

## RECEIPT OF FINAL HERITAGE REPORT PAVES PATH TO DRILLING AT ANDOVER

### Highlights

- Final heritage report received for the Andover North Project, allowing the Company to finalise drilling program across all Andover permits
- Final heritage report for Andover North **confirms that key prospects, where Air Core (“AC”) drilling is planned, will not be impeded**
- **Programs of Work (“POW’s”) have already been submitted for 3 tenements (E47/4061, E47/3849 & E47/4063), with remaining POW’s to be submitted on grant of tenement expected shortly**
- Drill rig contractor to be appointed in following weeks
- **AC drilling to commence as soon as POW’s are approved**
- **Company to provide drill program details and indicative schedule for commencement of diamond and rotary circulation drilling in the near term**

**Raiden Resources Limited (ASX: RDN DAX: YM4) (“Raiden” or “the Company”)** is pleased to announce that it received the final heritage survey report in regard to its prospect areas at the Andover North Project area (E47/3849, E47/4063, & P47/2028)<sup>1</sup>.

**Mr Dusko Ljubojevic, Managing Director of Raiden commented:** *“With the Andover North final heritage survey in hand and majority of POW’s now submitted, we are ever so close to breaking ground on our Andover permits. Our planned drill program will incorporate a large Air Core, diamond and rotary circulation drilling program across the entire project area, specifically E47/4061&2 where numerous stacked and mineralised lithium pegmatites have already been identified. The planned AC program will most likely commence first, as soon as the POW’s are approved and we anticipate that our diamond and rotary circulation programs will follow shortly thereafter. The Company will provide an update to the market in regard to the likely schedule for drill commencement and management will be finalising drill*

*contractor negotiations in the following weeks. I, once again would like to thank the Ngarluma Traditional Owners, the Ngarluma Aboriginal Corporation and our consultants for all their assistance with respect to finalising the heritage surveys."*

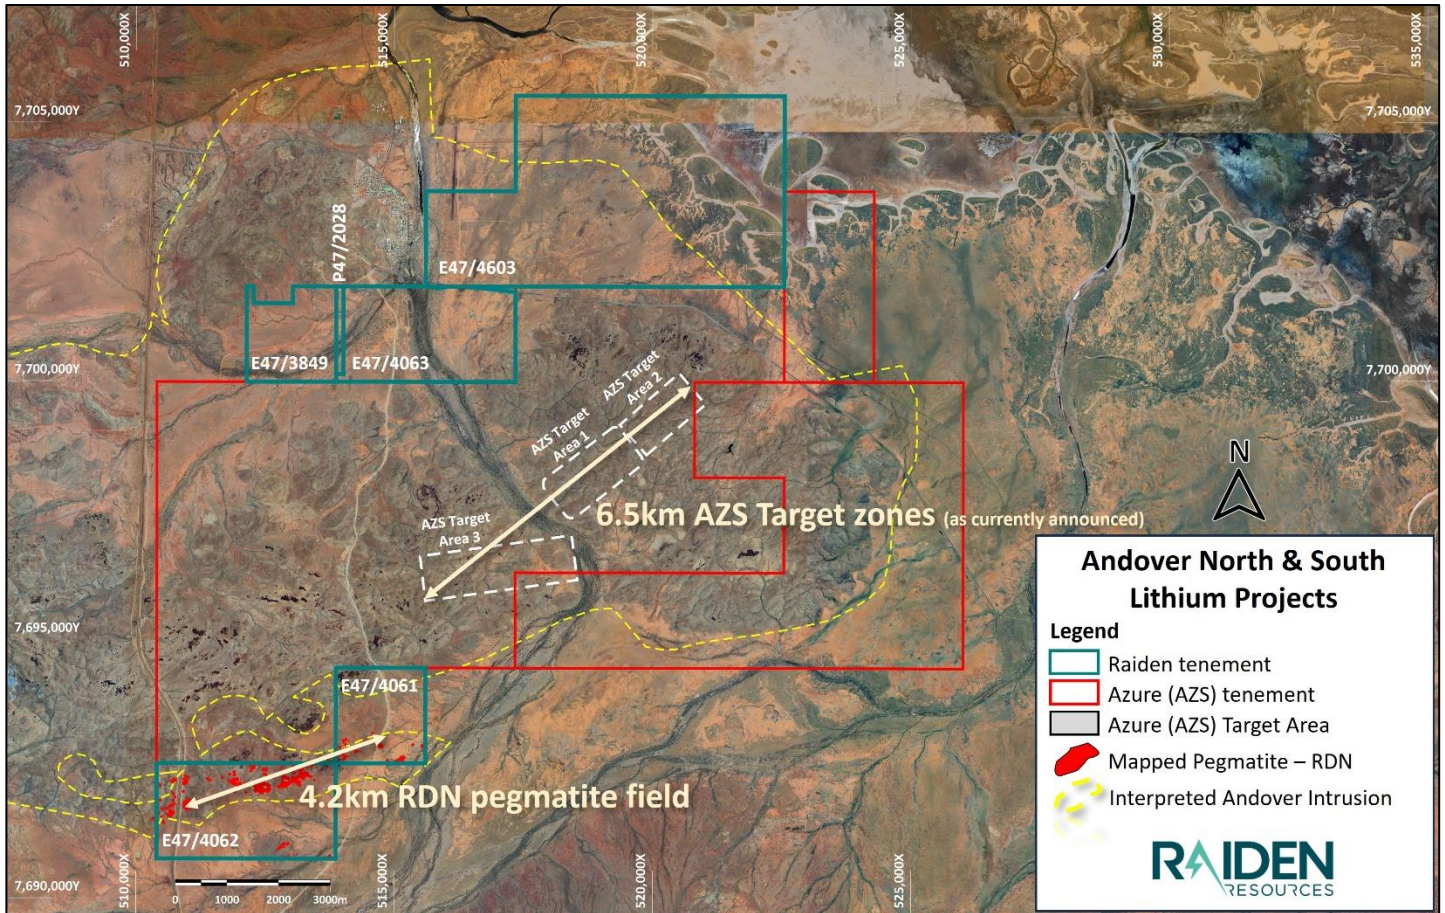

## **Heritage Survey Results**

The Company has received the final heritage report for the Andover North Project from the Ngarluma Aboriginal Corporation ("NAC"). No changes from the preliminary heritage survey report have been flagged<sup>3</sup>, and therefore the Company can reconfirm that that an AC drilling program will be carried out over the key prospects, which management believe have the potential for pegmatite hosted Li<sub>2</sub>O mineralisation across the Andover North project.

As previously announced<sup>3</sup>, the AC drilling program will aim to define further potential pegmatite hosted mineralisation on the project within tenements E47/3849 and E47/4063 at Andover North, and those areas of Andover South, specifically E47/4061, where potential pegmatite hosted mineralisation may be obscured by a thin sediment cover.

POW's for 3 tenements (E47/4061, E47/3849 & E47/4063) have now been submitted to DEMIRS for approval. Management are planning to commence the AC drilling program as soon as the POW's are approved. The operational objective of the program will be to define further pegmatite hosted potential across the project area, which would then be followed up through RC and diamond drilling, in parallel with diamond/RC drilling on Andover South.

Management is undertaking discussions with drilling contractors with the objective of commencing with the drilling program as soon as the regulatory conditions for drilling have been approved. A prescribed schedule will be provided to the market in the near term, as well as details of the planned drilling program.

### **About Raiden Resources**

**Raiden Resources Limited** (ASX:RDN / DAX:YM4) is a dual listed lithium, base metal—gold exploration Company focused on the Andover North-South, Mt Sholl and Arrow lithium projects. The Company also holds the rights to the advanced Mt Sholl nickel-copper-cobalt-PGE and the Arrow gold projects in the Pilbara region of Western Australia. In addition, the Company holds the rights to multiple projects in the emerging and prolific Western Tethyan metallogenic belt in Eastern Europe, where it has established a significant exploration footprint in Serbia and Bulgaria.

The Directors believe the Company is well positioned to unlock value from this exploration portfolio and deliver a significant mineral discovery.
