September 2026 Quarterly Activities Report

Great Northern Minerals Limited (ASX:GNM) (**GNM** or the **Company**) is pleased to provide shareholders with its Quarterly Report for the three-month period ended 30 September 2026.

HIGHLIGHTS:

- GNM completed the review of historical geochemical and dipole-dipole induced polarisation (**DDIP**) data at Iron Butte. This identified **four compelling new DDIP targets** across a **3 km target area.**
- **Interpretation of the high-resolution drone magnetic survey** completed, identifying areas of structural complexity that have further refined and **prioritised drill targets** at Iron Butte.
- Priority drill targets include the strong undrilled chargeability anomaly that occurs directly **beneath Iron Butte's 480,000 oz gold and 11.5 million oz silver inferred resource** (refer to GNM ASX announcement dated 12 June 2026) and up-dip to the high-grade intersection of **1.5m at 13.5 g/t Au, 11.5 g/t Ag** from 405.4m (refer to GNM ASX announcement 15 April 2026).
- Experienced **Nevada-based drilling contractor, Alford Drilling LLC, has been secured** for the maiden reverse circulation (RC) drilling program.
- Permitting approval has been received and the required bond has been paid and accepted by the BLM Nevada State Office. Required road and drill pad construction is currently being completed and **drilling at Iron Butte is on track to commence in early November 2026**.
- Recent **DDIP survey** at Douglas Creek has defined at least **three undrilled chargeability** anomalies potentially indicative of sulphide supported by surface geochemistry. Detailed magnetic inversion suggests a **strongly reverse polarised intrusive tonalite**, strongly associated with widespread surface geochemistry of >0.5 g/t Au over an undrilled strike **of over 1km.**
- A follow-up **soil sampling program has been completed** at Douglas Creek by experienced local contractor, Terra Search, that extends the soil grid over the south IP anomaly and includes stream sediment sampling over similar reverse polarised features to the north. All samples have been sent to ALS laboratory in Townsville and results are expected to be received in early November.
- Cash balance of $3.13M at the end of September 2026 Quarter.

Iron Butte Project

Iron Butte is a well-defined epithermal system with demonstrated near-surface gold-silver mineralisation and potential for high-grade carlin-style mineralisation at depth. The maiden JORC (2012) Inferred Mineral Resource Estimate (MRE) comprises 37,850,000 tonnes at 0.4g/t Au and 6 g/t Ag for 480,000 ounces gold and 6.7 million ounces of silver plus a separate silver-only Inferred Resource of 19,250,000 tonnes at 8 g/t Ag for 4.8 million ounces of silver (refer to GNM ASX announcement dated 12 June 2026).

The footprint of the central mineralised zone extends for approximately 500m by 300m and extends from surface to 200m depth and is open in all directions. To date only two deeper diamond holes have been drilled with one hole intersecting 1.5m at 13.5 g/t Au, 11.5 g/t Ag from 405.4m highlighting the potential for Carlin-style mineralisation at depth (refer to GNM ASX announcement 15 April 2026).

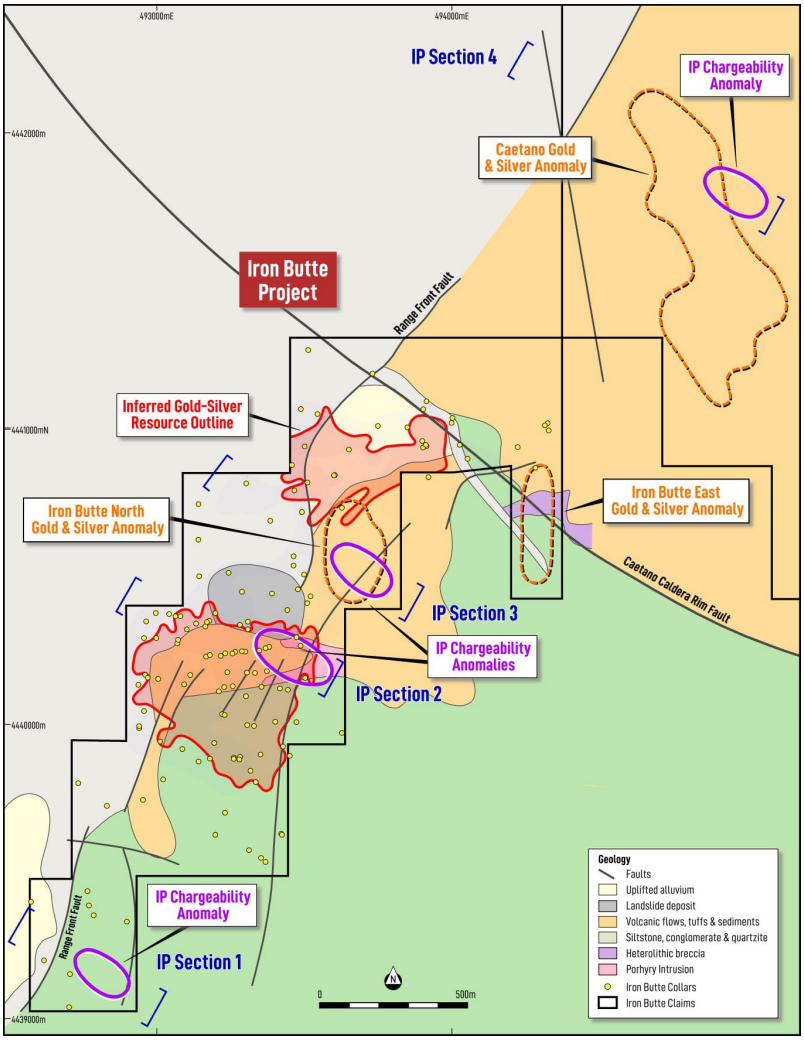

Figure 1: Geology map of Iron Butte project area showing the location of the inferred gold and silver resource and the location of four DDIP lines where the undrilled anomalies have been located.

GNM has completed reprocessing of the DDIP data and a comprehensive 3D review. The detailed reprocessing and review program highlighted four new anomalies which have been identified as significant potential exploration targets:

1. Iron Butte Central: New strong undrilled chargeability anomaly that occurs directly beneath the Iron Butte inferred silver resource and up-dip to the high-grade intersection of 1.5m at 13.5 g/t Au, 11.5 g/t Ag from 405.4m (refer to GNM ASX announcement 15 April 2026);

2. Iron Butte North: New strong undrilled chargeability anomaly coincident with previously recognised geochemical anomaly with highly elevated gold and silver in soil and rock samples;

3. Iron Butte South: A new undrilled anomaly located 900m south of the Iron Butte inferred resource which occurs directly beneath two drillholes with highly elevated gold and silver that ended in mineralisation; and

4. Caetano: A new undrilled anomaly within the newly staked claims, located 1km northeast of the Iron Butte inferred resource. Semi-coincident with previous drilling showing highly elevated gold and silver.

These IP chargeability anomalies are potentially indicative of highly disseminated sulphide possibly related to gold-silver mineralisation in fresh rock and therefore priority drill targets.

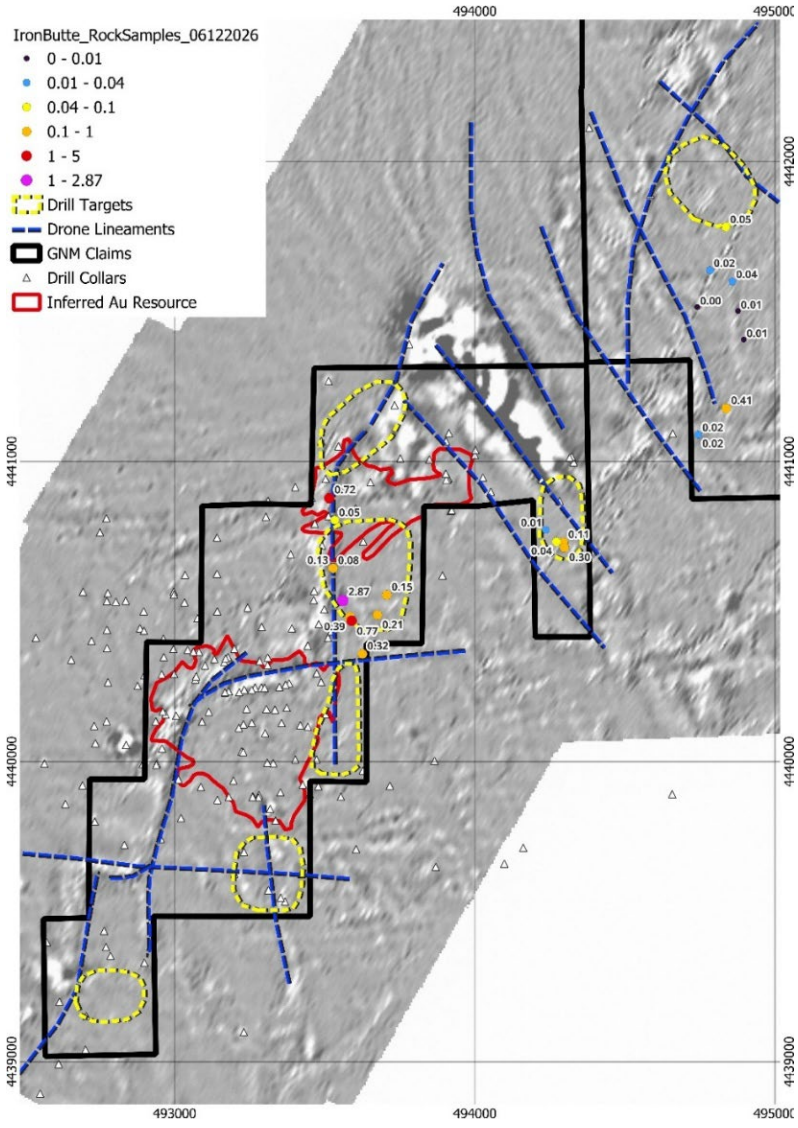

Figure 2: UAV Magnetic image (2VD TMIRTP) of the Iron Butte project area showing the location of the inferred gold resource, preliminary structural interpretation and location of drill targets (yellow dash).

Following this, GNM completed the review and interpretation of data from the high-resolution unmanned aerial vehicle (**UAV**) drone magnetic survey which was flown across the Iron Butte Project area in June. This drone magnetic structural interpretation has been integrated with the surface geochemistry and reprocessed DDIP data to help define and prioritise drill targets for the maiden drilling program.

A drill permit application (Notice of Intent) covering the planned maiden drilling program was submitted to the BLM office in Battle Mountain, Nevada. Permitting approval has been received and the required bond has been paid and accepted by the BLM Nevada State Office. Construction of required roads and drill pads has commenced and Alford Drilling LLC, an experienced local drilling contractor, is on track to commence the drilling campaign in early November.

The maiden drilling program is planned to comprise approximately 2,000m of RC drilling, targeting growth of the existing 480,000 oz gold and 11.5 million oz silver MRE (refer to GNM ASX announcement dated 12 June 2026) along strike and at depth, including testing the potential for Carlin-style gold and silver mineralisation beneath the current Iron Butte MRE.

Douglas Creek Project

GNM completed a DDIP survey at Douglas Creek in June, targeting the magnetic anomalies supported by alteration studies, as well as mineralisation intersected in the drilling and encountered at surface. The primary aim of the DDIP survey was to detect large accumulations of disseminated sulphide and/or silicification at depth that may indicate the presence of a buried mineralised intrusive-related porphyry or skarn system related to the tonalite. Experienced geophysical consultants at Resource Potentials have been engaged to process and interpret the DDIP data in combination with detailed magnetic data to produce 3D inversion models. The work has helped GNM better understand the IP chargeability anomalies and the morphology (shape) of the magnetic anomalies in 3D with the primary aim to detect undrilled anomalies that are supported by surface geochemistry.

The results of this work are highly encouraging, and include the following important observations:

1. The magnetic low features are strongly reverse polarised, highly magnetic features that are interpreted to be partly exposed but primarily buried porphyritic tonalite intrusive bodies which display a spatial relationship with elevated surface geochemistry and outcropping surface mineralisation (Figure 5);
2. 3D inversion of the reverse polarised magnetic feature indicates the interpreted tonalite is a large body 1.5km by 500m that extends to considerable depth (~1km) with a separate apophysis to the east (Figure 4);
3. The Centre DDIP chargeability anomaly occurs east and below the shallow drilling (up to 2m at 18.7 g/t silver, 0.22% copper, 77.5 ppm bismuth, refer to GNM ASX announcement dated 2 February 2023) and appears to be spatially related to the eastern apophysis magnetic low feature (Figures 3 and 4). Rock sampling above the magnetic apophysis returned up to 1.0 g/t gold, 0.5% copper and 1.0% Bi (refer to GNM ASX announcement dated 27 July 2022) and has never been drilled;

4. The strongest DDIP chargeability anomalies to the south occur along the Kangaroo Hills formation contact, which have not previously been subject to surface geochemical programs or drilling (Figure 3 and 4); and
5. The northern DDIP chargeability anomalies occur along the western margin of the large magnetic low feature and have never previously been subject to soil sampling or drilling but rock sampling above and along the trend returned rock assays 0.1 to 13.6 g/t gold, 0 to 0.4% copper, 13.9 to 112 g/t silver and 508 ppm to 0.4% bismuth (refer to GNM ASX announcement dated 31 May 2022 and 27 July 2022) (Figures 3 and 4).

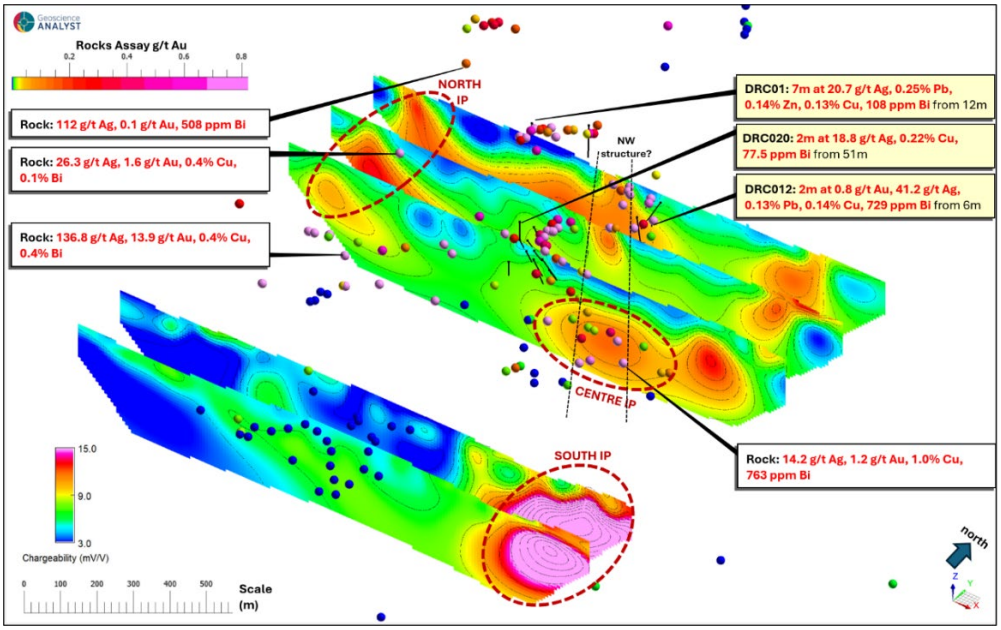

Figure 3: 3D Image of new DDIP chargeability profiles and new IP targets (red dash circles) in relation to Au in rock chips (coloured spheres), previous drilling highlights and also possible northwest structure controlling central IP anomaly.

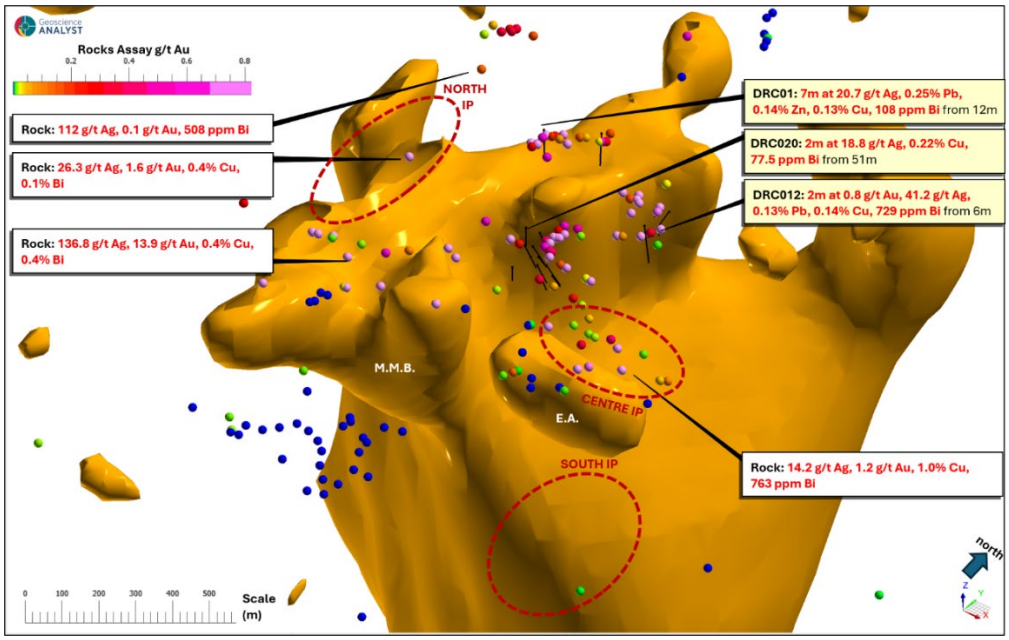

Figure 4: 3D Image of Airborne Magnetic Inversion of strongly reverse polarised body (orange) highlighting the main magnetic body (M.M.B.) and eastern apophysis (E.A.) in relation to Au in rock chips (coloured spheres), previous shallow drilling highlights and newly identified IP chargeability anomalies (red dash).

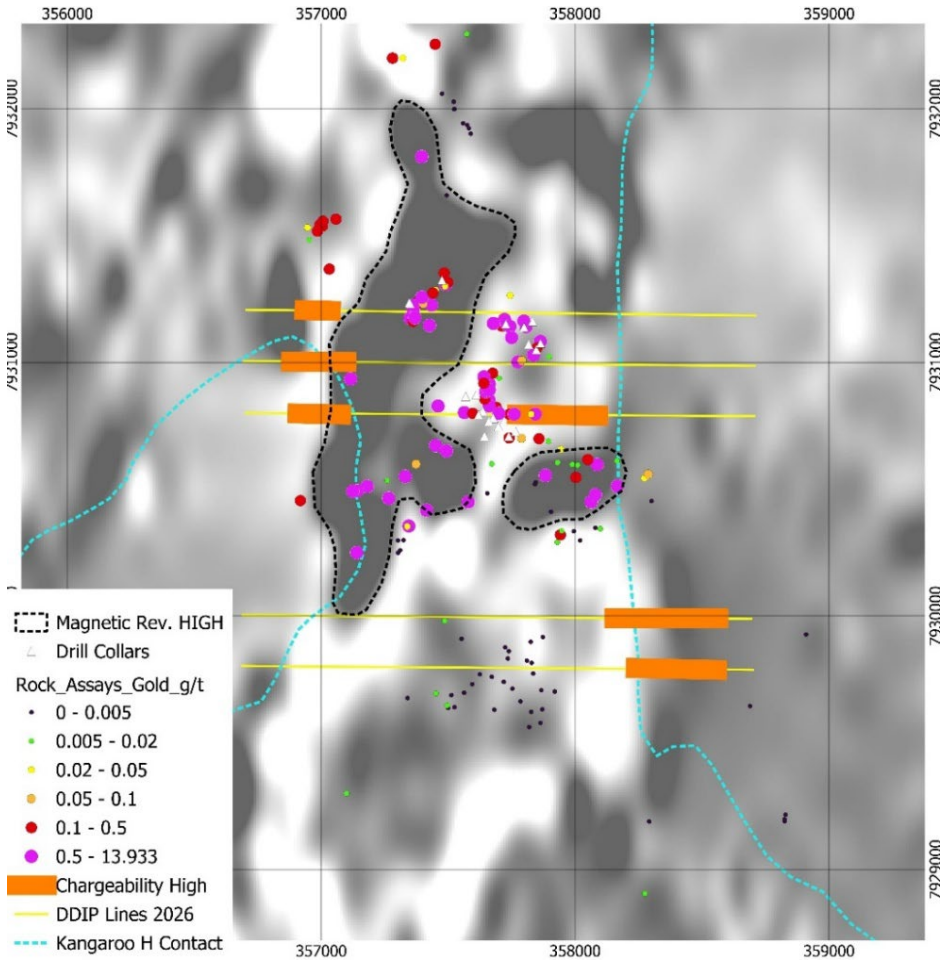

Figure 5: Airborne Magnetic Image (1VD_AGC) showing strong reverse polarised magnetic features (black dash) overlayed with the DDIP chargeability profiles anomalies (orange strips) also showing the Kangaroo Hills Formation contact (blue dash) and rock assays coloured for gold.

To better define targets at Douglas Creek the Company engaged experienced local contractor, Terra Search, to complete a soil survey program to the south over the strong south IP chargeability targets together with stream sediment sampling to the north of the IP survey where further magnetic low/reverse polarised magnetic features are observed in the airborne magnetic data. All samples have been sent to ALS laboratory in Townsville and results are expected to be received in November. Once results are received the Company intends to prioritise drill targets and commence the permitting process to conduct drill testing following the 2026-27 wet season.

Catalyst Ridge Project

The Catalyst Ridge Project is located in the southern portion of the prolific Walker Lane Mineral Belt which is one of the most highly endowed gold-silver mining districts in the US and is renowned for its high-grade epithermal gold-silver deposits. Previous rock chip samples from this area returned assays up to 7.1%, 6.2% and 3.5% antimony with other associated metals up to 23.3 g/t silver and 0.4% tungsten (refer to GNM ASX announcement dated 19 December 2025). GNM has engaged San Bernardino based Lilburn Corporation to help progress the mineral prospecting permit application with the California State Lands Commission and San Bernardino County. The mineral prospecting permit is expected to be

granted once all conditions of the application have been satisfied and it is approved by the California State Lands Commission. Future exploration programs will include DDIP surveys to test the depth extent of sulphide mineralisation to refine drill targets. This program will be designed to assist in defining targets for a drill program that will be mobilised once the mineral prospecting permit is granted.

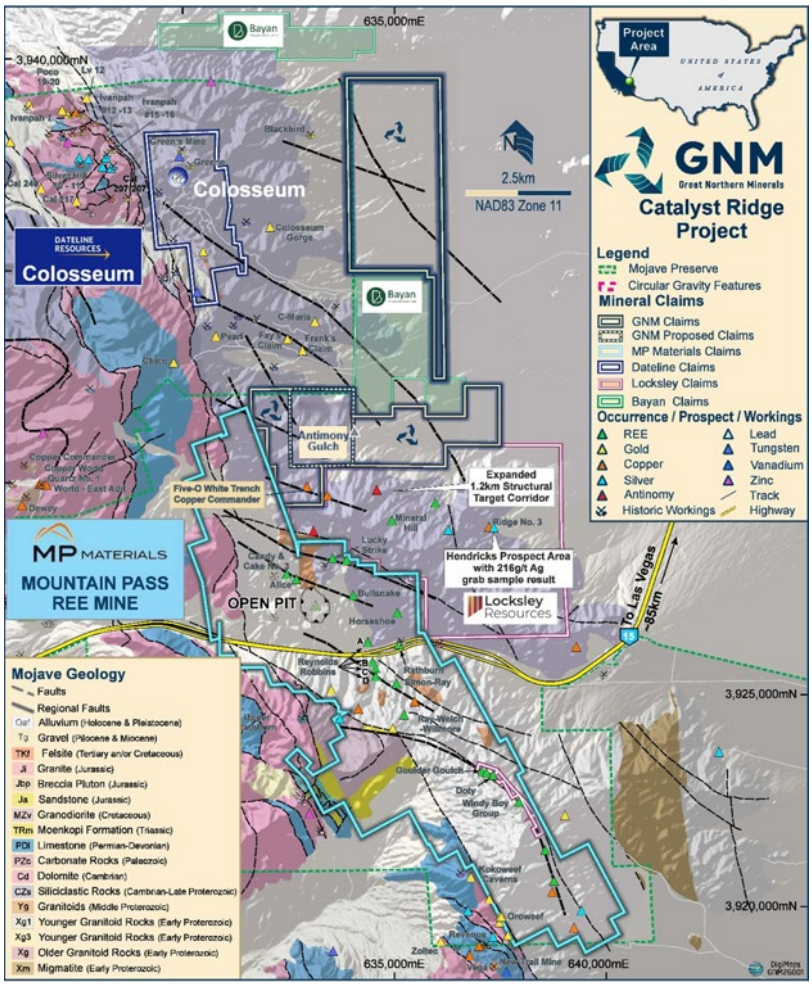

Figure 6: Interpreted bedrock geology map from the US Geological Survey[1] showing the location of GNM's existing and proposed new claims in relation to associated nearby mineral occurrences and other companies in the area.

Corporate

As at 30 September 2026, the Company held cash reserves of $3.13 million.

Payments made to the Company's related parties and their associates during the Quarter totalled $64K, also noted under item 6.1 of the Appendix 5B, which includes the payments for Directors' fees and superannuation paid during the Quarter.

Exploration

ASX Listing Rule 5.3.1: Exploration and Evaluation Expenditure during the Quarter was $287K.

ASX Listing Rule 5.3.2: There were no mining production and development activities during the Quarter.

In line with obligations under ASX Listing Rule 5.3.3, GNM provides information with respect to its tenement interests as at 30 September 2026 in Appendix 1.

ASX Releases

This Quarterly Activities Report contains information extracted from ASX market announcements reported in accordance with the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (2012 JORC Code). These announcements are available for viewing on the Company's website www.greatnorthernminerals.com.au under the Investor Centre tab. GNM confirms that it is not aware of any new information or data that materially affects the information included in any original ASX announcement.

The following ASX announcements lodged during the Quarter end are referred to in this report:

Date	Announcement
10 July 2026	New IP Targets Defined at Iron Butte Gold-Silver Project
1 September 2026	Drilling Contractor Secured at Iron Butte
17 September 2026	Geophysics Defines Drill Targets at Douglas Creek

Forward Looking and Cautionary Statements

Forward looking statements, opinions and estimates included in this announcement are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward looking statements are provided as a general guide only and should not be relied on as a guarantee of future performance. Forward looking statements may be affected by a range of variables that could cause actual results to differ from estimated results, and may cause the Company's actual performance and financial results in future periods to materially differ from any projections of future performance or results expressed or implied by such forward looking statements.

Competent Person Statement

This report's information related to Exploration Results is based on information and data compiled or reviewed by Mr Leo Horn. Mr Horn is a consultant for the Company. Mr Horn is a Member of the Australian Institute of Geoscientists (AIG). Mr Horn has sufficient experience relevant to the style of mineralisation under consideration and to the activities undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Accordingly, Mr Horn consents to the inclusion of the matters based on the information compiled by him, in the form and context it appears. The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant ASX releases. The form and context of the announcement have not materially changed.

This announcement has been authorised by the Board of Great Northern Minerals Limited.

Appendix 5B

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Name of entity

Great Northern Minerals Limited and its Controlled Entities

ABN	Quarter ended ("current quarter")
22 000 002 111	30 September 2026

Consolidated statement of cash flows		Current quarter $A'000	Year to date (3 months) $A'000
1.	**Cash flows from operating activities**		
1.1	Receipts from customers	-	-
1.2	Payments for		
	(a) exploration & evaluation (if expensed)	(287)	(287)
	(b) development	-	-
	(c) production	-	-
	(d) staff costs	-	-
	(e) administration and corporate costs	(328)	(328)
1.3	Dividends received (see note 3)	-	-
1.4	Interest received	39	39
1.5	Interest and other costs of finance paid	-	-
1.6	Income taxes paid	-	-
1.7	Government grants and tax incentives	-	-
1.8	Other (Provide details if material)	-	-
1.9	**Net cash from / (used in) operating activities**	**(576)**	**(576)**

2.	**Cash flows from investing activities**		
2.1	Payments to acquire:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) exploration & evaluation (if capitalised)	-	-
	(e) investments	-	-
	(f) other non-current assets	-	-

Consolidated statement of cash flows		Current quarter $A'000	Year to date (3 months) $A'000
2.2	Proceeds from the disposal of:		
	(a) entities	-	-
	(b) tenements	-	-
	(c) property, plant and equipment	-	-
	(d) investments	-	-
	(e) other non-current assets	-	-
2.3	Cash flows from loans to other entities	-	-
2.4	Dividends received (see note 3)	-	-
2.5	Other (Reclamation bonds lodged)	(43)	(43)
2.6	**Net cash from / (used in) investing activities**	**(43)**	**(43)**

3.	**Cash flows from financing activities**		
3.1	Proceeds from issues of equity securities (excluding convertible debt securities)	-	-
3.2	Proceeds from issue of convertible debt securities	-	-
3.3	Proceeds from conversion of options	4	4
3.4	Transaction costs related to issues of equity securities or convertible debt securities	(3)	(3)
3.5	Proceeds from borrowings	-	-
3.6	Repayment of borrowings	-	-
3.7	Transaction costs related to loans and borrowings	-	-
3.8	Dividends paid	-	-
3.9	Other (Provide details if material)	-	-
3.10	**Net cash from / (used in) financing activities**	**1**	**1**

4.	**Net increase / (decrease) in cash and cash equivalents for the period**		
4.1	Cash and cash equivalents at beginning of period	3,750	3,750
4.2	Net cash from / (used in) operating activities (item 1.9 above)	(576)	(576)
4.3	Net cash from / (used in) investing activities (item 2.6 above)	(43)	(43)
4.4	Net cash from / (used in) financing activities (item 3.10 above)	1	1

8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Date: 29 October 2026

Authorised by: By the Board of Great Northern Minerals Limited
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.

3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [*name of board committee – eg Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".

5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
