DISCLAIMER

Disclaimer and Forward-Looking Statements

This presentation is not a prospectus nor an offer of securities for subscription or sale in any jurisdiction nor a securities recommendation. The information in this presentation is an overview and does not contain all information necessary for investment decisions. In making investment decisions, investors should rely on their own examination of Matador Mining Limited (Matador or the Company) and consult with their own legal, tax, business and/or financial advisers in connection with any acquisition of securities or interest in the Company. The information contained in this presentation has been prepared in good faith by the Company. However, no representation or warranty, express or implied, is made as to the completeness or adequacy of any statements, estimates, opinions or other information contained in this presentation. To the maximum extent permitted by law, the Company, its directors, officers, employees and agents disclaim liability for any loss or damage which may be suffered by any person through the use of, or reliance on, anything contained in or omitted from this presentation. Certain information in this presentation refers to the intentions of the Company, but these are not intended to be forecasts, forward looking statements, or statements about future matters for the purposes of the Corporations Act 2001 (Cth) or any other applicable law. The occurrence of events in the future are subject to risks, uncertainties and other factors that may alter the Company's actual results, performance or achievements to differ from those referred to in this presentation to occur as contemplated. The presentation contains only a synopsis of more detailed information available in relation to the matters described in this document and accordingly no reliance may be placed for any purpose whatsoever on the sufficiency or completeness of such information and to do so could potentially expose you to a significant risk of losing any of the property invested by you or incurring by you of additional liability. Recipients of this presentation should conduct their own investigation, evaluation and analysis of the business, data and property described in this presentation. In particular, any estimates or projections or opinions contained herein necessarily involve significant elements of subjective judgment, analysis and assumptions and you should satisfy yourself in relation to such matters.

Mineral Resources

The information in this Presentation that relates to the Mineral Resource estimate for the Cape Ray Gold Project was announced on 30 May 2023. Matador confirms that it is not aware of any new information or data that materially affects the information included in the announcement of 30 May 2023 and that all material assumptions and technical parameters underpinning the Mineral Resource estimate in that announcement continue to apply and have not materially changed.

Mineral Resources are reported using a cut-off grade of 0.30 g/t gold for open pit and 2.00 g/t gold for underground. Assumptions for the open pit and underground grade cut-offs consider the following: a gold price of USD 1750 per troy ounce gold, selling costs of USD 5 per troy ounce gold, exchange rate of 1.3 USD:CAD, open pit mining costs of CAD 3 per tonne, underground mining costs of CAD 92.47 per tonne, processing costs of CAD 20 per tonne, G&A costs of CAD 5 per tonne processed, gold recovery of 96%, and royalty of 3% for Zone 4, 41 and Isle aux Morts and royalty of 1% for Window Glass Hill, Angus, PW Zone and Zone 51. The open pit Mineral Resources are constrained using optimized pit shells that have been generated using Lerchs Grossman algorithm with parameters outlined above, using a maximum of 50 degree pit slopes. The underground Mineral Resources are constrained using a 2.00 g/t gold grade shell below the optimized pit based on the assumptions summarised above.

The Mineral Resource Estimate for the Cape Ray Gold Project has been prepared by Trevor Rabb, P.Geo. (EGBC #39599 and PEGNL #11155) who is a Competent Person as defined by JORC 2012. EGBC (formerly APEGBC) and PEGNL (APEGNL) are Recognised Professional Organisations accepted for the purpose of reporting in accordance with appendix 5A of the Australian Securities Exchange Listing Rules. Mineral Resources for the Cape Ray Gold Project have an effective date of 22 February 2023.

Exploration Results

The information in this Presentation that relates to exploration results reported through Company ASX announcements that can be found on the Company's website: www.matadormining.com.au.

Matador confirms that it is not aware of any new information or data that materially affects the information included in those announcements.

WHY MATADOR?

STRATEGICALLY PLACED WITH TWO HIGHLY PROSPECTIVE GOLD PROPERTIES

SIGNIFICANT LAND PACKAGE

On a proven multi-million-ounce gold structure

EMERGING, TOP-TIER JURISDICTION OF NEWFOUNDLAND

Ranked 4th for mining attractiveness by the Fraser's Institute

B2GOLD IS A STRATEGIC INVESTOR

Highly reputable & successful gold miner, builder and explorer

BROAD AND ROBUST SHAREHOLDERS

Inclusive of large, well-known institutional investors

SYSTEMATIC APPROACH TO EXPLORATION

To maximize return on investments, create long-term shareholder value

BOARD & MANAGEMENT

SEASONED MINING & EXPLORATION EXPERIENCE WITH PROVEN TRACK RECORD OF SUCCESS

Sam Pazuki P. ENG, M.FIN

MANAGING DIRECTOR & CHIEF EXECUTIVE OFFICER

- Toronto-based executive with 20+ years of experience in the mining industry in senior leadership positions in engineering, business development, strategy and investor relations
- Previously served as Senior VP, Strategy & Corporate Development at OceanaGold and in various roles at EY Advisory Services and Enbridge

Crispin Pike B.SC, M.SC

VP EXPLORATION

- Newfoundland-based geologist with 17+ years of international experience in structural geology and geophysics applied to mineral exploration
- Prior to joining Matador, Crispin worked for the Newfoundland & Labrador Geological Survey for over six years.
- His experience also includes nine years as a structural geologist with Vale in North and South America

Carol Marinkovich

NON-EXECUTIVE DIRECTOR & COMPANY SECRETARY

- Perth-based executive with 25+ years experience in the mining industry
- Extensive experience in Corporate Governance Practices as a Company Secretary within Australia and Internationally

Justin Osborne BSc(Hons) Geology, FAusIMM, FSEG, MAICD

NON-EXECUTIVE CHAIR

- Perth-based geologist and executive with 30+ years experience in the mining industry
- Previously served as Executive Director at Gold Road Resources
- Currently serves as Non-Executive Director of IGO, Hamelin Gold and Astral Resources

Kerry Sparkes M.SC., P. GEO

NON-EXECUTIVE DIRECTOR

- Canadian-based geologist and executive with 30+ years experience in the mining industry
- Previously served as VP Geology at Franco Nevada, VP Exploration at Rainy River Resources and Messina Minerals, Senior Geologist at Voisey's Bay Nickel Co., Exploration Manager of Archean Resources and Founder & Director of Orla Mining
- Currently serves as a Director of Aurion Resources

Dr Nicole Adshead-Bell Ph.D., Structural & Economic Geology

NON-EXECUTIVE DIRECTOR

- Vancouver-based executive with 27+ years combined technical, corporate, institutional and investment banking experience in the mining industry
- Currently serves as President of Cupel Advisory Corp and Non-Executive Director of Altius Minerals, Bravo Mining, Dundee Precious Metals and Hot Chili

B2GOLD – STRATEGIC PARTNER

B2GOLD MADE A STRATEGIC INVESTMENT INTO MATADOR IN NOVEMBER 2022

FIRST EVER INVESTMENT IN CANADA

FIRST EVER STRATEGIC PLACEMENT

B2Gold has a long, rich history and track record of exploring, acquiring, building and operating mines

STRONG BALANCE SHEET⁽¹⁾

Cash: US\$652 million (US\$1.45 billion total liquidity)

SIGNIFICANT PRODUCTION

Annual gold production⁽²⁾: 1,040,000 ounces

Three operating mines⁽²⁾: Fekola (595koz), Masbate (180koz) and Otjikoto (200koz)

HIGHLY EXPERIENCED & CAPABLE TEAM

Mine builders: In-house development team

Global explorers: Track record of organic growth through Greenfields and brownfields exploration

CORPORATE CULTURE

ESG: Operating to the highest of standards financially, environmentally and socially

1. B2Gold (operator); 50% / AngloGold Ashanti Limited ("AngloGold"); 50%.
2. Includes Anacondia area (comprised of the Menankoto Permit and Bantako North Permit).
3. Subject to completion of the acquisition of Sabina Gold & Silver Corp.

WHY NEWFOUNDLAND & LABRADOR

RANKED 4TH GLOBALLY FOR MINING INVESTMENT ATTRACTIVENESS ⁽¹⁾

HIGHLY RANKED, EMERGING JURISDICTION

Multi-Million Ounce Project: Proximal to Marathon Gold's fully permitted and a near-term gold producing Valentine Gold Project

CRITICAL METALS & MAJOR DISCOVERIES ⁽¹⁾

Metals: Iron Ore, Nickel, Copper, Gold, Antimony, Rare Earths

Production ⁽²⁾: 22% of Canada's Nickel & 43% of Canada's Iron Ore

Growing Industry: 12 producing mines and 6 development projects

HIGHLY SUPPORTIVE STAKEHOLDERS

Government: Vocal support and advocacy for responsible mining

Workforce: Abundant home-grown talent pool

Major Infrastructure: Roads, hydro power, airports, seaports

"Newfoundland and Labrador's remarkable geology has helped us build a strong mining sector that provides thousands of jobs and many benefits for businesses and communities."

Seamus O'Regan Jr., NL Minister of Labour

1. 2022 Annual Fraser's Institute
2. Source: Government of Newfoundland & Labrador
3. Iron Ore and nickel production is from Labrador

NEWFOUNDLAND GOLD RUSH

INCREASED INVESTMENT IN THE PROVINCE IN SEARCH OF GOLD (AND CRITICAL METALS)

1. Source: Government of Newfoundland & Labrador

SYSTEMATIC APPROACH TO EXPLORATION

TESTING THE POTENTIAL OF THE CAPE RAY SHEAR ZONE TO MAKE MULTI-MILLION-OUNCE DISCOVERIES

HIGH-RESOLUTION AIRBORNE MAGNETICS

Identify the structures through geophysical datasets

DETAILED PROSPECTING, MAPPING & SAMPLING

Comprehensive outcrop sampling and mapping across all targets

BASAL TILL & BOTTOM OF HOLE SAMPLING

Systematically test the structures through shallow till cover to detect gold pathfinder elements → vector in on specific areas for diamond drilling

DIAMOND DRILLING

Strategic drilling to tag into & define gold and other mineral deposits

DATA REVIEW & ANALYSIS

Comprehensive review significant data & reports for target generation

DIAMOND DRILLING UNDERWAY

DRILLING COMMENCES AT LONG RANGE – FIRST EVER DRILL HOLES IN TARGET AREA

DIAMOND DRILLING AT FIRST LONG RANGE DRILL LOCATION

DRILL LOCATION AT LONG RANGE NEAR PORT AUX BASQUES

2023 EXPLORATION PROGRAM

2023 EXPLORATION PROGRAM DESIGNED BASED ON RETURN ON CAPITAL TO MAKE DISCOVERIES

DIAMOND DRILLING *(commencing soon)*

Two phased approach

Heli-assisted on high priority, drill-ready targets

Targets: Malachite, Grandy's and Long Range

BOTTOM OF HOLE SAMPLING *(waiting on permit)*

Design to define target areas

Specialty RC-drill rig to sample through the till

Targets: Malachite, Grandy's and Long Range

PROSPECTING *(underway)*

Comprehensive sampling and mapping

Targets: Hermitage

GEOPHYSICS *(commencing in July)*

Specific IP and other geophysics

Targets: Malachite and Long Range

BROWNFIELD EXPLORATION

ONE OF ONLY A FEW COMPANIES WITH A DEFINED GOLD RESOURCE IN NEWFOUNDLAND

MINERAL RESOURCE UPDATED

Higher quality resource incorporating all drill data to-date within resource corridor

MINERAL RESOURCE UPDATE HIGHLIGHTS

- 28% increase in Indicated Resources
- Minimal change to overall grade (1.96 g/t vs 2.00 g/t) despite decrease in cut-off grade

HIGH-GRADE AND SHALLOW

Approximately 96% of defined Resources are deposited less than 150 m below surface

GROWTH POTENTIAL

Identified several areas of high interest for future drilling

MALACHITE OVERVIEW

MALACHITE IS A VAST, LARGELY UNDEREXPLORED TARGET AREA WITH 15-KMS OF STRIKE, 4-KMS WIDE

GEOLOGICALLY COMPLEX

Major structural bend along the multi-million-ounce gold structure with several large arrays of faults and shear zones splaying off main shear zone

EXTENSIVE GOLD IN TILL

Gold grain analysis demonstrates significant amounts of gold in till across tenement

HYDROTHERMAL SYSTEMS

Prospecting identified extensive outcropping quartz and sulphide veining

BASEMENT GOLD CONFIRMED

2022 reconnaissance diamond drilling confirmed basement gold

MALACHITE PROSPECTIVITY

EXPLORATION PROGRAM AT MALACHITE DEMONSTRATING SIGNIFICANT POTENTIAL

MAPPING

PROSPECTING⁽¹⁾

GEOCHEMISTRY⁽²⁾

1. See ASX release dated 12 Dec 2022
2. Figure modified from ASX release dated 8 Jun 2022

MALACHITE DRILLING

2023 DIAMOND DRILL PROGRAM FOCUSED ON KEY STRUCTURAL AND LITHOLOGICAL TARGETS

RECONNAISSANCE DIAMOND DRILLING

Scalable two-phased drilling program informed by results

STRUCTURAL TARGETING

Targets based off 2021 & 2022 magnetics and prospecting; geological complexity

LITHOLOGICAL TARGETING

Targets based off detailed analysis on the resource corridor

BOTTOM-OF-HOLE/BASAL TILL PROGRAM

Subject to permitting, Malachite and Grandy's diamond drilling to be supplemented with RC-drilling

LONG RANGE TARGET AREA⁽¹⁾

NEW GREENFIELD TARGET AREA IDENTIFIED CLOSE TO MAJOR SEA PORT, HIGHWAY ON CAPE RAY SHEAR

SIGNIFICANT HISTORIC RESULTS

High-grade samples: Historic, undrilled cluster of high-grade gold in rock chips associated with outcropping sulphide-bearing quartz veins

Geologic setting: Historic results & samples within Windsor Point Group

RECENT PROSPECTING REVEALED KEY PATHFINDERS

Tellurium & Bismuth: Tellurium (Te) values peak at 89 ppm → approx. 10 to 100 times greater than Te values in resource areas

1. See ASX Announcement dated 23 Feb 2023

BUNKER HILL TARGET AREA (1)

BUNKER HILL TARGET AREA HAS A STRIKE LENGTH OF 24KM, 60% GREATER THAN THAT OF MALACHITE

RECENT MULTIGRAM SAMPLE RESULTS

Anomalous gold mineralisation

Float samples: 3.52 g/t, 2.51 g/t, 1.72 g/t & 1.57 g/t

Strike extended

Peak gold assay (3.52 g/t) located 900 metres from historic high-grade outcrop (18.67 g/t)

Significant pathfinder elements

Including silver (27.7 g/t) & copper (0.24%)

Regional exploration

Prospecting result 15 kilometres away delivering 17.05 g/t Au associated with increased levels of silver and copper

HISTORIC SAMPLES

Commodity	Results
Gold	18.67 g/t, 17.05 g/t
Silver	407.5 g/t, 35.3 g/t, 34.1 g/t
Copper	57%, 1.6%

1. See ASX Announcements dated 21 Mar 2023 & 5 Apr 2023

HERMITAGE PROJECT OVERVIEW

LARGEST ARSENIC & ANTIMONY ANOMALY IN NEWFOUNDLAND ON UNDEREXPLORED GOLD BELT

SITUATED ON A PROSPECTIVE GOLD BELT

Hermitage Flexure: Structure hosts other major gold discoveries including Newfound Gold

Extensive land position: Company holds ~27kms of continuous strike

WELL SITUATED GEOLOGICAL SETTING

Structurally unique: Orientation vastly different to all other major geological structures in Newfoundland

Major splay: Hermitage flexure is a major regional splay off the CRSZ

REMOTE, VASTLY UNDEREXPLORED AREA

Historic work and data: Previous grassroots base metals work by mining giants: Teck, Falconbridge and Inco

Large anomaly: Location of five out of eight major antimony anomalies

Long-Term Shareholder Value Cycle

MALACHITE INAUGURAL DIAMOND DRILLING

RECONNAISSANCE INITIAL DRILLING CONFIRMS BASEMENT GOLD MINERALISATION ⁽¹⁾

FIRST EVER DRILLING IN MALACHITE

Identified three initial specific areas of interest

MAL01, MAL02 and MAL03 previously identified S-SE dipping veins and structures

Initial drilling completed

Completed first ever diamond drilling at Malachite with eleven holes at 1,740 metres

Presence of gold

Anomalous gold mineralization identified in four out of eleven holes, with intercepts including 1.72 g/t Au over one metre from 34 metres

Potential to extend the CRSZ

Identified occurrence of gold in basement in the CRSZ hanging wall rocks south of the CRSZ

Extension of drill program

An additional 1,500 metres of diamond drilling and 2,000 metres of RC drilling at Malachite is expected to be complete in 2023

MALACHITE FOCUS AREA – MAL03

PRESENCE OF SIGNIFICANT HYDROTHERMAL ALTERATION ASSOCIATED WITH INCREASED VEINING, ANOMALOUS PATHFINDER GEOCHEMISTRY AND GOLD

FOLLOW-UP WORK PLANNED FOR 2023

Utilising several exploration tools including drilling and geophysics

MALACHITE FOCUS AREA – MAL02

ALL FOUR RECONNAISSANCE DRILL HOLES INTERSECTED ANOMALOUS GOLD

VAST AREA WITH LIMITED EXPLORATION

Largest 2021 gold-in-till geochemical anomaly

1000 metres by 500 metres

Complex area with hydrothermal activity

Extensive overburden and dense vegetation

Structurally interesting

Three intersected gold mineralisation in the hangingwall (> 0.2 g/t) – a first in the CRSZ

Gold association

Discrete alteration surround quartz-carbonate veins with mineralisation hosted in a fractured, veined, and previously unidentified granite suite.

Follow-up work planned for 2023

Utilising several exploration tools including drilling and geophysics
