

29 October 2025

ASX RELEASE

QUARTERLY ACTIVITIES REPORT

For the period ended 30 September 2025

Revolver Resources Holdings Limited (ASX:RRR) (**Revolver** or the **Company**) is pleased to report on its activities for the quarter ended 30 September 2025.

Dianne Project

Dianne Copper Mine Project

- Diamond drilling program (18 holes for 1,545m) completed at Dianne Copper Mine Project in preparation for targeted restart of production operations.
- Program primarily designed for grade control purposes, finalisation of geotechnical design and waste rock characterisation.
- Initial assay results received for 16 holes affirm existing Mineral Resource Estimate (MRE) modelling with notable intercepts including:
 - 33.8m at 1.00% Cu from surface (25DMDD007)
 - 20.4m at 1.08% Cu from surface (25DMDD015)
 - 24.0m at 3.94% Cu from 27m (25DMDD010)
- Strongly reinforces the near-surface location, compact scale and continuous nature of the mineralisation to be mined upon planned recommencement of operations at Dianne.
- Ongoing pre-production activities at Dianne include:
 - Updated geological modelling to include pre-production drilling results received.
 - Refinement to site engineering designs for civil and earthworks activities.
 - Design modifications for repair of the existing Settling Dam and mine access road.
 - Ongoing metallurgical test work analysis prior to full scale leach pad operations.
 - Liaising with vendors for the procurement of key items and personnel availability.
 - Commercial discussions with sources of project-level funding (equity and/or debt).
- Targeted positive Final Investment Decision (**FID**) in coming months (funding dependent).
- First copper cathode production from Dianne targeted for late 2026.

Corporate

- Successful completion of an equity placement raising gross proceeds of A\$1.35 million.
- Additional funds raised through the utilisation of its ATM equity facility (gross proceeds of A\$80k) and the establishment of an additional 1% GRR (further proceeds of A\$500k).

Dianne Copper Project (RRR: part 100%, part 70% (Gossan Ridge JV))

The broader Dianne Project is located in northern Queensland, approximately 260km north-west of Cairns within the polymetallic Hodgkinson Province.

The Dianne Deposit, which previously hosted one of the highest-grade operating copper mines in the world, is situated in the eastern part of the Dianne Project. Revolver's Dianne Copper Mine Project is focused on a low capital cost, heap leach / SX-EW development of the existing Mineral Resource at the Dianne Deposit.

Revolver's regional exploration strategy at the broader Dianne Project continues to test the district scale volcanogenic massive sulphide (**VMS**) and intrusive related gold system (**IRGS**) potential in the adjacent Larramore Volcanics Belt, located to the west of the Dianne Deposit.

Figure 1: Dianne Project tenure, main geological trends, and EM targets.

Operations preparation drilling completed at Dianne Deposit

In June 2025, Revolver commenced a diamond drilling program at Dianne. In preparation ahead of the targeted restart of Dianne production operations, this drilling program was designed for grade control purposes, the finalisation of geotechnical design, waste rock characterisation and testing of high-prospectivity deposit extension potential.

The key objectives of the program were:

1. Grade Control and Deposit Extension

- Drilling on closer spaced patterns allows for more uniform and planned loading and retention of material on leach pads.
- Existing geological modelling has identified zones where targeted drilling may further increase deposit scale and potentially mineable tonnes.

2. Geotechnical Design and Waste Rock Characterisation

- Determination of definitive rock mass parameters to finalise optimum safe slope angles in various sections of the open pit (planned to a depth of approx. 100m below surface), as well as capture a range of other detailed geotechnical engineering parameters.
- Sourcing of additional material for final requisite waste rock characterisation test work.

Figure 2: Drill program design – infill hole locations

The program was subsequently completed early in the September quarter.

Figure 3: Drill program design – infill hole locations

Initial diamond drilling results

Approximately 1,545m of HQ diamond core was drilled across 18 holes in and around the proposed Dianne Copper Mine Project restart pit. The focus of these holes was on the lower grade oxide/transitional areas within the current shallow open pit design.

To date, initial assay results have been received and released for 16 of the 18 holes. All returned intercepts fell within the expected ranges of results previously reported for these zones of the Dianne Deposit resource.

Modelling of the geological domains (waste and ore) is being updated to be used for revisions and upgrades to the planned sequencing of mining operations. The results from this drilling also support the Company's ongoing operational planning ahead of the targeted recommencement of copper mining and processing operations at Dianne in the short-term.

For full details, drillhole locations and assay results, refer to ASX release dated 2 September 2025.

Ongoing pre-production activities at Dianne

A range of key pre-production activities continue to advance with respect to the Dianne Copper Mine Project. Key workstreams in progress include:

- Updated geological modelling to include pre-production drilling results received.
- Refinement to site engineering designs for civil and earthworks activities.
- Design modifications for the repair of the existing Settling Dam and mine access road.
- Ongoing metallurgical test work analysis in the lead up to full scale leach pad operations.
- Various vendor interactions for numerous procurement items and personnel availability.

All key workstreams are progressing towards a targeted positive FID for the Dianne Copper Mine Project in the coming months.

Targeted restart of mining operations at Dianne and first copper cathode production are scheduled for 2026 (funding dependent).

Osprey Copper Project (100% RRR)

Revolver's Osprey Project covers 765km² over six adjoining EPMs and is located in northwest Queensland, approximately 220km north of Mount Isa (refer Figure 4). The project lies within the Paleoproterozoic Mount Isa block beneath a shallow cover of sediments of the Carpentaria Basin.

The host geological province is one of the world's richest mineral producing regions, with world-class producing mines (Zn, Pb, Cu and Ag). The geological setting of the Osprey Project tenure is considered by Revolver to be conducive for Tier-1 deposits of Iron Oxide Copper Gold (**IOCG**) and Mt Isa-style base metal deposits.

Revolver's current strategy at Osprey is to rapidly and cost-effectively screen the tenure for new Mt Isa-style (and potential Iron Sulphide Copper Gold systems (**ISCG**)) targets.

Figure 4: Project tenure, main regional belts and priority prospects.

Structural-stratigraphic interpretation of geophysical data

Revolver previously completed a detailed structural and stratigraphic interpretation of the Osprey Project area (refer Figure 5) using a combination of gravity, IP and EM data, calibrated by outcropping basement geology to the south and previous diamond drill intersections.

This work has provided the exploration team with additional, high-value, multi-factor criteria, which was then fed into a revised targeting exercise undertaken over the Osprey tenure. Fourteen (14) high priority zones were identified from this exercise as being strong targets for Mt Isa-style epigenetic copper mineralisation.

Ongoing workstreams

Artificial Intelligence (**AI**) is being applied to the targeting criteria to generate an updated Mineral Prospectivity Index (**MPI**) for direct targeting.

Planning and design for a ground-based geophysical work program is also in progress to test the various high-priority targets generated by the geological interpretation and planned AI modelling overlay. The purpose of this work program will be to define direct drill targets in the areas of the most prospective geology.

Figure 5: Osprey Project interpretation and geological conceptual model.

Corporate

Successful capital raising activities to advance Dianne to FID

In September 2025, Revolver announced it had successfully completed an oversubscribed equity placement to raise A\$1.35 million (before costs) through the issue of approximately 19.3 million new fully paid ordinary shares at A\$0.07 per share (**Placement**).

Under the Placement, Revolver is also set to issue one (1) free attaching unlisted option for every two (2) new shares subscribed for and issued pursuant to the Placement. The options will be exercisable at A\$0.13 with an expiry date of 30 September 2028. These options are subject to shareholder approval at the Company's 2025 Annual General Meeting.

The proceeds from the Placement are to be applied to the advancement of Revolver's Dianne Copper Mine Project to a targeted FID in late 2025 and enabling site pre-development activities to progress in parallel.

Non-dilutive royalty funding

During the quarter, Revolver secured further proceeds of A\$500,000 through the establishment of the final 1% Gross Revenue Royalty (**GRR**) over future minerals production at Dianne Copper Mine Project. The terms of this GRR are identical to the three previous GRRs secured in January and April 2025.

Key terms of all current royalties are provided in the table below. Importantly, the GRRs cover the six (6) Mining Leases that comprise the Dianne Copper Mine Project (mine recommencement) but exclude Revolver's broader exploration tenure at Dianne.

Term	Detail
Counterparty	1) Strumbos Trust; 2) LRSR Pty Ltd; 3) Big River Investments Pty Ltd; 4) Eclipse Commercial Properties Pty Ltd
Royalty	1% Gross Revenue Royalty over any future mineral production from Mining Leases 2810, 2811, 2831, 2832, 2833, 2834. Payable quarterly.
Term	Perpetual
Security	Security Agreement capable of PPSR registration.
Fees	None
Covenants	None

Establishment and sale of the royalties represents an attractive, project-level, non-dilutive form of funding for Revolver shareholders while the company advances key workstreams towards a targeted positive FID for the Dianne Copper Mine Project in the coming months.

ATM issuance

In early July 2025, Revolver elected to further utilize its At-The-Market (**ATM**) at-call funding facility with Alpha Investment Partners (refer ASX release dated 13 September 2024) to raise A\$80,000

(before costs) through the issue of 2,500,000 shares at a price of A\$0.032 per share, with the issued shares coming from the collateral shares already advised. The \$0.032 price was equal to the 10-day VWAP up to 7th July, which clearly highlights the effectiveness of this facility to obtain incremental funding with minimal (in this case no) discount to prevailing market pricing.

Cashflows for the quarter

Attached to this report is the Appendix 5B containing the Company's cash flow statement for the quarter.

The significant cashflows relating to the quarter included A\$1,577k spent on exploration and evaluation expenditure. This was primarily associated with the costs relating to the Dianne Copper Mine Project recommencement activities and pre-construction works, including preparatory diamond drilling program. A\$285k was spent on administrative and corporate costs. A\$76k were payments made to related parties, including remuneration agreements for Executive Directors.

As at 30 September 2025, the Company had total cash of approximately A\$729k.

September 2025 quarter – ASX announcements

Further details referred to in this Quarterly Activities Report can be found in the following announcements lodged on the ASX:

15 September 2025 *Successful A\$1.35M Placement To Advance Dianne to FID*

2 September 2025 *Pre-Production Activities Continuing at Dianne*

14 July 2025 *June 2025 Quarterly Activities Report*

These announcements are available for viewing on the company's website www.revolverresources.com.au.

Revolver confirms that it is not aware of any new information or data that materially affects the information included in any original ASX announcement.

This announcement has been authorized by the Board of Revolver Resources Holdings Limited.

About Revolver Resources

Revolver Resources Holdings Limited is an Australian public company focused on the development of natural resources for the world's accelerating electrification. Our near-term focus is copper exploration in proven Australian jurisdictions. The company has 100% of two copper projects:

- 1) Dianne Project, covering six Mining Leases, three Exploration Permit and a 50:50 JV over a further Exploration Permit in the proven polymetallic Hodgkinson Province in north Queensland, and;
- 2) Project Osprey, covering six exploration permits within the North-West Minerals Province, one of the world's richest mineral producing regions. The principal targets are Mount Isa style copper and IOCG deposits.

Competent Person

The information in this report that relates to Drilling Exploration Results is based on, and fairly represents, information compiled by Dr Bryce Healy (PhD Geology), a Competent Person who is a member of the Australasian Institute of Geoscientists (AIG No: 6132). Dr Healy is a Principal Geologist and Chief Operating Officer (COO) for Revolver Resources Ltd (Revolver) has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Healy consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

No New Information or Data: *This announcement contains references to exploration results, Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all of which have been cross-referenced to previous market announcements by the relevant Companies. Revolver confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements. In the case of Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all material assumptions and technical parameters underpinning the estimates, production targets and forecast financial information derived from the production targets contained in the relevant market announcement continue to apply and have not materially changed in the knowledge of Revolver.*

This document contains exploration results and historic exploration results as originally reported in fuller context in Revolver Resources Limited ASX Announcements— as published on the Company's website. Revolver confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements. In the case of Mineral Resource estimates, Ore Reserve estimates, production targets and forecast financial information derived from the production targets, all material assumptions and technical parameters underpinning the estimates, production targets and forecast financial information derived from the production targets contained in the relevant market announcement continue to apply and have not materially changed in the knowledge of Revolver.

Disclaimer regarding forward looking information: *This announcement contains "forward-looking statements". All statements other than those of historical facts included in this announcement are forward looking statements. Where a company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements re subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. Neither company undertakes any obligation to release publicly any revisions to any "forward-looking" statement.*

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements in relation to the exploration results. The Company confirms that the form and context in which the competent persons findings have not been materially modified from the original announcement.

6.2	Aggregate amount of payments to related parties and their associates included in item 2	0
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	0	0
7.2	Credit standby arrangements	0	0
7.3	Other – Convertible Shareholder Loan	3,000	0
7.4	Total financing facilities	0	0
7.5	Unused financing facilities available at quarter end		3,000
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well. 3,000,000 Convertible Loan Facility with existing shareholder - Kamjoh Pty Ltd. Unsecured Facility with a Term – 36 Months from 23 May 2023. Interest Rate is 7.5%.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	215
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(1,557)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	1,435
8.4 Cash and cash equivalents at quarter end (item 4.6)	729
8.5 Unused finance facilities available at quarter end (item 7.5)	3,000
8.6 Total available funding (item 8.4 + item 8.5)	3,729
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	2.599
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer:	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer:	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 October 2025

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.

2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
