

Mt Clement Antimony Drilling Kicks Off

Black Cat Syndicate Limited (“**Black Cat**” or “**the Company**”) is pleased to provide an update on exploration activities at the 100% owned Mt Clement Antimony Project (“**Mt Clement**”) located ~30km from the Paulsens Gold Operation (“**Paulsens**”).

HIGHLIGHTS (All figures in A\$ unless otherwise stated)

Mt Clement currently hosts one of Australia’s largest and highest-grade antimony deposits, with a current Resource of 13.2kt @ 1.7% Sb (with Au-Ag-Pb credits) and an Exploration Target of 47-103kt @ 1.2-1.9% Sb¹ (*note that the potential quality and grade of the Exploration Target is conceptual in nature, there has been insufficient exploration in which to estimate a Resource, and it is uncertain if further exploration will result in the estimation of a Resource*). Planned activities include:

- Drill pad preparation, camp and drill rig mobilisation for an initial ~6,000m diamond drilling program.
- The program has two main objectives, first, to infill and extend the current Resource which is modelled on one of six mapped outcropping mineralised veins (see Figure 2); and secondly, to obtain drill core to be used for antimony metallurgical testwork.
- Additionally, two ~800m diamond holes, designed to transect the full extent of the mapped antimony mineralised zone, testing down dip from known surface mineralisation by up to ~400m. These holes are co-funded by a competitive Exploration Incentive Scheme (“**EIS**”) grant of \$175,000².
- A ~41 line-km magnetotelluric survey between Paulsens and Mt Clement has commenced and expected to be completed in October 2025. This program is co-funded up to \$129,000 by the Western Australia Department of Mines, Petroleum and Exploration (“**DMPE**”) Co-Funded Geophysics Program².

Figure 1: Photograph of drill pad preparation at the Mt Clement Antimony Project.

Black Cat’s Managing Director, Gareth Solly, said: “Activities are underway at Mt Clement, a truly exciting opportunity given this program aims to expand one of Australia’s largest and highest-grade antimony deposits. Along with imminent exploration, significant metallurgical testwork is being completed to accelerate our resources and processing studies. These activities are fully aligned with our more gold (and antimony), sooner strategy.”

Mt Clement Antimony Drilling Kicks Off

BACKGROUND

Diamond Drilling

Mt Clement already hosts one of Australia's largest and highest-grade antimony deposits with a Resource of 13.2kt @ 1.7% Sb (with Au-Ag-Pb credits) and an Exploration Target of 47-103kt @ 1.2-1.9% Sb³. Mt Clement is on a granted Mining Lease ~30km from Paulsens. The deposit is also within the Northern Australia Infrastructure Facility ("NAIF") Zone where the Federal Government is looking to transform the region by financing infrastructure development, particularly critical minerals such as antimony.

Previous preliminary metallurgical testwork⁴ indicated favourable antimony recoveries of ~85% including recoveries of ~85% for lead and ~92% for silver. In addition, a high-level desktop review indicates there is potential to add a sulphide flotation circuit at Paulsens to recover antimony. Metallurgical testwork will be undertaken as part of the program in order to progress these studies.

The planned initial diamond drilling program (~6,000m, 20 holes) has commenced with pad preparation and camp/drill rig mobilisation completed. Drilling is designed to test the unconstrained Taipan Lode, which hosts the current Resource, as well as to test the nearby Dugite and Gwardar lodes. The two EIS co-funded drillholes will provide valuable information about the vertical extent of mineralisation (Figure 2).

Drilling is expected to be ongoing throughout October 2025 with assays thereafter.

Mt Clement Antimony Drilling Kicks Off

Regional Geophysics

A ~41 line-km magnetotelluric survey has commenced, testing a prospective section extending from Paulsens to south of Mt Clement. This program has several technical aims, including:

- Map the thickness of the Ashburton Basin, which will assist with identifying major crustal-scale faults that have potential to control the location of mineralisation
- Detect local conductivity anomalies along faults that could indicate alteration along the fault zones
- Identify conductive zones around Paulsens, including proximal to the current Paulsens West drilling program

This survey is expected to finish in October 2025 with results received in December 2025. This survey is co-funded by the DMPE Co-Funded Geophysics Program⁷.

Mt Clement Antimony Drilling Kicks Off

PLANNED ACTIVITIES

As at the date of this announcement, the proposed activities and timing for the Company over the coming months includes

Ongoing	Paulsens underground drilling
Ongoing	Paulsens regional exploration
Ongoing	Paulsens West seismic target drilling (EIS Co-funded)
Sep 2025	Denver Gold (14-17 Sep) conferences
Ongoing	Mt Clement Eastern Zone antimony drilling
Ongoing	Ashburton MT survey (Geophysics Programme Co-funded)
Oct - Mar 2026	Mt Clement metallurgical testwork

This announcement has been approved for release by the Board of Black Cat Syndicate Limited

COMPETENT PERSON'S STATEMENT

The information in this announcement that relates to geology, exploration results (including visual observations) and planning was compiled by Dr. Wesley Groome, RPGeo, who is a Registered Professional Geoscientist (Mineral Exploration) in the AIG and an employee, shareholder and option/rights holder of the Company. Dr. Groome has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr. Groome consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The information in this announcement that relates to Exploration Targets and Resources is based on and fairly represents information and supporting documentation that was compiled by Mr. Iain Levy, who is a member of the AIG and an employee, shareholder and option/rights holder of the Company. Mr. Levy has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Levy consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Where the Company refers to the exploration results, Mineral Resources, and Reserves in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource and Reserve estimates with that announcement continue to apply and have not materially changed.

The Company confirms that all material assumptions underpinning the production targets, or the forecast information derived from the production targets, included in the original ASX announcements dated, 8 May 2024, 9 May 2024 and 15 May 2024 continue to apply and have not materially changed.

ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Black Cat is a gold producer with operating mines and processing facilities at two of its three 100% owned operations.

Gold production occurs at:

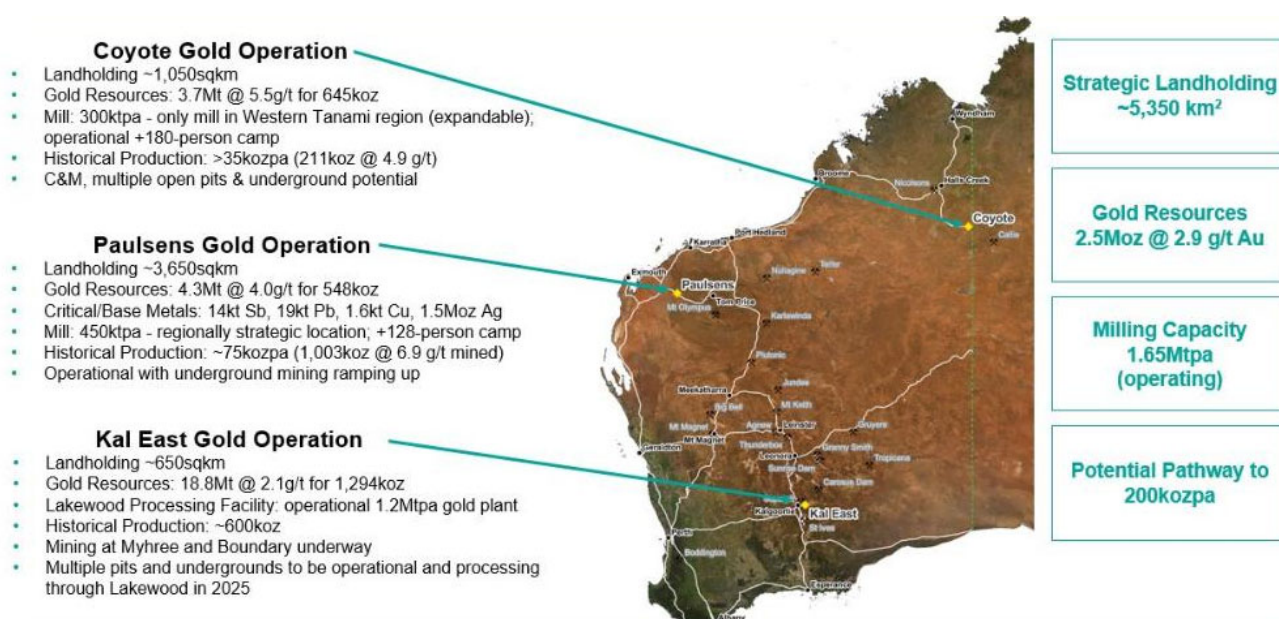

Kal East: comprising ~650km² of highly prospective ground to the east of the world class mining centre of Kalgoorlie, WA. Kal East contains a Resource of 18.8Mt @ 2.1g/t Au for 1,294koz, including a preliminary JORC 2012 Reserve of 3.7Mt @ 2.0 g/t Au for 243koz. A turn-key funding, development & processing arrangement to mine and mill the Myhree and Boundary open pit deposits is underway⁸. Black Cat 100% owns and operates the 1.2Mtpa Lakewood gold processing facility, located ~6km east of Kalgoorlie.

Paulsens: comprising ~3,200km² of tenure located ~180km west of Paraburdoo in WA. Paulsens is an operational underground mine, with a 450ktpa processing facility, 128-person camp and other related infrastructure. Gold production restarted in December 2024 and will move to full production during 2025. Paulsens has a regional Resource of 4.3Mt @ 4.0g/t Au for 548koz and significant exploration and growth potential.

The Company has significant regional exploration potential at both Paulsens and Kal East. In addition, the Company also has two major organic growth projects at:

Coyote: comprising 1,050km² prospective tenements located in Northern Australia, ~20km on the WA side of the WA/NT border, on the Tanami Highway. Coyote has substantial infrastructure including an airstrip, underground mine, 300ktpa processing facility, +180-person camp and other related infrastructure. The operation has a Resource of 3.7Mt @ 5.5g/t Au for 645koz with numerous high-grade targets in the surrounding area. Operations are planned to restart in the future.

Mt Clement: is located 30 km from the Paulsens Gold Operation and is currently the 4th largest and 2nd highest-grade antimony deposit in Australia. Significant upside potential for growth of the antimony Resource exists with the Company actively exploring the region.

Notes on Resources:

- The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'.
- All tonnages reported are dry metric tonnes.
- Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
- Resources have been reported as both open pit and underground with varying cut-offs based off several factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
- Resources are reported inclusive of any Reserves.
- Paulsens Inferred Resource includes Mt Clement Eastern Zone Au of 7koz @ 0.3g/t Au accounting for lower grades reported.

The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating for the 2012 JORC compliant Resources are:

Kal East Gold Operation

- Boundary, Trump, Myhree – Black Cat ASX announcement on 9 October 2020 "Strong Resource Growth Continues including 53% Increase at Fingals Fortune"
- Strathfield – Black Cat ASX announcement on 31 March 2020 "Bulong Resource Jumps by 21% to 294,000 oz"
- Majestic – Black Cat ASX announcement on 25 January 2022 "Majestic Resource Growth and Works Approval Granted"
- Sovereign, Imperial – Black Cat ASX announcement on 11 March 2021 "1 Million Oz in Resource & New Gold Targets"
- Jones Find – Black Cat ASX announcement 04 March 2022 "Resource Growth Continues at Jones Find"
- Crown – Black Cat ASX announcement on 02 September 2021 "Maiden Resources Grow Kal East to 1.2Moz"
- Fingals Fortune – Black Cat ASX announcement on 23 November 2021 "Upgraded Resource Delivers More Gold at Fingals Fortune"
- Fingals East – Black Cat ASX announcement on 31 May 2021 "Strong Resource Growth Continues at Fingals".

Paulsens Gold Operation

Underground	93	4.5	14	537	4.3	74	631	4.3	87
Paulsens Reserve	93	4.5	14	537	4.3	74	631	4.3	87
TOTAL Reserves	93	4.5	14	4,262	2.3	317	4,356	2.4	330

Notes on Reserve:

1. The preceding statements of Mineral Reserves conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'.
2. All tonnages reported are dry metric tonnes.
3. Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
4. Cut-off Grade:
 - o Open Pit - The Ore Reserves are based upon an internal cut-off grade greater than or equal to the break-even cut-off grade.
 - o Underground - The Ore Reserves are based upon an internal cut-off grade greater than the break-even cut-off grade.
5. The commodity price used for the Revenue calculations for Kal East was AUD \$2,300 per ounce.
6. The commodity price used for the Revenue calculations for Paulsens was AUD \$2,500 per ounce.
7. The Ore Reserves are based upon a State Royalty of 2.5% and a refining charge of 0.2%.

The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating for the 2012 JORC compliant Reserves are:

Kal East Gold Operation

- Black Cat ASX announcement on 03 June 2022 "Robust Base Case Production Plan of 302koz for Kal East"

Paulsens Gold Operation

- Black Cat ASX announcement on 10 July 2023 "Robust Restart Plan for Paulsens"
