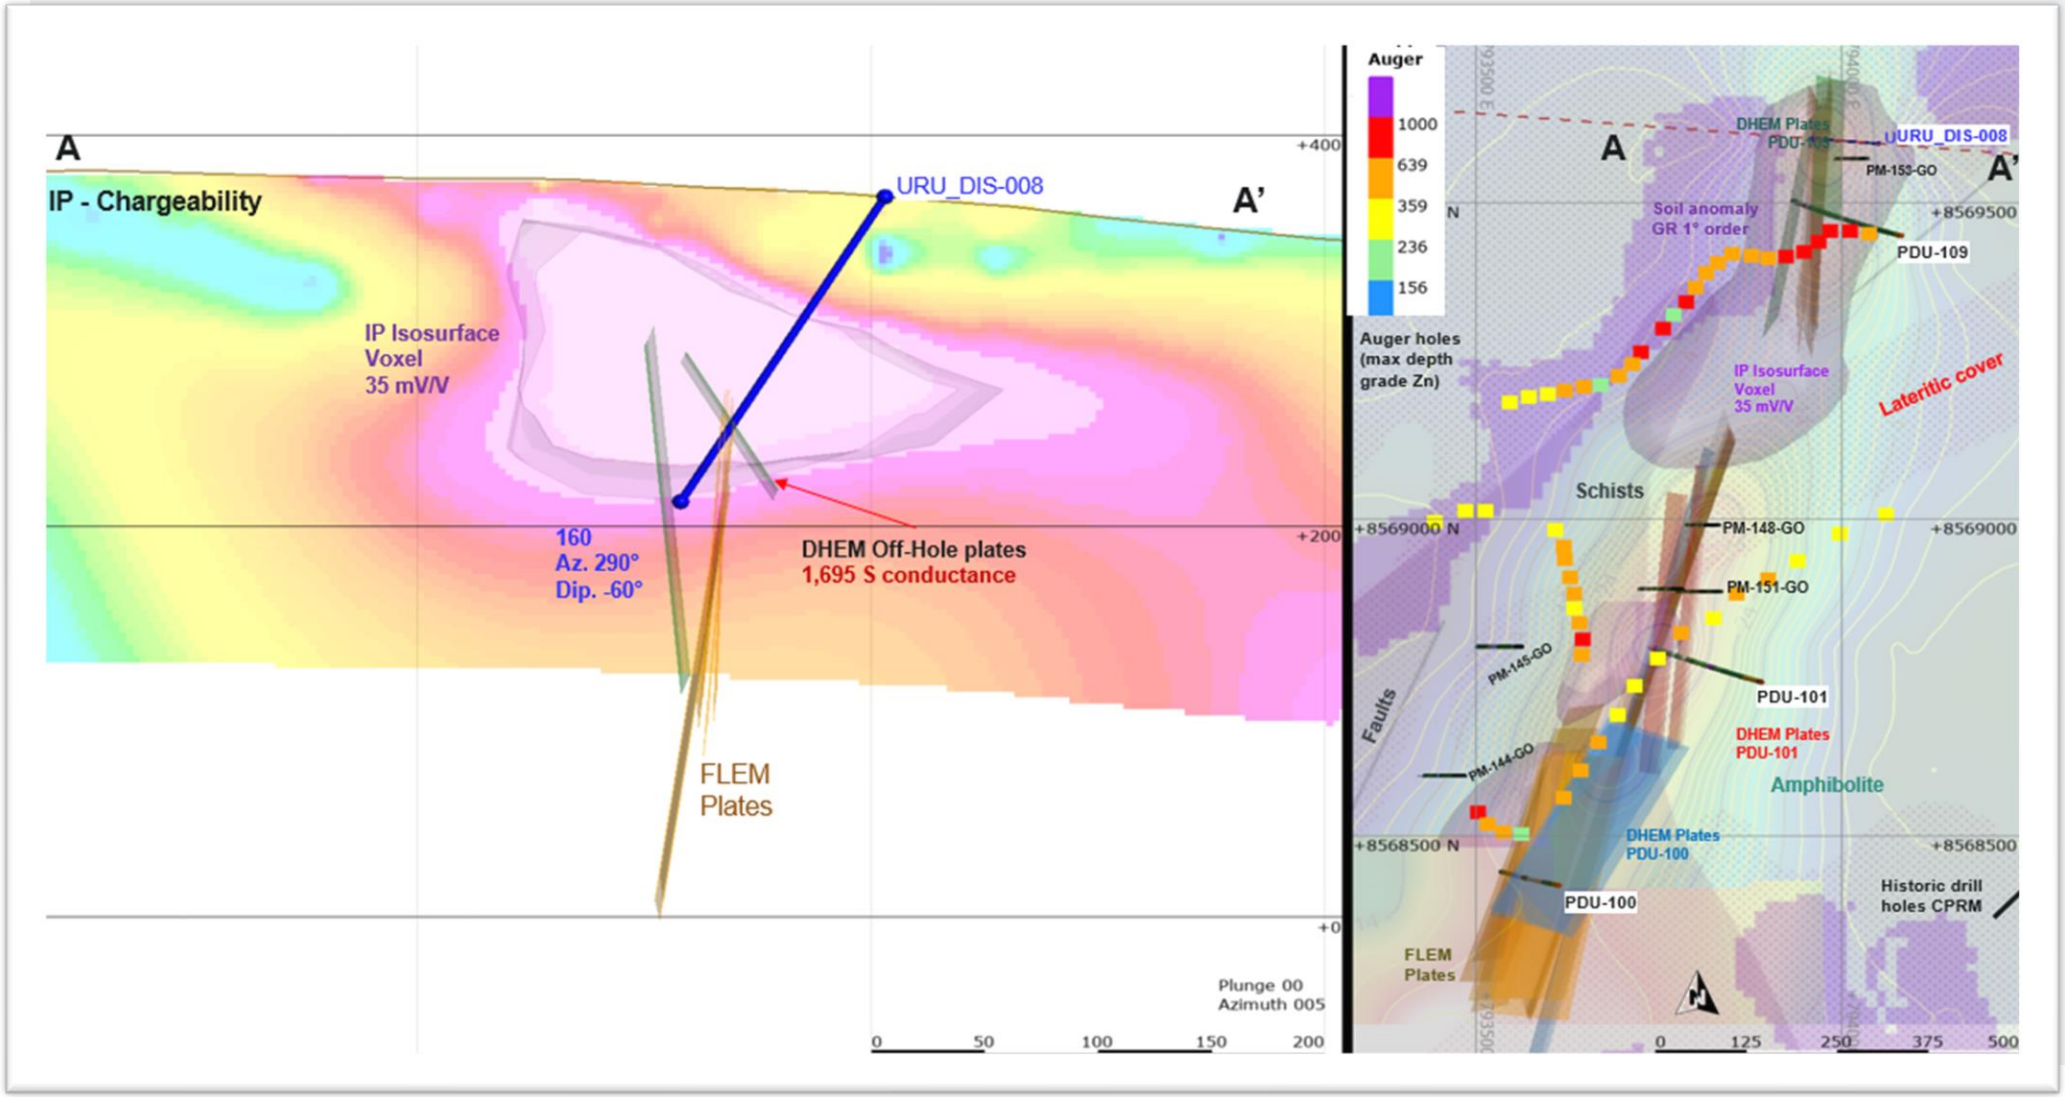

Anta Prospect- New area, co-incident targets

- Historically explored by BHP and Votorantim
- 3km long x 500m wide soil anomaly, tightened by Auger drilling
- Parallel to mapped geological contacts, outcrops of gossan and chert enhance geological setting
- Co-incident with FLEM/DHEM and IP Chargeability

Urubu Prospect- North of C3

- 1km long EM conductor with strong co-incident geochemistry and IP Chargeability.
- Strong ‘bottom of hole’ auger anomalies
- Planned drilling will target FL/DHEM conductivity plates.

Bluebush IAC REE Project Highlights

Exceptional TREO grades- 6m @ 2,537ppm & 18.5m @ 1,396ppm TREO's - High Magnet and Heavy REE's

Alvo **exercised the purchase option over Bluebush** in December 2023 - Bluebush held privately since 2004.

Large footprint of prospective ground **(>120km^2)**
Agreement to **earn-in into up to 100%,** Bluebush- no Royalty

Same host as Serra Verde (SV)- **only operating IAC mine outside of China**

SV recently raised US$150M from the Minerals Security Partnership- who support projects that play a key role in global Energy Transition.

Bluebush:

- **IAC Mineralisation- up to 83% MREO Extractions**
- **Saprolite depth up to 28m**
- **6m @ 2,537ppm TREO**
- **High % of MREO and HREO**

Serra Verde :

- **Resource: 911Mt @ 1,200ppm**
- **High % of valuable REEs**
- **Commenced production CY23**
- **Oct '24 raised US150M to expand and enhance operations**

For more details on the Serra Verde MRE, refer to: https://www.cetem.gov.br/antigo/images/palestras/2015/iiisbtr/05-denilson-fonseca.pdf and Rare earths producer Serra Verde secures $150m investment (mining-technology.com)

Bluebush IAC REE Project – Auger and Diamond Drilling

264 auger and 6 diamond holes drilled to date

Exceptional MREO values so far;

- 6m @ 2,537ppm TREO (21%) to EOH from 0m; inc. **3m @ 3,415ppm TREO (24% MREO) to EOH from 3m**
- **18.5m @ 1,396ppm** TREO (25% MREO)

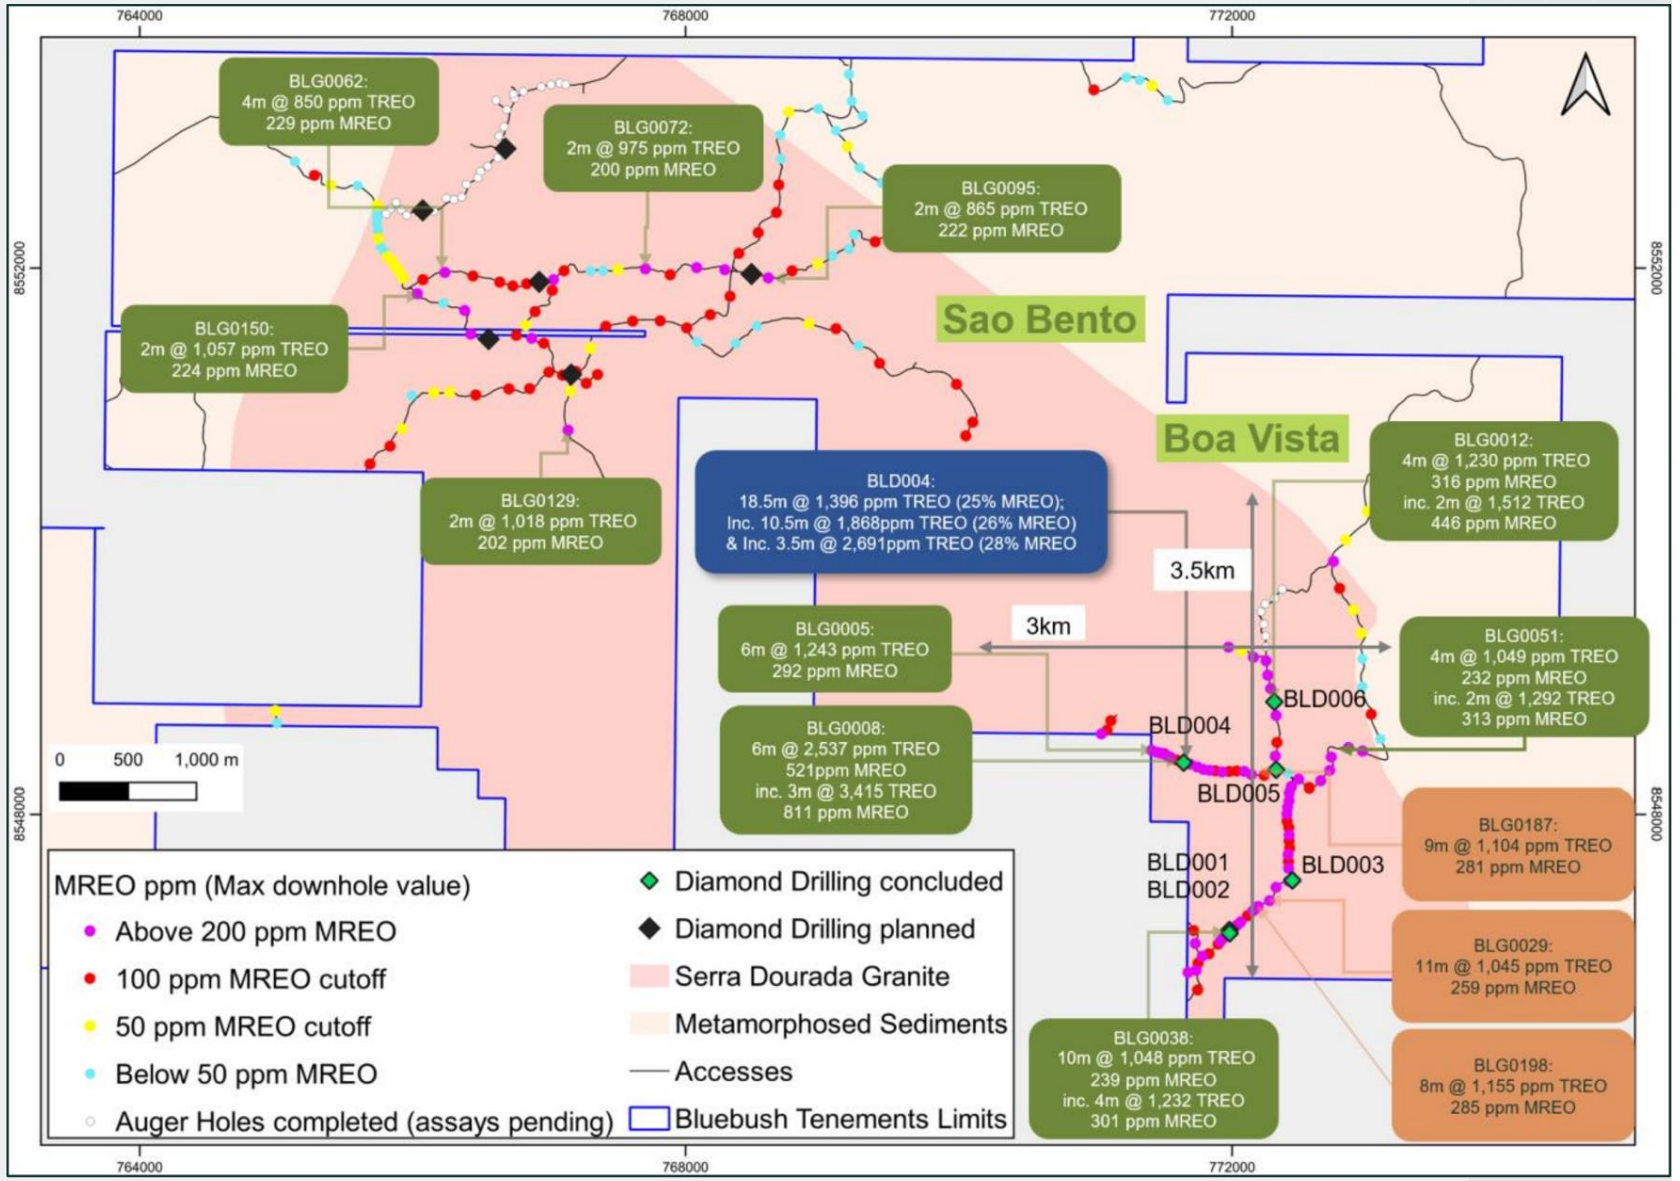

Hand-held auger drilling and soils commenced targeting untested regional prospects towards the centre of the granite

Excellent extraction of REE using industry standard dilute ammonium sulphate solution (AMSUL)

High-value magnet rare earths (MREOs) extracted :

- MREO: up to 83%, average 56%

Met samples will be tested to further optimise recovery ratios

Ipora Ionic-Clay REE Project

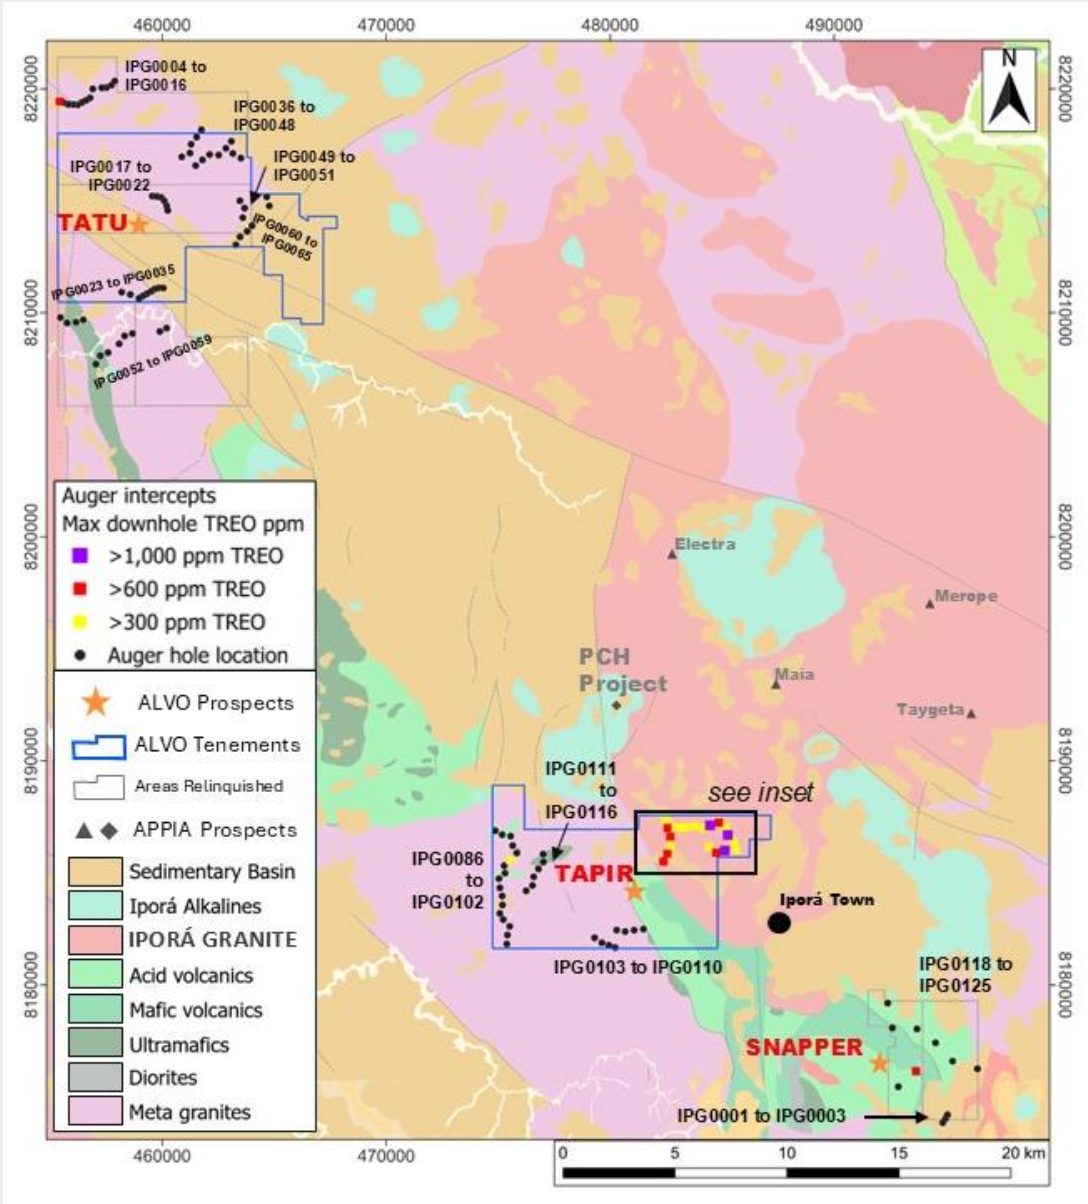

Ipora Ionic Adsorption Clay-Style Project is located in the Goias State, exceptionally prospective for ionic-clay rare earth mineralisation

Recon auger drilling returned up to **5.5m @ 1,294ppm TREO (27% MRE)** from 0.5m to EOH

Met testing extracted **up to 90% MREO-ave 53%- confirming Ionic Adsorption clay style**

Located on similar geology and adjacent to the PCH and Ionic clay REE Projects owned by Appia

Project pegged by Alvo – low acquisition/holding costs (100% ownership).

Full details of Appia results (CSE: API) refer to API CSE Release 16 January 2024

Thank you

C3 Deposit: High-grade Cu-Zn

JORC Resource of **3.5Mt @ 2.2%CuEq (1.0% Cu, 3.7% Zn, 0.2% Pb & 13g/t Ag)**

Exceptional intercepts

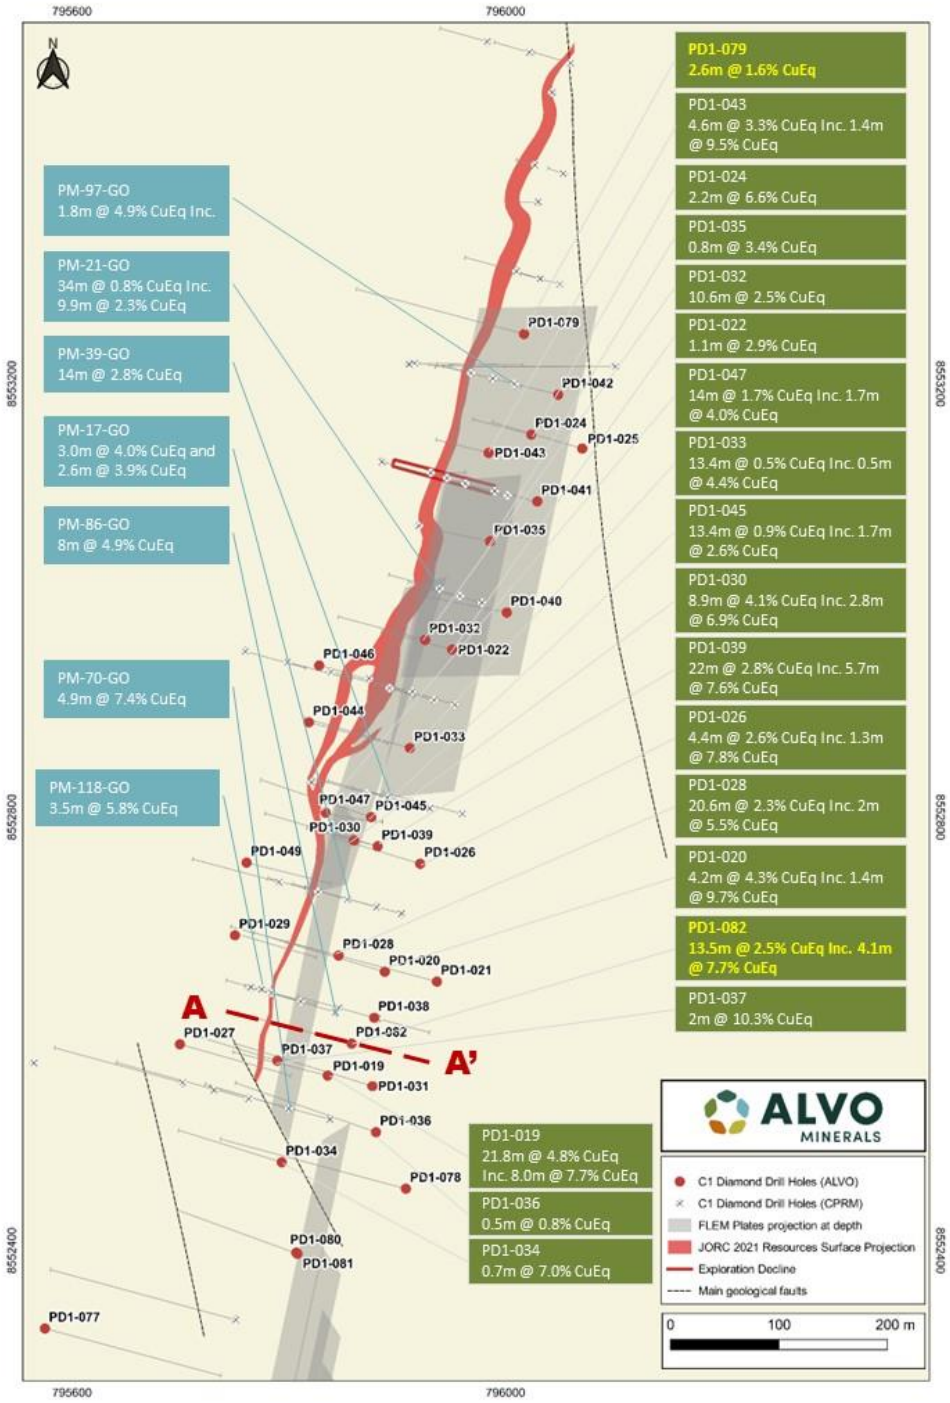

- PD3-001: **25.0m @ 6.3% CuEq or 15.34% ZnEq**
- PD3-007: 23.2m @ 5.5% CuEq or 13.4% ZnEq
  - Inc. 10.6m @ 10.1% CuEq or 24.73% ZnEq
- PD3-008: 19.7m @ 4.7% CuEq or 11.41% ZnEq
- PD3-012: **36m @ 4.2% CuEq or 10.20% Eq**
- PD3-014: 16.0m @ 6.4% CuEq or 15.57% ZnEq
  - Inc. **7.4m@ 9.8% CuEq or 23.81% ZnEq**
- PD3-018: 15.0m @ 3.9% CuEq or 9.51% ZnEq

Geophysics being used to map extensions

ALVO MINERALS

ASX:ALV

C1 Deposit: Shallow, High-grade

JORC Resource **of 2.5Mt @ 1.8%CuEq (0.6% Cu, 3.1% Zn, 0.6% Pb & 14g/t Ag)**

1.2km mineralised strike – open at depth and along strike

Exceptional intercepts

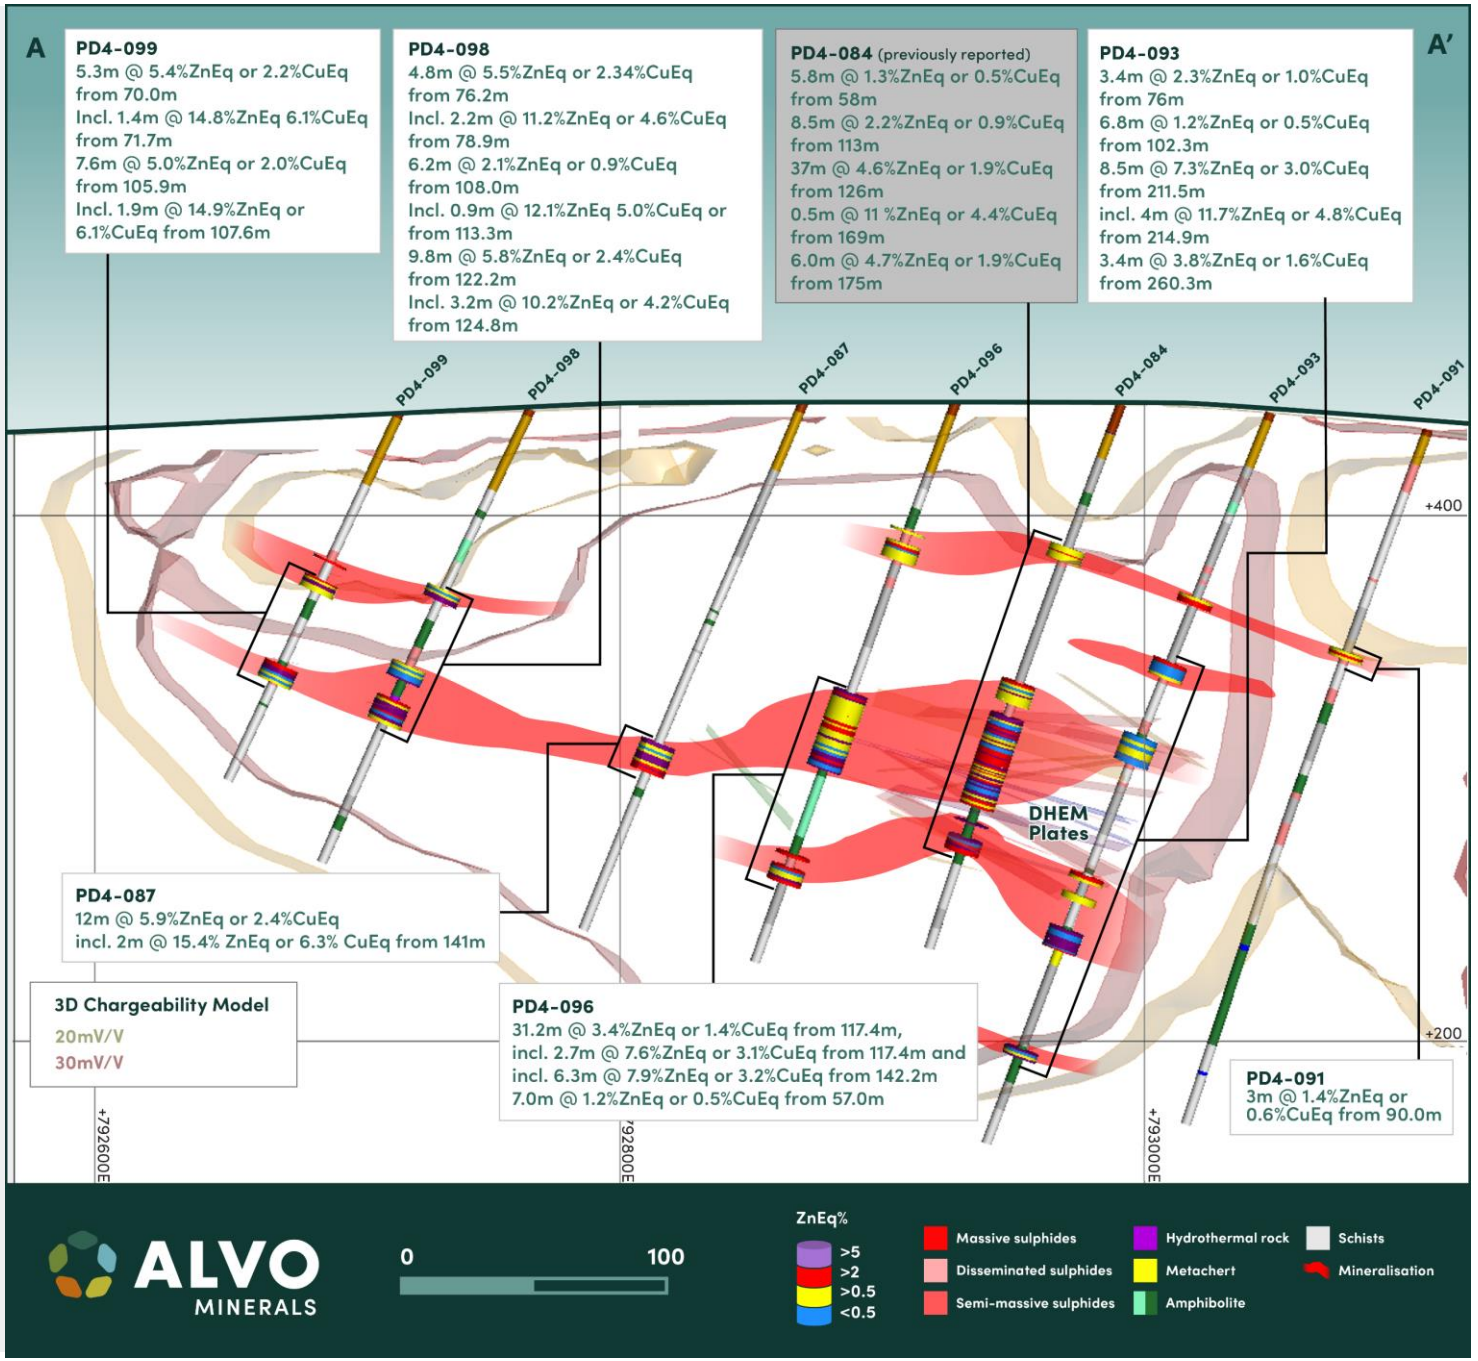

- PD1-019: **21.8m @ 4.8% CuEq^ or 11.72% ZnEq** from 142m
  Inc. **8.0m @ 7.7% CuEq or 18.80% ZnEq** from 149m
- PD1-030: **8.9m @ 4.1% CuEq or 10.07% ZnEq** from 64m
  Inc. **2.8m @ 6.9% CuEq or 16.76% ZnEq** from 64m
- PD1-028: **20.6m @ 2.3% CuEq or 5.72% ZnEq** from 84m
  Inc. **2.1m @ 5.5% CuEq or 13.53% ZnEq** from 103m
- PD1-029: **6.2m @ 2.9% CuEq or 7.16% ZnEq** from 105m
- PD1-082: **13.5m @ 2.5% CuEq or 6.17% ZnEq** from 112m

Excellent potential to grow resources SSW and NNE, new geophysical surveys underway

C4 – Maiden MRE

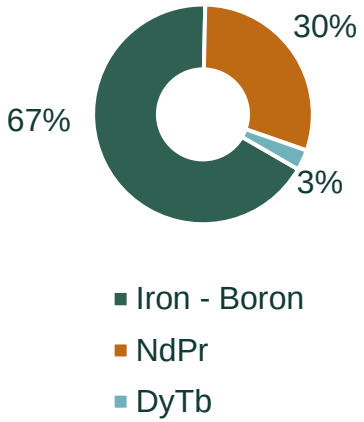

Thick and high-grade Zn-Cu intercepts consistent with VMS mineralisation

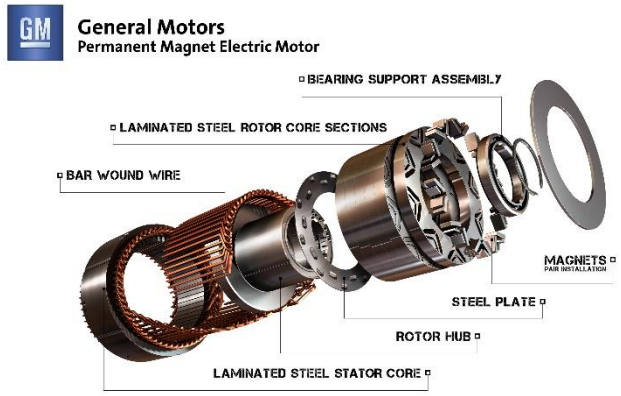

- 1.5Mt @ 1.8%CuEq (0.2%Cu, 3.3%Zn, 1.3%Pb, 28g/t Ag)
- Drilling identified multiple stacked lodes including high grade zones around discovery hole.
- IP survey and chargeability completed at C4 highlights further potential upside across the wider C4 area.
- Additional upside with new untested VMS target “C4-NE” located 300m NE, progressing to drill testing.

EV Permanent Magnets NEED Specific REEs

EV Rare Earth Permanent Magnet Motor

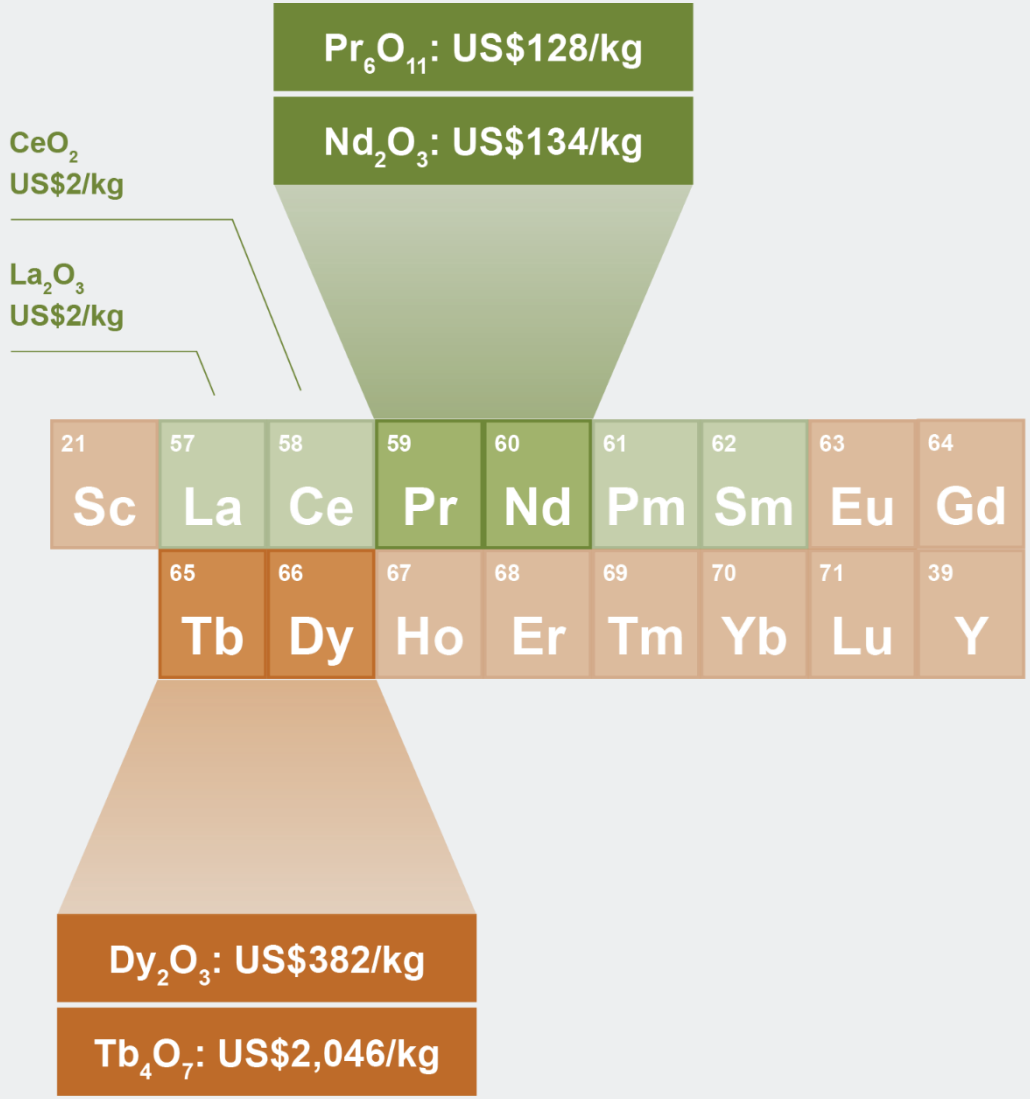

Primarily used for Electric vehicles

Highest efficiency and lowest cost: Battery costs reduced by 30% (lower lithium, cobalt & nickel content).

Compact: Lower size and weight.

Strength: Highest torque density.

Sources; International Renewable Energy Agency; General Motors; Stanford Magnets
Price data sourced from USGS 2021 Rare Earths Update, Statista and Goldman Sachs Rare Earths Update 6 July 2023

ALV – ASX Brazilian IAC Peers

Brazil is emerging as one of the most important IAC jurisdictions globally

Alvo is adjoining and in the same geological setting as Serra Verde, the only IAC REE mine *operating* outside of China
