

29 October 2026

Quarterly Activities Report

For the Quarter Ended 30 September 2026

Highlights:

- **2026 drilling returns high-grade silver, gold and antimony results and continues to validate the geological model and extend mineralisation beyond the current MRE at Maverick¹.**
 - **MR26-240:** 28.2m at 80g/t AgEq (47g/t Ag and 0.39g/t Au) from 150.9m, including:
8.2m at 111g/t AgEq 81.2g/t Ag and 0.35g/t Au) from 162.5m; and
16.2m at 88g/t AgEq (64.9g/t Ag and 0.28g/t Au) from 205.7m
 - **MR26-240:** 8.3m at 170g/t AgEq (163.6g/t Ag and 0.1g/t Au) from 266.3m, including:
4.5m at 301g/t AgEq (292.8g/t Ag and 0.1gt Au) from 266.3m
 - **MR25-233:** 27.9m at 70g/t AgEq (31g/t Ag and 0.46g/t Au) from 178.3m; and
53.3m at 51g/t AgEq (17g/t Ag and 0.4g/t Au) from 217.51m
 - **MR25-235:** 98.3m at 120.3g/t AgEq (65.7g/t Ag and 0.67g/t Au) from 173.0m, including:
47.6m at 200.6g/t AgEq (119.6g/t Ag and 1.05g/t Au) from 176.8m
 - **MV-0004:** 89m at 70g/t AgEq (49g/t Ag and 0.2g/t Au) from 126.5m, including:
38.3m at 100g/t AgEq (73g/t Ag and 0.3g/t Au) from 134m, including:
0.8m at 1,296g/t AgEq (1,270g/t Ag, 0.3g/t Au) from 134m
- **Drilling results also demonstrate consistent antimony zones throughout including¹:**
 - **MR25-233:** 50.3m at 0.11% Sb with individual assays up to 3.79% Sb from 178.3m;
 - **MR26-240:** 16.1m at 0.14% Sb with individual assays up to 2.64% Sb from 119.9m;
 - **MR25-235:** 86.9m at 0.10% Sb from 175.3m, with individual assays up to 1.23% Sb;
 - **MV-0004:** 43.7m at 0.06% Sb from 70.6m, including:
19.3m at 0.1% Sb from 70.6m; and
64.7m at 0.06% Sb from 134m, including:
16.5m at 0.1% Sb from 164.9m
- **The broad antimony intervals continue to demonstrate the scale and continuity of antimony mineralisation at Maverick, with average grades across the reported intervals comparable to**

¹ For previously released drill results refer to the Company's ASX announcements dated 3 August 2026, 19 August 2026, 3 September 2026 and 8 September 2026.

the approximately 0.06–0.07% Sb average Mineral Resource and Reserve grades reported for Perpetua Resources Corp.’s (Nasdaq/TSX: PPTA) Stibnite Gold Project.²

- From surface silver-gold intercepts³ demonstrate that mineralisation locally extends directly to surface, outside the Mineral Resource Estimate, supporting further assessment of whether additional shallow mineralisation may contribute to future development studies.
 - **MV-0001:** 16.8m at 20g/t AgEq (11g/t Ag and 0.1g/t Au) from 0m, including:
1.5m at 75g/t AgEq (43g/t Ag and 0.4g/t Au) from 1.5m
- Impressive silver and gold recoveries achieved from the latest round of optimised cyanide leach testwork at the Maverick Silver Project, demonstrating rapid silver and gold extraction within 24 to 48 hours⁴.
 - **Sample 1 (LT15)** achieved rapid silver and gold extraction within 24 hours under the same leach conditions (P80 53µm grind; 5,000 ppm initial / 2,500 ppm-maintained NaCN; no lead nitrate):

Head assay results, 84.5% silver and 83.6% gold recovery with peak recoveries indicated between 0 and 48 hours.
 - **A lower-reagent optimisation test on Sample 2 (LT22)** also delivered rapid silver extraction (P80 53µm grind; 3,000 ppm initial / 1,500 ppm-maintained NaCN; 500 ppm lead nitrate):

Head assay results, 87.7% silver recovery and 87.5% gold recovery with peak recoveries indicated between 0 hours and 48 hours.
- High-resolution helicopter borne magnetic and radiometric survey successfully completed across Maverick.
- Nevada Division of Water Resources grants Permit 94658 for 50 acre-feet per year of groundwater at Maverick.

Sun Silver Limited (**ASX: SS1; OTCQX: SSLVF**) (“**Sun Silver**” or “**the Company**”) is pleased to present its Quarterly Activities Report for the period ending 30 September 2026 (“**the Quarter**”).

2026 Drill Program

On 1 April 2026, the Company advised that drilling had recommenced as part of the 2026 drill program designed to advance the Maverick Silver Project (“**Maverick**” or “**the Project**”) across three key fronts:

- **Resource Upgrade** – Targeted infill drilling within the existing Mineral Resource Estimate (“**MRE**”) to improve geological confidence and support conversion to JORC Indicated resource classification.
- **Resource Growth** – Step-out drilling targeting north-west extension, focusing on continuity of the high-grade hinge zone mineralisation.

² Reference Perpetua website: http://perpetuareources.com/wp-content/uploads/Perpetua-Resources_Investor-Presentation_June-2025-Final.pdf

³ For previously released drill results refer to the Company’s ASX announcement dated 8 September 2026.

⁴ Refer to the Company’s ASX announcement dated 14 October 2026.

- **Metallurgical Advancement** – Collection of additional diamond core samples for metallurgical test work to support future development and processing studies.

The program is focussed on priority zones within and adjacent to the existing MRE, including:

- Infill areas targeting improved resource confidence and classification upgrade;
- North-west extension zones targeting continuation of high-grade mineralisation; and
- Near-surface mineralisation supporting potential from / near surface development optionality, targeting a reduction in future pre-strip requirements.

Results reported during the Quarter returned high grades of silver, gold, and antimony, continuing to increase confidence in the continuity and distribution of mineralisation across the project area.

Importantly, results continue to demonstrate that mineralisation at the occurs over substantial widths and extends beyond the boundaries of the currently delineated silver-gold MRE.

Table 1 – Significant Down Hole Drilling Intercepts reported during the Quarter⁵

Hole ID	Interval (m)	AgEq (g/t)	Ag (g/t)	Au (g/t)	From (m)
MR26-226	26.3	52.6	22.5	0.35	249.9

and	64.7	600	134
Including	16.5	1000	164.9

Nevada Open-Pit Comparisons Highlight Potential Significance of Near-Surface Grades

The Company considers the identification and definition of shallow mineralised zones (MV-0001) particularly important as technical studies progress, with future drilling and mine optimisation work planned to assess the potential for starter pits or staged mining areas targeting near-surface mineralisation before progression into the larger and higher-grade portions of the Maverick mineralised system.

The grades intersected from surface at Maverick are notable in the context of other large-scale open-pit silver and gold-silver projects in Nevada.

Coeur Mining's Rochester Mine, one of Nevada's major operating open-pit, heap-leach silver mines, reported year-end 2025 Proven and Probable Mineral Reserves of approximately 447.7Mt grading 12.63g/t Ag, containing approximately 181.8Moz of silver⁷.

Rochester also reports Measured and Indicated Mineral Resources, excluding Mineral Reserves, of approximately 168.3Mt grading 9.52g/t Ag, with an additional 138.1Mt Inferred grading 12.37g/t Ag.

Hycroft Mining's Hycroft Mine, another large-scale open-pit gold-silver project in Nevada, reports a combined leach-plus-mill Measured and Indicated Mineral Resource of approximately 1.53Bt grading 0.33g/t Au and 11.42g/t Ag, containing approximately 16.4Moz Au and 562.6Moz Ag⁸.

⁶ For previously released drill results refer to the Company's ASX announcements dated 3 August 2026, 19 August 2026, 3 September 2026 and 8 September 2026.

⁷ Coeur Mining Inc, Year-End 2025 Mineral Reserves and Resources, Rochester Mine.

⁸ Hycroft Mining Holding Corporation, Hycroft Mine Mineral Resource Estimate

Against this Nevada context, the intersection of 16.8m at 20g/t AgEq from surface in MV-0001, including 3.5m at 46g/t AgEq from surface, with an internal higher-grade interval of 1.5m at 75g/t AgEq, provides further encouragement regarding the potential significance of Maverick's shallow mineralisation.

While direct comparisons between projects are inherently limited by differences in metallurgy, recoveries, mining costs, strip ratios, processing methods, commodity price assumptions and other modifying factors, these established Nevada projects demonstrate that large-scale open-pit operations can be developed around substantially lower precious-metal grades where favourable scale, geometry and operating characteristics exist.

Accordingly, the presence of mineralisation directly from surface at Maverick may be particularly important when combined with the Project's substantial scale and broad higher-grade mineralisation at depth. Further exploration into the spatial extent of the mineralisation above the resource continues to be a high-priority target for the Company.

Figure 1: Long Section Line A displaying silver-equivalent intercepts as detailed within Figure 2⁹.

⁹ For previously released drill intercepts refer to the Company's ASX announcements dated 24 September 2024, 14 January 2025, 26 March 2025, 2 July 2025, 3 August 2026, 3 September 2026 and 8 September 2026.

Figure 2: Plan view of existing and new drill silver-equivalent highlights¹⁰.

¹⁰ For previously released intercepts not previously referenced refer to the Company's ASX announcements dated 26 March 2025, 3 September 2025, 15 October 2025, 20 November 2025 and 19 August 2026.

Metallurgical Testwork

As part of the Company's larger ongoing metallurgical testwork program at Maverick, the Company was pleased to report the latest results from testwork focused specifically on accelerating silver extraction within the first 48 hours through optimisation of cyanide concentration, lead nitrate addition, dissolved oxygen and grind size.

The latest testwork was devised to build on and complement the previous exceptional silver-gold recovery results from Intermittent Bottle Roll and Cyanide Leach testwork that provided an initial estimate of heap-leach and tank-leach recoveries, respectively, and showed no evidence of preg-robbing¹¹.

The program was designed, undertaken, managed and reviewed by Independent Metallurgical Operations, a subsidiary of SGS. Samples utilised for this testwork were derived from the same composites of the initial testwork program. The tests were conducted in deionised water, so it mitigates against known chloride ion concentration variations in Perth tap water.

A total of 242 intervals of half diamond drill core were derived from existing diamond core samples, comprising oxide and transitional mineralisation. Two composite samples were prepared:

- Composite sample 1: 147kg total weight
- Composite sample 2: 127kg total weight

Sample intervals and drill hole information is detailed in the Company's announcement dated 14 October 2026.

Five cyanide leach bottle-roll tests were undertaken on Sample 1 and six tests on Sample 2, allowing the Company to assess the effect of varying reagent regimes and grind sizes on silver and gold extraction.

The standout result was achieved from Sample 1 (LT15), which demonstrated rapid extraction of both silver and gold under the LT15 leach conditions.

Head assay results, **84.5% silver** and **83.6% gold** recovery with peak recoveries indicated between 0 hours and 48 hours as demonstrated within Figure 3 and Figure 4 below¹².

Figure 3 – LT15 and LT16 Ag recovery kinetics

Figure 4 – LT15 and LT16 Au recovery kinetics

¹¹ Refer to the Company's ASX Announcement dated 5 March 2026.

¹² Refer to the Company's ASX announcement dated 14 October 2026.

The rapid extraction of both silver and gold within the first 24 to 48 hours is particularly encouraging for the Company's assessment of a conventional tank-leach/CIL processing flowsheet, where recovery, leach kinetics and residence time are important inputs into process design and economic evaluation.

Importantly, a subsequent optimisation test on Sample 2 (LT22) evaluated silver-gold recovery under a more moderate cyanide regime combined with a reduced lead nitrate dosage. Refer to the Company's announcement dated 14 October 2026 for further details.

Head assay results, **87.7% silver** recovery and **87.5% gold** recovery as demonstrated within Figure 5 and Figure 6 below¹³.

Figure 5 – LT20 and LT22 Ag recovery kinetics

Figure 6 – LT20 and LT22 Au recovery kinetics

The ongoing program will seek to determine whether a balanced combination of cyanide and lead nitrate can deliver comparable metallurgical performance to the higher cyanide regime while reducing overall reagent consumption and operating costs.

Tank Leach Provides Potential High-Recovery Development Pathway

The latest results provide further support for Sun Silver's assessment of a conventional tank-leach/CIL processing pathway, alongside heap-leach development scenarios currently being evaluated for Maverick. The ability to achieve 84.5% silver and 83.6% gold recovery within only 24 hours (Sample 1 results) provides an important technical basis for evaluating a high-recovery processing configuration.

The Company considers the speed of extraction particularly encouraging. The majority of recoverable silver and gold in the standout test was extracted within the first 24 hours. This provides important information for ongoing optimisation of residence time, plant configuration and processing economics.

U.S. Strategic Importance and Optionality for Antimony Recovery

Sun Silver continues active engagement with various U.S. Government including Department of Commerce and Permitting Council regarding Maverick's potential role in strengthening domestic silver and critical-mineral supply chains, including potential pathways for U.S. Government support for the Project.

These engagements reflect a strategic focus on large-scale domestic development and maximising the recovery and production of U.S. sourced metals. Together with Maverick's substantial silver-gold Mineral Resource and emerging antimony potential, this reinforces the importance of evaluating development scenarios capable of maximising metal recovery and production at scale.

¹³ Refer to the Company's ASX announcement dated 14 October 2026.

Accordingly, the Company is continuing to evaluate both heap-leach and higher-recovery tank-leach/CIL processing pathways, including the potential for a tank-leach/CIL flowsheet to provide greater flexibility for potential future antimony recovery. All development options remain open, with metallurgical, technical and economic investigations continuing to determine the optimal development pathway for Maverick.

High-Resolution Airborne Geophysical Survey

On 11 August 2026, the Company announced the completion of a high-resolution helicopter borne magnetic and radiometric survey across the Maverick project area.

The survey forms part of the Company's systematic exploration strategy and is designed to enhance geological interpretation, refine exploration drill targeting and support future MRE growth across the expanded Project.

The high-resolution datasets will be processed and interpreted to:

- enhance geological and structural interpretation;
- identify favourable mineralised trends and alteration systems;
- refine future exploration targets;
- support future Mineral Resource expansion; and
- provide technical inputs for future development studies.

The survey will complement the Company's ongoing drilling, metallurgical testwork, environmental studies and mine planning activities.

Water Permit Granted

During the Quarter, the Company was pleased to advise that the Nevada Division of Water Resources had granted the Company a 50 acre-feet per year of ground water permit for the Project.

The granting of the water right represents an important operational milestone in securing large water supply required to support the continued advancement at Maverick.

The annual entitlement is equivalent to approximately 62 million litres of ground water each year. This provides the Company with a substantial dedicated water source to support ongoing exploration and associated project development activities, including drilling.

Importantly, the annual nature and scale of the entitlement provides Sun Silver with significant operational flexibility to expand or accelerate exploration activities as required, with limited constraints from water availability.

Maverick Silver Project Overview

Sun Silver's cornerstone asset, the Maverick Silver Project, is located 85km from the fully serviced mining town of Elko in Nevada, USA, and is surrounded by several world-class gold and silver mining operations including Barrick's Carlin Mine (Figure 7).

Figure 7– Sun Silver’s Maverick Silver Project location and surrounding operators.

Nevada is a globally recognised mining jurisdiction which was rated as the Number 1 mining jurisdiction in the world by the Fraser Institute in 2022.

The Project, which is proximal to the prolific Carlin Trend, hosts a JORC Inferred Mineral Resource of 237Mt grading 45.5g/t Ag and 0.30g/t Au for 347.2Moz of contained silver and 2.25Moz of contained gold (539Moz of contained silver equivalent)¹⁴.

The deposit itself remains open along strike and at depth, with multiple mineralised intercepts located outside of the current Resource constrained model.

¹⁴ For previously reported estimates of mineral resources see Annexure A and the Company’s ASX announcement dated 9 December 2025.

Maverick Silver Project – Development Progress

Sun Silver continues to advance the Maverick Silver Project toward development through a comprehensive program of exploration, technical studies, metallurgical test work and permitting activities.

Key development activities include:

- **Mineral Resource Classification** – Advancing the Mineral Resource toward JORC Indicated classification through targeted infill drilling.
- **Mineral Resource Expansion** – Continuing targeted step-out drilling to expand the existing Mineral Resource and test additional mineralised zones.
- **Metallurgical Test Work** – Advancing metallurgical understanding and optimising silver and gold recoveries to support the evaluation of potential processing pathways.
- **Development Studies** – Progressing technical and engineering studies to support future project development and mine planning.
- **Environmental and Permitting** – Advancing environmental baseline studies, including hydrology and geochemistry, alongside regulatory approvals and permitting activities.
- **Mine Planning and Optimisation** – Progressing mine design, pit optimisation and associated development planning activities.
- **Scoping Study** – Advancing the Scoping Study to assess potential development scenarios, processing options and project economics. Targeting early 2027 release pending progress of 2026 drilling campaign and conversion of resource to indicated
- **Pre-Feasibility Study** – Progressing technical workstreams and engineering inputs to support the subsequent Pre-Feasibility Study and further project development decisions. Targeting 2027 release.

Financial

The Company's Quarterly Cashflow Report is appended to this announcement "**Appendix 5B**".

Sun Silver held cash reserves of approximately \$16.603 million at 30 September 2026.

In accordance with ASX Listing Rule 5.3.1, payments for exploration activities during the Quarter totaled \$6.229 million (item 2.1(d) of the Appendix 5B). Details of exploration activities undertaken during the Quarter are provided above.

In accordance with ASX Listing Rule 5.3.2, the Company confirms that there were no mining production and development activities undertaken during the Quarter.

Pursuant to section 6 of the Company's Appendix 5B, and in accordance with ASX Listing Rule 5.3.5, during the Quarter the company paid \$165k of Directors' fees & salaries (including superannuation) and consulting fees for services rendered up to 30 September 2026. These costs are included in working capital except when technical staff are working on exploration & development and studies activities.

All related party transactions have been entered into on an arm's length basis.

Tenement Schedule

In accordance with ASX Listing Rule 5.3.3, details of tenements/lease titles held at the end of the Quarter are provided in Annexure B.

This announcement is authorised for release by the Board of Sun Silver Limited.

Forward-looking statements

*This announcement may contain certain forward-looking statements, guidance, forecasts, estimates or projections in relation to future matters (**Forward Statements**) that involve risks and uncertainties, and which are provided as a general guide only. Forward Statements can generally be identified by the use of forward-looking words such as “anticipate”, “estimate”, “will”, “should”, “could”, “may”, “expects”, “plans”, “forecast”, “target” or similar expressions and include, but are not limited to, indications of, or guidance or outlook on, future earnings or financial position or performance of the Company. The Company can give no assurance that these expectations will prove to be correct. You are cautioned not to place undue reliance on any forward-looking statements. None of the Company, its directors, employees, agents or advisers represent or warrant that such Forward Statements will be achieved or prove to be correct or gives any warranty, express or implied, as to the accuracy, completeness, likelihood of achievement or reasonableness of any Forward Statement contained in this announcement. Actual results may differ materially from those anticipated in these forward-looking statements due to many important factors, risks and uncertainties. The Company does not undertake any obligation to release publicly any revisions to any “forward- looking statement” to reflect events or circumstances after the date of this announcement, except as may be required under applicable laws.*

Competent Person Statement

*The information in this announcement that relates to previously reported exploration results or estimates of mineral resources at the Maverick Silver Project is extracted from the Company’s ASX announcements dated 24 September 2024, 14 January 2025, 26 March 2025, 2 July 2025, 3 September 2025, 15 October 2025, 20 November 2025, 9 December 2025, 5 March 2026, 3 August 2026, 19 August 2026, 3 September 2026, 8 September 2026 and 14 October 2026 (**Original Announcements**). The Company confirms that it is not aware of any new information or data that materially affects the information contained in the Original Announcements and, in the case of estimates of mineral resources, that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.*

Annexure A – Maverick Silver Project Mineral Resource Estimate

Classification	Cut-off (g/t AgEq)	Tonnes (Mt)	AgEq (Moz)	AgEq (g/t)	Ag (Moz)	Ag (g/t)	Au (Moz)	Au (g/t)
Inferred	30	237.3	539	71	347.2	45.5	2.25	0.30

1. Maverick Silver Project Mineral Resource estimated in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code).
2. Refer to the Company's ASX announcement dated 9 December 2025 for further details regarding the Maverick Silver Project Mineral Resource (**Original Announcement**). New metallurgical test work reported 5 March 2026 is a modifying factor in resource estimation, but the preliminary results reported above do not materially affect the mineral resource estimate in respect to metal equivalent calculations due to the similar recovery of both gold and silver. The Company confirms that it is not aware of any new information or data that materially affects the information contained in the Original Announcement and that all material assumptions and technical parameters underpinning the mineral resource estimate continue to apply and have not materially changed.
3. References to metal equivalents (AgEq) are based on an equivalency ratio of 85, which is derived from a gold price of USD\$2,433 and a silver price of USD\$28.50 per ounce, being derived from the average monthly metal pricing for the last three years, and average metallurgical recovery. This is calculated as follows: $\text{AgEq} = \text{Silver grade} + (\text{Gold Grade} \times ((\text{Gold Price} \times \text{Gold Recovery}) / (\text{Silver Price} \times \text{Silver Recovery})))$ i.e. $\text{AgEq (g/t)} = \text{Ag (g/t)} + (\text{Au (g/t)} \times ((2433 \times 0.85) / (28.50 \times 0.85)))$. Metallurgical recoveries of 85% have been assumed for both silver and gold. Preliminary metallurgical recoveries were disclosed in the Company's prospectus dated 17 April 2024, which included a review of metallurgical test work completed by the prior owners of Maverick Silver Project. Metallurgical recoveries for both gold and silver were recorded in similar ranges, with maximum metallurgical recoveries of up to 97.5% in preliminary historical metallurgical testing in respect of silver and up to 95.8% in respect of gold. Gold recoveries were commonly recorded in the range of 80% - 90%, and the midpoint of this range has been adopted at present in respect of both silver and gold. New preliminary metallurgical results reported 5 March 2026 demonstrate similar recoveries for Au (74%) and Ag (77%) from IBR tests, and 82.15% Au and 87.25% Ag recovery from cyanide leach tests, which would not materially affect the metal equivalent ratio and stated resource estimate. It is the Company's view that both elements referenced in the silver and gold equivalent calculations have a reasonable potential of being recovered and sold.

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	2,603	3,134
5.2	Call deposits	14,000	20,000
5.3	Bank overdrafts	-	-
5.4	Other (provide details)	-	-
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	16,603	23,134

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	94
6.2	Aggregate amount of payments to related parties and their associates included in item 2	71
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities	-	-
7.2	Credit standby arrangements	-	-
7.3	Other (please specify)	-	-
7.4	Total financing facilities	-	-
7.5	Unused financing facilities available at quarter end		-
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(152)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(6,229)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(6,381)
8.4	Cash and cash equivalents at quarter end (item 4.6)	16,603
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	16,603
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	2.60
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: Not applicable.	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: Not applicable.	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	Answer: Not applicable.	
	<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 29 October 2026.....

Authorised by: ...The Board.....
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
