

## US\$13.8M PHASE 2 CONSTRUCTION CONTRACT SIGNED THROUGH TO DRY COMMISSIONING

**Perth, Western Australia - Minbos Resources Limited (“Minbos” or “the Company”)** is pleased to announce the signing of a US\$13.8 million Phase 2 construction contract for the Cabinda Phosphate Fertilizer Plant (CPFP) with the Portuguese and Angolan construction group, Grupo Arliz.

The contract covers all remaining construction works required to advance the CPFP to dry commissioning, including structural steel, mechanical installation, electrical and instrumentation works and process control systems.

The award marks the transition from completed civil works into the final construction phase. Phase 1, also with contractor Grupo Arliz, delivered the project platform, roads, drainage, slabs and foundations.

Importantly, the plant and equipment is already in Cabinda and ready for assembly. Designed by FEECO International and shipped to Angola in 2023, the plant was procured early to mitigate capital cost inflation and schedule risk.

The contract follows Minbos receiving the first drawdown under its IDC funding facility and the signing of a Banco de Fomento Angola term sheet, strengthening the funding package for project completion.

### **Minbos Chief Executive Officer Rob Newbold said:**

*“The signing of the Phase 2 construction contract is a significant milestone for Minbos and Angola’s only integrated phosphate mine and fertilizer project.*

*With civil works complete, we are now entering the final build phase. The plant is already on site, funding is being deployed, and construction can progress toward dry commissioning.*

*This contract materially de-risks project delivery and moves Minbos closer to supplying locally produced phosphate fertilizer to support Angola’s agricultural growth and reduce reliance on imports.”*
