

North Queensland Copper-Gold Project

District Scale Copper Opportunity with Significant Resource Growth Potential

ASX:BTM | MAY 2026

Disclaimer

This presentation ("**Presentation**") has been prepared by Breakthrough Minerals Limited ("**Company**" or "**Breakthrough Minerals**"). This Presentation contains background information about Breakthrough Minerals current at the date of this Presentation. The Presentation is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this Presentation.

This Presentation is not a prospectus, disclosure document or other offering document under Australian law or under any other law. This Presentation is for information purposes only. Neither this Presentation nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sale of Breakthrough Minerals shares in any jurisdiction. This presentation may not be distributed in any jurisdiction except in accordance with the legal requirements applicable in such jurisdiction. Recipients should inform themselves of the restrictions that apply in their own jurisdiction. A failure to do so may result in a violation of securities laws in such jurisdiction.

Competent persons statement – Exploration

The information in this Presentation that relates to exploration results is extracted from the Company's ASX Announcements titled "BTM to Acquire Nth Qld Cu-Au Project and Complete Placement" lodged with ASX on 30 October 2025. These represent information and supporting documentation compiled by William Dix, who provides technical services to Breakthrough Minerals under a shared services agreement between Breakthrough and Xenora Minerals. Mr Dix is a Director and Shareholder of Breakthrough Minerals. Mr Dix is a Fellow of the Australian Institute of Mining and Metallurgy. Mr Dix has sufficient experience of relevance to the style of mineralisation and the types of deposits under consideration, and to the activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Dix consents to the inclusion in this Presentation of the matters based on information in the form and context in which it appears. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement and that no new information is available.

Competent persons statement – Resources - Barbara, Turpentine, Turpentine South and 8 Mile Creek North

The information in this Presentation that relates to the resource estimates at Barbara, Turpentine, Turpentine South and 8 Mile Creek North, is extracted from the Company's ASX Announcements titled "BTM to Acquire Nth Qld Cu-Au Project and Complete Placement" lodged with ASX on 30 October 2025. These represent information compiled and reviewed by Mr Christopher Speedy who is a Member of the Australian Institute of Geoscientists. Mr Christopher Speedy is employed by Encompass Mining on a full-time basis. Mr Speedy has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Speedy consents to the inclusion in this announcement of the matters based on information in the form and context in which it appears. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement and that no new information is available.

Competent persons statement – Resources – Mt Colin

The information in this announcement that relates to the Mt Colin Cu-Au Gold Projects is extracted from the Company's ASX Announcements titled "BTM to Acquire Nth Qld Cu-Au Project and Complete Placement" lodged with ASX on 30 October 2025. These represent information compiled and reviewed by Mr Andrew Fowler who is a Member of the Australian Institute of Mining and Metallurgy (AusIMM). Mr Andrew Fowler was employed at the time by Aeris Resources on a full-time basis. Mr Fowler has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Fowler consents to the inclusion in this announcement of the matters based on information in the form and context in which it appears. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement and that no new information is available.

Forward-Looking Statements

This Presentation contains certain "forward-looking statements". The words "expect", "anticipate", "estimate", "intend", "believe", "guidance", "should", "could", "may", "will", "predict", "plan" and other similar expressions are intended to identify forward-looking statements. Indications of, and guidance on, future financial position or performance are also forward-looking statements. Forward-looking statements, opinions and estimates provided in this Presentation are based on assumptions and contingencies which are subject to change without notice and involve known and unknown risks and uncertainties and other factors which are beyond the control of Breakthrough Minerals and its respective directors and management. Forward-looking statements are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Actual results, performance or achievements may differ materially from those expressed or implied in such statements and any projections and assumption on which these statements are based. These statements may assume the success of Breakthrough Minerals business strategies. The success of any of those strategies will be realised in the period for which the forward-looking statement may have been prepared or otherwise. Readers are cautioned not to place undue reliance on forward-looking statements, particularly in light of the current economic climate and the significant volatility, and except as required by law or regulation, none of Breakthrough Minerals and its respective representatives or advisers assumes any obligation to update these forward-looking statements. No representation or warranty, express or implied, is made as to the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects, or statements in relation to future matters contained in this Presentation. The forward-looking statements are based on information available to Breakthrough Minerals as at the date of this Presentation. Except as required by law or regulation (including the ASX Listing Rules), none of Breakthrough Minerals and its respective representatives or advisers undertakes any obligation to provide any additional or updated information whether as a result of a change in expectations or assumptions, new information, future events, or results or otherwise. Indications of, and guidance or outlook on future financial position or performance are also forward-looking statements.

Clear Path to Resource Growth

Expansion and Exploration Upside

200kt CuEq Global JORC (2012) Mineral Resource¹

- 18.8Mt @ 1.07% CuEq² for 200kt of CuEq metal across multiple deposits

Near-term drilling catalysts

- Q2 26 Barbara Project
- Q3 26 Hazel Creek Project
- Q4 26 Regional discovery drilling

District scale tenure in mining friendly location

- Significant upside for resource extension and new discoveries

Strategically located near third party processing infrastructure

- Mt Isa (Glencore LSE:GLEN)
- Eva (Harmony Gold JSE:HAR)
- Eloise (AIC Mines ASX:AIC)

Highly Leveraged to Future Exploration Success

BOARD & MANAGEMENT

Graeme Robertson *Non-Executive Chairman*

- 30+ years in coal, infrastructure & power development
- Former CEO/MD, New Hope Corporation
- Held directorships at Soul Pattison and AfrAsia Bank

Nigel Broomham *Managing Director*

- Experienced mining executive and geologist with 15 years in resource development and operations
- Appointment aligns with BTM's strategy to accelerate resource growth
- Formerly CEO of Battery Age Minerals and senior leader at Pilbara Minerals

Peretz Schapiro *Non-Executive Director*

- Extensive leadership in resource exploration
- Corporate finance and investment expertise
- Strong track record of creating shareholder value
- Wide project generation network

Will Dix *Non-Executive Director*

- Geologist with 30 years experience in base metals, gold and uranium exploration and mining
- Expertise in acquisitions and ECM
- Extensive commercial experience

Marty Costello *Strategic Advisor*

- Experienced mining executive with over 20 years operating in the Mt Isa Region.
- Expertise in permitting and regulatory compliance.
- Founder of Wolfram Limited and led its recent successful takeover by Bumi

SHAREHOLDERS

SHARE PRICE

Mt Isa & Cloncurry

Copper Country

1

Established low-risk mining jurisdiction of Queensland

2

Large ground position of 952km² tenure in the Mount Isa/Cloncurry region

3

Pathway to development with **21.5km² of granted mining leases** with native title and land access agreements

4

Proximity to processing infrastructure, miners and developers

5

Acquisition included **significant operational infrastructure** — 70-man camp, Cloncurry drill core facility and mining equipment — adding asset value to the transaction and reducing exploration mobilisation costs

Platform for Rapid Resource Growth

Multiple pathways to materially grow the current 200kt CuEq resource base

Regional Exploration Opportunities

Turpentine MRE Expansion

Barbara MRE Expansion

Global MRE
200kt CuEq

TOP PRIORITY

KEY PRIORITY

NEXT PRIORITY

Clear Path to Resource Growth

From 200kt CuEq resource base to district-scale copper growth

Multiple pathways to materially grow the current 200kt CuEq resource base

Barbara Project: Significant Resource - High Growth Potential

- Resource extension drilling to commenced April 2026
- Barbara deposit MRE: **6.5Mt @ 0.97% CuEq** for **63,000t CuEq** metal
- Open along strike and at depth with multiple extension targets
- **Fully permitted and ready to mine** (mining and environmental approvals are in place)
- Multiple Toll processing options within trucking distance (Mt Isa, Earnest Henry, Eloise)

Barbara MRE long projection looking east with block model grades

Image provided by Aeris Resources

Exploration Opportunities at Barbara

- **Lillymay Prospect** historic intercept of **3m @ 7.41% Cu (LMRC001)**
- Lillymay mineralisation is open to the east and down dip, and the area has not been drilled below 120m
- **North Barbara Prospect** historic intercept of **2m @ 2.1% Cu (BARC071)**
- Additional exploration targets at the **Green Zone** and **North Gossan Prospect**

Hazel Creek Project: Turpentine Deposit Strategic Location

- Turpentine Deposit MRE:
8.7Mt @1.16% CuEq for 101,000t CuEq metal
- IOCG system geologically analogous to adjacent **Harmony Gold's Eva deposit** (366Mt @ 0.4% Cu for 1,472,000 contained Cu tonnes¹)
- Harmony is currently building its Eva processing plant 50km from BTM's Turpentine Deposit²
- Large scale opportunity with multiple extension and discovery prospects

¹ For full details of the Turpentine MRE please see resource table in appendix

² Harmony Gold [2024 Mineral Resources and Mineral Reserves Report](#)

Turpentine Deposit: Expansion Potential

- Resource extension drilling planned Q2/Q3 2026
- Gravity and magnetics suggest significant down plunge potential to north
- Turpentine drilling intersections include
13m @ 2.1% Cu, 1.1g/t Au (EHRC221)
21m @ 1.5% Cu, 0.2g/t Au (EHRC0400)
- Mineralisation strongly associated with a large gravity high
- System remains open along strike and at depth

Turpentine Long Projection Looking west

Section with drilling and gravity inversion models

Exploration Upside: Turpentine South

- Compelling lookalike magnetic feature offset to the south and east from the Turpentine Resource
- Co-incident moderate gravity anomaly and +100ppm Cu in soil anomaly
- Under-drilled with several shallow holes 30-40m depth but only 1 holes >100m (EHRC398)
- Geophysical data to be reviewed and, where appropriate, re-processed using modern algorithms

Turpentine drillholes over RTP aerial magnetic survey

Pipeline of High-Priority Drill Targets

- Walk up priority drilling targets at **Eight Mile Creek East**, Turpentine extensions, Brumby and more
- Multiple VTEM anomalies untested by drilling - Brumby, Turpentine North are top priority
- 3 broad greenfield areas of potential:
 - Soldiers Cap–Corella boundary.
 - Corella Formation which reflects the SE-striking segments of the Boomara Fault
 - Speculated NE to NNE-striking basement transfer zones

Cloncurry and Soldiers Cap Exploration Projects

- Eastern succession projects close to Cloncurry
- Prospective for Cu-Au and Cannington style (Zn-Pb-Ag) mineralisation
- Both projects have walk up drilling targets at multiple prospects
- **Advanced prospect within Soldiers Cap at Strathfield – priority drill target**
- Broad coherent geochemical anomalies require follow up and drill testing - image
- Undrilled VTEM conductors require follow up surface sampling and geological context

Regional Cu and Au Exploration: Victory, Little Duke and Canteen Prospects

Cloncurry Exploration Project

Soldiers Cap Exploration Project

2026: Catalyst-Rich Growth Phase

Resource Expansion and Exploration Upside

2026

Cloncurry &
Soldiers Cap

Q4 2026:
MRE Updates

The Investment Case in Numbers

Market Capitalisation

\$33.3M

Backing a 200kt CuEq Resource

Resource valuation*

~\$130/t

*EV\$/CuEq vs est. ASX peer avg ~\$300-500/t**

JORC Resource Today

200kt

CuEq metal with significant upside

Resource Expansion Drilling - Now

10,000m

*Hazel Creek & Barbara –
Results from late Q2 2026*

District Scale Tenure

952km²

*Strategically located near third party
processing infrastructure*

Exploration Upside

**Cloncurry &
Soldiers Cap**

*High-grade Cu–Au intercepts
and untested VTEM conductors*

Each metre drilled has potential to add to the resource base

*Resource valuation is derived from publicly available information for selected ASX-listed copper companies and represents an indicative comparison only. Valuation metrics are based on market capitalisation relative to reported JORC (2012) Mineral Resources (contained metal). Disclaimer: This information is provided for general comparison purposes only and does not constitute a valuation of Breakthrough Minerals. It is not a guarantee of future performance.

Resource Valuation Peer Comparisons

Notes:

1. Enterprise value = market capitalisation less cash (31 Mar 26 quarterly)

Peer group selected on the following basis:

- Companies at a comparable stage of development (exploration)
- Primary copper projects
- Australian based

Peer Comparison CuEq. Calculation Methodology:

$\text{CuEq. \%} = \text{Cu} + 1.24 \times \text{Au g/t} + 0.025 \times \text{Ag g/t} + 4.23 \times \text{Co \%}$

$\text{CuEq.t} = (\$13,000 \times \text{Cu t} + \$5,000 \times \text{Au Oz} + \$100 \times \text{Ag Oz} + \$55,000 \times \text{Co t}) / \$13,000$

Metal prices: Copper US\$13,000/t | Gold US\$5,000/oz | Silver US\$100/oz | Cobalt US\$55,000/t. 100% recovery assumed.

All figures rounded. Totals may not sum due to rounding.

Notes:

- Mineral Resource Estimates are reported using a variety of cutoff criteria (NSR) depending on which is best suited to each deposit
- Discrepancy in summation may occur due to rounding

Metal equivalents have been calculated using the formula $CuEq = [Cu \text{ grade} / 100 / 0.912 \text{ Cu Recovery} * \$9773] + [Au \text{ grade} * 0.686 \text{ Au Recovery} * \$3300 / 31.1034] / (0.912 \text{ Cu Recovery} * \$9773) * 100$.
Prices of USD9,773/t for Cu, USD3,300/oz for Au and recoveries Cu 91.2% and Au 68.6%
