### Exploration Activities in Western Australia

#### Mt Sholl Project

A Heritage Survey<sup>1</sup>, covering Raiden's planned drilling targets at Mt Sholl was completed during the reporting period. Subsequently, a diamond drilling contractor, Topdrill, was engaged<sup>2</sup> for the proposed program with drilling commencing in September 2022<sup>3</sup>.

During September, the Company reported that all four initial drill holes intersected near surface broad zones of Ni-Cu sulphide mineralisation at the B2 deposit<sup>4</sup>. The highlights from the initial 4 drill holes included;

- Massive, semi-massive and disseminated nickel and copper bearing sulphide mineralisation intersected over significant widths and at shallow depths
- Pentlandite, pyrrhotite, and chalcopyrite are logged in the intersections

Summary of mineralised intervals:

- **Hole 22B2DD001** – Pyrrhotite & Chalcopyrite mineralisation from 41.85 metres – 67.50 metres (25.65m zone)
- **Hole 22B2DD002** - Pyrrhotite & Chalcopyrite mineralisation from 27.10 metres – 53.40 metres (26.3m zone)
- **Hole 22B2DD003** - Pyrrhotite mineralisation from 20.30 metres – 49.65 metres (29.35m zone)
- **Hole 22B2DD004** - Pyrrhotite mineralisation from 12.00 metres to 64.50 metres (52.5m zone)

The initial drilling program is designed for up to 5,000 meters of diamond core, but may be varied, dependant on the results and progress of drilling. The program aims to confirm selected historical results; confirm the Company's geological model of the deposits, as well as, provide material for initial metallurgical testing.

<sup>5</sup>In relation to the disclosure of visual mineralisation, the Company cautions that visual estimates of sulphide and oxide material abundance should never be considered a proxy or substitute for laboratory analysis. Laboratory assay results are required to determine the widths and grade of the visible mineralisation reported in preliminary geological logging. The Company will update the market when laboratory analytical results become available.

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: As previously communicated to the market, the Company's drill rig contractor agreed to accept 30% of their fees in Raiden script at the election of Raiden. The Company holds approximately \$125,000 of stock in Askari Metals Ltd (ASX: AS2) and has recently completed its Tranche 2 Placement on the 10<sup>th</sup> October 2022, raising approximately \$1.04 million. In addition, the Company is also undertaking a fully underwritten loyalty option placement by CPS Capital Group Pty Ltd to raise an additional \$326,000 (before costs) and if required the Company can raise additional cash when required under its approved placement capacity. Further to this, the Company continues to engage with strategic investors, who have expressed an interest in the Company's properties in Europe and in regard to some of the assets in the Pilbara and the potential into entering into a strategic partnership over those assets, whereby the funding for the Companies' projects would be provided by those investors – This potentially may include cash payments, expense reimbursements and/or share payments. A realisation of this would provide the Company with significant upside, without the need to contribute funding.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes, as noted in responses 1 and 2.

*Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.*
